reason_for_denial

indication_offered

This is a request for a brain/head CT.; The study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is suspicion of neoplasm, tumor or metastasis.fct"

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue

had a recent episode; This study is being ordered for a neurological disorder.; 05/2015; There has been treatment or conservative therapy.; left hand numbness; tongue and mouth numbness; dysarthria; limb numbness lasting 30mins cp and sob; diabetes; uncontrolled hypertension;; seen and treated by a cardiologist and neurologist

none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache.

Patient has had multiple recent falls, with most recent resulting in black eye. Patient is having severe dizziness & vertigo.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head was between 24 hours and 1 week ago.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

UNKNOWN; This study is being ordered for a neurological disorder.; UNKNOWN; There has not been any treatment or conservative therapy.; SEVERE TREMORS, RIGHT ARM WEAKNESS, UPPER ARM FASCICULATIONS

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Chest discomfort, and a widened mediastinal; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

none; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Patient has multiple masses in abdomen and pelvis and ascites. She also has dyspnea on exertion and a history of tobacco use.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; low back pain neck pain; PT medications

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; <Enter Additional Clinical Information>

UNKNOWN; This study is being ordered for a neurological disorder.; UNKNOWN; There has not been any treatment or conservative therapy.; SEVERE TREMORS, RIGHT ARM WEAKNESS, UPPER ARM FASCICULATIONS

weakness, numbness and tingling; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; low back pain neck pain; PT medications

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

numbness in tingling and legs and feet, and has herniated disc; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The x-ray and exam findings were discussed at length with the patient and his wife. Although he does have chronic back pain, his pain has been worse over the past one year. He has tried physical therapy which failed to improve his pain. He is allergic to ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; FOCUSED EXAM: Lumbar spine Exam; Observation; Normal gait and station; Palpation; Spinal process; Tenderness about the upper lumbar area with 2 palpable soft masses along the lumbar spinous processes; Paraspinous muscles; Mild diffuse t; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

A 2-cm area of decreased attenuation in the region of the pancreatic body with atrophic pancreatic tail and enlargement of the distal pancreatic duct. A pancreatic mass cannot be excluded. The findings were not present on the prior study of 2/7/2015. M; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; < Enter answer here - or Type In Unknown If No Info Given. >

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

Yes, this is a request for CT Angiography of the lower extremity.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; 8mm to 9mm possible loose body noted on recent x-rays of left knee; Suspicious Mass or Suspected Tumor/ Metastasis

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

Chronic hepatitis C.  Elavtated alphafetoprotien levels.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

N/A; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

pt has abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month

PATIENT DOES HAVE GUARDING, ABDOMINAL LEFT LOWER TENDERNESS; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.

Patient has multiple masses in abdomen and pelvis and ascites. She also has dyspnea on exertion and a history of tobacco use.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

RLQ pain with nausea and vomiting; normal US; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; 0.7cm low density of pancreas

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other;

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Lower abdominal pain for 2 months. Intermittent. Worse when bending over and jarring movements. Hurts when she goes over bumps in her car and jumps. Associated with bloating, nausea, diarrhea. + hx of colitis. Had ovaries removed earlier this year due to

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has elevated liver enzymes. Tenderness in LUQ. Left lower rib cage is more prominent.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; rule out a appendicitis, cant eat, fever, severe tenderness dehydrated

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement

This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; rectal mass on physical exam mass on left flant area

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

A 2-cm area of decreased attenuation in the region of the pancreatic body with atrophic pancreatic tail and enlargement of the distal pancreatic duct. A pancreatic mass cannot be excluded. The findings were not present on the prior study of 2/7/2015. M; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

brac positive for high cancer risk,; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a suspected implant rupture.; Yes, this study is being ordered to evaluate a suspected silicone implant rupture.

Unknown; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

had a recent episode; This study is being ordered for a neurological disorder.; 05/2015; There has been treatment or conservative therapy.; left hand numbness; tongue and mouth numbness; dysarthria; limb numbness lasting 30mins cp and sob; diabetes; uncontrolled hypertension;; seen and treated by a cardiologist and neurologist

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

h/x of migraines but are now worsening; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

MIGRAINE HEADACHES; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

unknown; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

Radiology Services Denied Not Medically Necessary

Patient had a trauma happen April 2014 and needed a CT. This nodular spot was found on the Ct scan incidentally. Patient was told to follow up in 6 months to recheck the nodule.; There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.

Radiology Services Denied Not Medically Necessary

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis,  Bowel or bladder dysfunction, Evidence of new foot drop, etc...

Radiology Services Denied Not Medically Necessary

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

Radiology Services Denied Not Medically Necessary

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

CC: Back Pain; HPI: Patient presents concerning her low back and right leg. She denies a history of chronic back pain. Onset of low back pain, right buttock pain, and right leg pain to the level of the ankle that began in August of this year. Pain began; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document FOCUSED EXAM: Lumbar spine Exam; Observation; Normal gait and station; Palpation; Spinal process; Tenderness about L4-S1; Paraspinous muscles; Right lower lumbar tenderness with buttock tenderness; Skin; intact; Soft tissue trig; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

NONE; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/3/2015; There has not been any treatment or conservative therapy.; low back pain radiating down left leg, hematuria, abdominal flank pain

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

None; This study is being ordered for trauma or injury.; 10-14-15; There has been treatment or conservative therapy.; Constant pain, numbness, tingling; PT patient has low back pain radiating to right foot and numbness in right leg; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

pt not getting better with physical therapy and medicines; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality Unknown.; This study is being ordered for trauma or injury.; 10/18/2015; There has been treatment or conservative therapy.; Mid back pain after a bursting feeling and a bruise, mid and lower back pain with muscle spasms.; Muscle relaxers 3x's a day, injection of steroids and Toradol.

Radiology Services Denied Not Medically Necessary

UNKNOWN; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above

Radiology Services Denied Not Medically Necessary

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.

Radiology Services Denied Not Medically Necessary

None; This study is being ordered for trauma or injury.; 10-14-15; There has been treatment or conservative therapy.; Constant pain, numbness, tingling; PT

Radiology Services Denied Not Medically Necessary

Patient fell on 10/14/15 and landed on her left shoulder. She has continued to experience pain. She is currently undergoing Physical Therapy, having her first initial visit on 10/27/15. She is taking pain medication both prescription and over the counter ; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

Radiology Services Denied Not Medically Necessary

Bilateral knees edematous, tender to palpation, crepitus present, anterior drawer sign positive; This study is being ordered for a neurological disorder.; Sept 10th ,2015; There has been treatment or conservative therapy.; Pain to bilateral knees that is worse with weight bearing.; NSAIS's, rest and exercise

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.

Radiology Services Denied Not Medically Necessary

KNEE PAIN THAT HAS STARTED IN THE LAST WEEK. NO KNOWN INJURY. PAIN RADIATES FROM BACK OF KNEE UP TO NECK.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

Radiology Services Denied Not Medically Necessary

none; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Radiology Services Denied Not Medically Necessary

PATIENT'S KNEE IS MUCH MORE LOOSELY ON EXAMINATION. HE HAS BEEN ON NSAIDS AND WEARING A BRACE FOR 3 MONTHS WITH NO IMPROVEMENT. KNEE IS MUCH MORE SWOLLEN NOW THAT 2 WEEKS AGO.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Radiology Services Denied Not Medically Necessary

; This is a requests for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/3/2015; There has not been any treatment or conservative therapy.; low back pain radiating down left leg, hematuria, abdominal flank pain

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; <Enter Additional Clinical Information>

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>

Radiology Services Denied Not Medically Necessary

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This study is being ordered for osteomyelitis.; This is a request for a Sinus CT.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

Pt was tested for Asthma, Not sure of COPD, Pt has sleep apnea w SOB, Dyspnea on exertion. R/o cardiac impairment.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

Current treatments have not been effective. Patient is having loss of vision as headaches get worse; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 1995; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; Home PT; Chronic narcotic management

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;

; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in upper extremities. Patient completed 6 weeks of PT with no improvement.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

; This study is being ordered for a neurological disorder.; 1990; There has been treatment or conservative therapy.; NECK AND BACK PAIN; BACK-SURGERYX2, PHYSICAL THERAPY, MEDICATIONS. NECK-PHYSICAL THERAPY AND MEDICATIONS.

; This study is being ordered for a neurological disorder.; 2010 OR 2011; It is not known if there has been any treatment or conservative therapy.; PAIN IN NECK AND BACK THAT RADIATES INTO LEGS AND HAS NUMBNESS AND TINGLING.

; This study is being ordered for a neurological disorder.; 2013; It is not known if there has been any treatment or conservative therapy.; PAIN IN NECK AND BACK WITH TINGLING, PAIN AND A BURNING SENSATION IN HANDS AND FINGERS.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/21/2014; There has been treatment or conservative therapy.; Back Pain radiating to bilateral buttock and BLE. Leg Pain. Severe Neck Pain. Stabbing, aching, shooting.; NSAIDs, Physical Therapy, Muscle Relaxants, Heat/Ice

Anterior flexion and Hyperextension at cervical spine causes neck pain radiates to upper extremities. Midline palpation and percussion of mid thoracic spine reproduced mid back pain Hyperextension at thoracic spine reproduced back pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2003; There has been treatment or conservative therapy.; radiating pain to bilateral upper extremities; Physical Therapy: 5-13-15; Tens Unit: 5-21-15; Pain Treatment Initiated: 4-9-15

MRI of lumbar and cervical spine are being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment; This study is being ordered for trauma or injury.; Longer than 6 years; There has been treatment or conservative therapy.; Constant with intermittent flare ups. The pain is aching, cramping, sharp, shooting, stabbing and tender. The pain is made worse by increased activity and bending Worsening factor(s) include : standing, walking, getting up from sitting or lying position,; Professional caregivers seen in the past include family physician, physical therapist and orthopedist. The following tests have been done in the past: MRI scan or CT scan and X-rays . She has tried NSAIDs- ibuprofen, aleve, tylenol, sports creams in the

MRI of lumbar and cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment; This study is being ordered for trauma or injury.; Greater than one year.; There has been treatment or conservative therapy.; pain as constant with intermittent flare ups. The pain is aching, throbbing, tender, pins and needles. The pain radiates to back of neck, shoulders and up into hairline.; ibuprofen, aleve, tylenol, sports creams. Currently takes gabapentin, and has a intrathecal pain pump.

No; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/02/2014; There has been treatment or conservative therapy.; Pt is experiencing increased pain BILAT hands and feet as well as the lower back, radiating back of neck up to her hairline and BILAT upper and lower extremities. Pain 7 out of 10.; PT and RX and injections.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; since 2013; There has been treatment or conservative therapy.; pt has chronic neck and low back pain. numbness and tingling in the r arm and leg; anti inflammatory, pain meds. injections , physical therapy ,

Pain in lower back, neck and shoulders also patient is experiencing pain in front and back of her head. Patients pain is described as aching tingling, numbness, stabbing and throbbing sensations. The pain radiates from neck and shoulder to low back into r; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.; Pain and numbness in neck and shoulder radiating down to lower back into right lower extremity.; Physical Therapy 2-2014; Physical Therapy Currently (11-12-15); Trigger Point Injections; Pain medications

Possible spinal injection and neurosurgical evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/27/15; There has been treatment or conservative therapy.; complaints of constant episodes of moderate bilateral lower, bilateral mid and bilateral upper back pain. Made worse by standing, lifting and bending.; Severe right posterior neck pain, described as sharp and aching, radiating trapezius and right should; physical therapy and home exercise

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

; This study is being ordered for trauma or injury.; 4-21-15; There has been treatment or conservative therapy.; MID TO LOW BACK PAIN; CHIROPRACTOR, NERVE CONDUCTION STUDIES, EXERCISE, INJECTIONS, ANTI-INFLAMMATORY MEDICATIONS

Anterior flexion and#x0D; Hyperextension at cervical spine causes neck pain radiates to upper extremities. Midline palpation and percussion#x0D; of mid thoracic spine reproduced mid back pain Hyperextension at thoracic spine reproduced back pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2003; There has been treatment or conservative therapy.; radiating pain to bilateral upper extremities; Physical Therapy: 5-13-15#x0D; Tens Unit: 5-21-15#x0D; Pain Treatment Initiated: 4-9-15

MRI thoracolumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan for; This study is being ordered for trauma or injury.; 5 years; There has been treatment or conservative therapy.; The patient describes her pain as constant with intermittent flare ups. The pain is aching, hot-burning, sharp, stabbing, throbbing and tingling. The pain radiates to lower back and into back sides of both thighs and bilateral lower extremity. Patient say; Physical therapy, SNAIDs, neurontin, hydrocodone, heat, rest.

Patient has been referred to us by Dr. Garcia. As viewed his office notes. Patient has some type of pain in his right flank just below the ribs. He'll try to his undergone trigger point injections x2 with no improvement. Son has history of kidney ston; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/18/15; There has been treatment or conservative therapy.; Flank pain, history of kidney stones; Chronic low back pain with radiculitis; Home Exercises&#xOD; Medications: NSAIDS, Morphine Sulfate

Possible spinal injection and neurosurgical evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/27/15; There has been treatment or conservative therapy.; complaints of constant episodes of moderate bilateral lower, bilateral mid and bilateral upper back pain. Made worse by standing, lifting and bending.&#xOD; &#xOD; Severe right posterior neck pain, described as sharp and aching, radiating trapezius and right should; physical therapy and home exercise

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 1995; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; Home PT; Chronic narcotic management

; This study is being ordered for a neurological disorder.; 2010 OR 2011; It is not known if there has been any treatment or conservative therapy.; PAIN IN NECK AND BACK THAT RADIATES INTO LEGS AND HAS NUMBNESS AND TINGLING.

; This study is being ordered for a neurological disorder.; 2013; It is not known if there has been any treatment or conservative therapy.; PAIN IN NECK AND BACK WITH TINGLING, PAIN AND A BURNING SENSATION IN HANDS AND FINGERS.

; This study is being ordered for Inflammatory/ Infectious Disease.; 1974; It is not known if there has been any treatment or conservative therapy.; PAIN IN BACK AND R KNEE

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/21/2014; There has been treatment or conservative therapy.; Back Pain radiating to bilateral buttock and BLE. Leg Pain. Severe Neck Pain. Stabbing, aching, shooting.; NSAIDs, Physical Therapy, Muscle Relaxants, Heat/Ice

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

; This study is being ordered for trauma or injury.; 2001; There has been treatment or conservative therapy.; BACK AND KNEE PAIN; LUMBAR RADIOFREQUENCY ABLATION AND KNEE INJECTIONS.

; This study is being ordered for trauma or injury.; 4-21-15; There has been treatment or conservative therapy.; MID TO LOW BACK PAIN; CHIROPRACTOR, NERVE CONDUCTION STUDIES, EXERCISE, INJECTIONS, ANTI-INFLAMATORY MEDICATIONS
History of lumbar spine surgery. Patient feels his symptoms are worsening.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient c/o bilateral lower numbness, tingling and muscle weakness in lower extremities. Exacerbating factors are standing, sitting, lifting, bending and twisting.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

lowback pain, worsening; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

MRI of lumbar and cervical spine are being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan; This study is being ordered for trauma or injury.; Longer than 6 years; There has been treatment or conservative therapy.; Constant with intermittent flare ups. The pain is aching, cramping, sharp, shooting, stabbing and tender. The pain is made worse by increased activity and bending Worsening factor(s) include : standing, walking, getting up from sitting or lying position,; Professional caregivers seen in the past include family physician, physical therapist and orthopedist. The following tests have been done in the past: MRI scan or CT scan and X-rays . She has tried NSAIDs- ibuprofen, aleve, tylenol, sports creams in the

MRI of lumbar and cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan; This study is being ordered for trauma or injury.; Greater than one year.; There has been treatment or conservative therapy.; pain as constant with intermittent flare ups. The pain is aching, throbbing, tender, pins and needles. The pain radiates to back of neck, shoulders and up into hairline.; ibuprofen, aleve, tylenol, sports creams. Currently takes gabapentin, and has a intrathecal pain pump.

MRI thoracolumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan for; This study is being ordered for trauma or injury.; 5 years; There has been treatment or conservative therapy.; The patient describes her pain as constant with intermittent flare ups. The pain is aching, hot-burning, sharp, stabbing, throbbing and tingling. The pain radiates to lower back and into back sides of both thighs and bilateral lower extremity. Patient says; Physical therapy, NSAIDs, neurontin, hydrocodone, heat, rest.

No; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/02/2014; There has been treatment or conservative therapy.; Pt is experiencing increased pain BILAT hands and feet as well as the lower back, radiating back of neck up to her hairline and BILAT upper and lower extremities. Pain 7 out of 10.; PT and RX and injections.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; since 2013; There has been treatment or conservative therapy.; pt has chronic neck and low back pain. numbness and tingling in the r arm and leg; anti inflamitories, pain meds. injections , physical therapy ,

Pain in lower back, neck and shoulders also patient is experiencing pain in front and back of her head. Patients pain is described as aching tingling, numbness, stabbing and throbbing sensations. The pain radiates from neck and shoulder to low back into r; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.; Pain and numbness in neck and shoulder radiating down to lower back into right lower extremity.; Physical Therapy 2-2014; Physical Therapy Currently (11-12-15); Trigger Point Injections; Pain medications

patient has an increase of pain. She did not receive relief from her spinal injection. New MRI is needed for neurosurgery consult; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient has been experiencing problems for many years, but it has recently exacerbated and she is unable to get with relief with conservative therapy. She has also developed urinary incontinence in the past month.; This study is being ordered for Inflammatory/ Infectious Disease.; 8/2005; There has been treatment or conservative therapy.; Pelvic pain Radicular pain in Right leg Incontinence right buttock pain; Oral steroids NSAIDS Physical Therapy Ice/Heat Massage Meloxicam

Patient has been referred to us by Dr. Garcia. As viewed his office notes. Patient has some type of pain in his right flank just below the ribs. He'll try to his undergone trigger point injections x2 with no improvement. Son has history of kidney ston; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/18/15; There has been treatment or conservative therapy.; Flank pain, history of kidney stones; Chronic low back pain with radiculitis; Home Exercises Medications: NSAIDS, Morphine Sulfate

patient have nerve damage due to surgery physician want MRI to determine if patient can have radio frequency patient cant have injections and refuses pain meds; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Sensation lost over feet radiculopathy; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient presents with unsteady gait, slight limp. Limited ROM. Positive straight leg test. Patient unable to bend at waist. Slight loss of strength on right. Distal pulses palpable.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; Low back pain that radiates down right leg to foot. Patient describes as constant burning, tingling, aching type of pain. Reports a "cold foot". Reports frequently feeling like she is tripping over her own feet. Reports occasional urinary incontinence. Ag; heat, ice, exercises, stretching, NSAID for past 3 years

Possible spinal injection and neurosurgical evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/27/15; There has been treatment or conservative therapy.; complaints of constant episodes of moderate bilateral lower, bilateral mid and bilateral upper back pain. Made worse by standing, lifting and bending.; Severe right posterior neck pain, described as sharp and aching, radiating trapezius and right should; physical therapy and home exercise

The patient reports muscle cramp, neck pain and loss of muscle bulk. Palpation of lumbar facet joints at L2-3, L3-4, L4-5, and L5-S1 levels reproduced lower back pain. Hyperextension at lumbar spine reproduced lower back pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

Patient has been experiencing problems for many years, but it has recently exacerbated and she is unable to get with relief with conservative therapy. She has also developed urinary incontinence in the past month.; This study is being ordered for Inflammatory/ Infectious Disease.; 8/2005; There has been treatment or conservative therapy.; Pelvic pain Radicular pain in Right leg Incontinence right buttock pain; Oral steroids NSAIDS Physical Therapy Ice/Heat Massage Meloxicam

; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

Eval for further injection or possible surgery. X-rays of bilat shoulders show OA in both. Right shows moderate loss of joint space. Left shows moderate-severe loss of joint space.; This study is being ordered for trauma or injury.; 07/01/2015; There has been treatment or conservative therapy.; Continuous aching pains in both shoulders; physical therapy, injection, narcotic medications and OTC meds. NSAIDs.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

INVESTIGATE ONGOING PAIN TO RULE OUT HERINATED DISC; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2015; There has been treatment or conservative therapy.; DULL ACHE IN LEFT ANKLE WHEN STANDING WALKING ..SHARP SHOOTING PAIN DOWN BACK RADIATING DOWN LEG; INCEDS, PAIN MEDICATION PHYSICAL THERAPY

This is a request for an ankle CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Congenital Anomaly.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; < Describe treatment / conservative therapy here - or Type In Unknown If No Info Given >;

; This study is being ordered for trauma or injury.; 2001; There has been treatment or conservative therapy.; BACK AND KNEE PAIN; LUMBAR RADIOFREQUENCY ABLATION AND KNEE INJECTIONS.

CHRONIC KNEE PAIN WITH SWELLING AND LIMITED RANGE OF MOTION.; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Radiology Services Denied Not Medically Necessary

Patient's pain is not controlled with conservative therapy. MRI's are being ordered to further evaluate pain and symptoms and find a treatment plan that will relieve patient's pain.; This study is being ordered for trauma or injury.; More than three years; There has been treatment or conservative therapy.; Back, neck, and shoulder pain that is radicular into his bilateral lower extremities and radiates to left side of head. Aching, throbbing, tender, pins and needles. Difficulty sleeping and frustration due to pain.; Chiropractor, massage therapy, physical therapy, ice/heat, activity modification, OTCs, NSAIDs, opioid therapy.

Radiology Services Denied Not Medically Necessary

< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT

Radiology Services Denied Not Medically Necessary

; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.

Radiology Services Denied Not Medically Necessary

Will be ordering pump check Myelogram for patient, will need CT scans post procedure to verify dye placement/ cath placement and cath/ pump function; This study is being ordered for trauma or injury.; 02/02/2015; There has been treatment or conservative therapy.; low back pain with radiation into the left lower extremity. Pain surrounding pump site.; Patient has tried multiple different therapies for pain relief including surgery, ESI, various procedures/ injections, PT, heat, and narcotic analgesics that have been unsuccessful in the past

Radiology Services Denied Not Medically Necessary

INVESTIGATE ONGOING PAIN TO RULE OUT HERINATED DISC; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2015; There has been treatment or conservative therapy.; DULL ACHE IN LEFT ANKLE WHEN STANDING WALKING ..SHARP SHOOTING PAIN DOWN BACK RADIATING DOWN LEG; INCEDS, PAIN MEDICATION PHYSICAL THERAPY

Radiology Services Denied Not Medically Necessary

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.

Radiology Services Denied Not Medically Necessary

Will be ordering pump check Myelogram for patient, will need CT scans post procedure to verify dye placement/ cath placement and cath/ pump function; This study is being ordered for trauma or injury.; 02/02/2015; There has been treatment or conservative therapy.; low back pain with radiation into the left lower extremity. ; This study is being ordered for a neurological disorder.; 2014; It is not known if there has been any treatment or conservative therapy.; PAIN IN NECK AND BACK WITH NUMBNESS AND TINGLING IN FINGERS AND LEGS

Radiology Services Denied Not Medically Necessary

; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; NECK AND BACK PAIN; IMAGING, PHYSICAL THERAPY AND MEDICATIONS.

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2015; There has been treatment or conservative therapy.; Neck and left shoulder with back pain.; Currently on medication and hydrocodone 1 tablet every six hours.

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 YEARS AGO; It is not known if there has been any treatment or conservative therapy.; NECK, BACK AND R KNEE PAIN

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2004; It is not known if there has been any treatment or conservative therapy.; MID AND LOW BACK PAIN.

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2010; It is not known if there has been any treatment or conservative therapy.; CHRONIC NECK AND BACK PAIN

Radiology Services Denied Not Medically Necessary

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SINCE AGE 13; There has been treatment or conservative therapy.; NECK AND BACK PAIN; PHYSICAL THERAPY, TENS UNIT, INJECTIONS, MEDICATION.

Radiology Services Denied Not Medically Necessary

; This study is being ordered for trauma or injury.; 2005; There has been treatment or conservative therapy.; NECK AND BACK PAIN; PHYSICAL THERAPY, TENS UNIT AND VARIOUS MEDICATIONS

Radiology Services Denied Not Medically Necessary

Increased pain is not manageable with pain medication. Pain radiates to bilateral lower extremity.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

MRI of lumbar, cervical and thoracic spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a; This study is being ordered for trauma or injury.; Greater than one year; There has been treatment or conservative therapy.; The patient describes his pain as constant with intermittent flare ups. The pain is burning, deep, numbness, pins and needle like and sharp. The pain radiates to bilateral lower extremity. She has stated that the pain has progressively gotten worse, not b; He has tried NSAIDs- ibuprofen, aleve, tylenol, sports creams in the past. MS Contin, oxycodone are current medications

Radiology Services Denied Not Medically Necessary

muscle pain, muscle twitches, muscle weakness, muscle pain and tenderness, neck pain, shoulder pain, back pain, joint pain, joint stiffness and morning stiffness. She complains of rheumatoid arthritis.; This study is being ordered for Inflammatory/ Infectious Disease.; 01/01/2005; It is not known if there has been any treatment or conservative therapy.; chronic pain due to lumbar spondylosis without myelo, cervical spondylois and fibromyalgia.

Radiology Services Denied Not Medically Necessary

none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; chronic back pain worse in the morning, has not had a MRI since 2013, SI joint pain on exam,; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

none; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

PATIENT HAS SEEN PAIN MANAGEMENT IN ANOTHER PART OF THE STATE AND HAS RECEIVED A LESI WHICH PROVIDED SOME RELIEF BUT WAS UNABLE TO RETURN DUE TO THE COST.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Radiology Services Denied Not Medically Necessary

Patient has x-rays showing degenerative disc disease, with physical exam findings pointing to a left L5 radiculitis.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.

Radiology Services Denied Not Medically Necessary

Patient new to pain management clinic, no imaging to review. Unable to provide treatment without. Patient a candidate for injection; This study is being ordered for trauma or injury.; Unknown; There has been treatment or conservative therapy.; neck pain, low back pain, pain in lower extremities; Physical Therapy and medication

Radiology Services Denied Not Medically Necessary

Patient's pain is not controlled with conservative therapy. MRI's are being ordered to further evaluate pain and symptoms and find a treatment plan that will relieve patient's pain.; This study is being ordered for trauma or injury.; More than three years; There has been treatment or conservative therapy.; Back, neck, and shoulder pain that is radicular into his bilateral lower extremities and radiates to left side of head. Aching, throbbing, tender, pins and needles. Difficulty sleeping and frustration due to pain.; Chiropractor, massage therapy, physical therapy, ice/heat, activity modification, OTCs, NSAIDs, opioid therapy.

Radiology Services Denied Not Medically Necessary

R/O suspected herniated disc.; This study is being ordered for a neurological disorder.; 11/23/2015; There has been treatment or conservative therapy.; Chronic neck, back pain, radiculopathy to neck and going down to the L are, numbness, weakness and tingling. Mid back thoracic pain, going down L leg to pelvis, weakness 3 out of 5 radiating to chest. Pt. has been experiencing pain for many years (8) and ; PT and HEP.

Radiology Services Denied Not Medically Necessary

The patient is experiencing muscle cramps, back pain, joint pain, joint stiffness, joint swelling and muscle pain or tenderness. Palpations of lumbar facet joints at L2-3, L3-4, L4-5, and L5-S1 levels reproduced lower back pain.; Hyperextension at lumba; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

Radiology Services Denied Not Medically Necessary

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/30/2015; There has been treatment or conservative therapy.; neck and back pain radiating into extremities decrease sensation in upper extremities lumbar and cervical; anti inflamatory

Radiology Services Denied Not Medically Necessary

Unkown; This study is being ordered for trauma or injury.; Patient has increased pain status post impact on 12/2/2015; There has been treatment or conservative therapy.; ; TENS with benefit; physical therapy with benefit; ice/heat therapy with benefit; home exercises with benefit; interventional spine injections with moderate benefit; ibuprofen; Cymbalta; Celebrex; Vicodin; oxycodone; prednisone; Robaxin; Tylenol #3; Flexer

Radiology Services Denied Not Medically Necessary

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.

Radiology Services Denied Not Medically Necessary

< Enter answer here - or Type In Unknown If No Info Given. >; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

Radiology Services Denied Not Medically Necessary

Increased pain with little or no relief with medications or home exercise .; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; ; The patient received oral analgesics.

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/23/2015; There has been treatment or conservative therapy.; pain in both knees member had a scop of the knees in march and has injections of both knee 12-9-2015; PT
; This study is being ordered for Inflammatory/ Infectious Disease.; 1974; It is not known if there has been any treatment or conservative therapy.; PAIN IN BACK AND R KNEE

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

Radiology Services Denied Not Medically Necessary

; This study is being ordered for a neurological disorder.; 2012; There has been treatment or conservative therapy.; PAIN IN HIPS AND BACK THAT RADIATES INTO THE LEGS AND FEET; MULTIPLE INJECTIONS/MEDICATIONS.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

< Enter answer here - or Type In Unknown If No Info Given. >; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.

Follow up infection that the MDO has been treating , they want to see if it is improving.; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

The ordering physician a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 year; There has not been any treatment or conservative therapy.; Surveillance of an aneurysm

53 year old male patient; for pre-atrial fibrillation ablation; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

R/O artery aneurysm or fistula repair; Is this a request for one of the following? MR Angiogram Upper Extremity

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 year; There has not been any treatment or conservative therapy.; Surveillance of an aneurysm

This is a request for CT Angiography of the Abdomen and Pelvis.

yearly check up for abdominal aneurysm; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; < Describe treatment / conservative therapy here - or Type In Unknown If No Info Given >

This is a request for a heart or cardiac MRI

none; This study is being ordered for Congenital Anomaly.; 2010; There has been treatment or conservative therapy.; chest tightness and discomfort, palpitations.; meds

Yes, this is a request for CT Angiography of the abdominal arteries.

none; This study is being ordered for Congenital Anomaly.; 2010; There has been treatment or conservative therapy.; chest tightness and discomfort, palpitations.; meds

; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Left sided weakness, chf, Paroxysmal Atrial fibrillation; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

This is a request for a brain/head CT.; The study is requested for history of stroke, (CVA) known or follow-up.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

01. Sick sinus syndrome; 02. Paroxysmal a fib; 03. Bradycardia; 04. Occlusion of carotid artery; 05. Abnormal result of other cardiovascular function study: Abnormal MPI.; 06. HTN; 07. Other specified cardiac arrhythmia: Tachycardia-Bradycardia syndrome; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/22/2015; There has been treatment or conservative therapy.; syncope/ near syncope episodes, and dizziness.; 4 week heart monitor.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; 09/25/2015; There has not been any treatment or conservative therapy.; chest pain, dizziness and carotid Doppler.

Sh

62-year-old man this past medical history of persistent atrial fibrillation, persistent cough, coronary artery disease, who was referred by his cardiologist Dr. Schwarz for atrial fibrillation management. Patient was diagnosed with atrial fibrillation aro; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Bicuspid valve, coarctation ascending aortic aneurysm.; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is a known or suspected coarctation of the aorta.; Yes, this is a request for a Chest CT Angiography.

Enter answer here - or Type In Unknown If No HISTORY OF PRESENT ILLNESS; A 22-year-old gentleman with accelerated hypertension and atrial fibrillation, here for his annual follow-up. He has remained stable with no palpitations, lightheadedness, or dizziness; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

F/u KNown Thoracic aortic aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

KNown thoracic aortic aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Mr Wells is a 46 yr old male who presents for follow up visit. Cardiac cath 9/16/15 revealed large dilated left coronary sinus with no significant CAD. Echo 9/11/15 revealed EF 40% with 5/2cm dilation of coronary sinus at aortic sinuses. History of hypertension; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

Mr. Stevens is a 47 year old male with a history of hypertension and hyperlipidemia. He is here today for evaluation of palpitations. He reports that his palpitations mainly occur at bedtime and have been ongoing for the past few months. Patient underwent surgery; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.

New Patient referred by Dr. Sherbet for eval of paroxysmal AF. He had NICMP and an BiV ICD that was implanted July 31,2015 by Dr. Nair. He also underwent an atrial flutter ablation. EF did recover with BiV ICD implantation. Appears to have a history of di; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; There is no physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.

Pt has a hx of Marfans with new onset of CP, syncope, and dizziness. Need to rule out aortic dissection.; This study is being ordered for Congenital Anomaly.; 10/15/15; It is not known if there has been any treatment or conservative therapy.; Chest pain, dizziness, syncope pulmonary vein ablation.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Pulmonary vein mapping for a pulmonary vein ablation.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

pulmonary vein mapping prior to pulmonary vein ablation.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

She never start started the Florinef. She weans off the levsin and cardiozem. She has been on high salt, levsin for 5 months, bur never started Florinef because the concerned of swelling. She c/o left arm turn white all the sudden, without exertion, assoc; This study is being ordered for Vascular Disease.; She never start started the Florinef. She weans off the levsin and cardiozem. She has been on high salt, levsin for 5 months, bur never started Florinef because the concerned of swelling. The left ventricle is normal in size.  Left ventricular systolic function is normal.  The Ejection Fraction estimate is 60-65%.  No regional wall motion abnormalities noted.  The right ventricle is normal in size and function.  The aortic valve ; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are signs or symptoms indicative of vascular insufficiency to the neck or arms.; Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

Thoracic Aortic Aneurysm.   Back Pain; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

YEARLY EVAL OF THORACIC AORTIC ANEURYSM. CHECKING SIZE.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.
; This study is being ordered for Congenital Anomaly.; unknown; There has been treatment or conservative therapy.; ;

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Unknown; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.

Claudication, artery disease.; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.; Pt has no pulses in arms or legs.

Need to review anatomic considerations, embolic vs fasciitis vs stenosis.; This study is being ordered for trauma or injury.; 09/26/2015; There has not been any treatment or conservative therapy.; Hospitalized recently with mixed bag of presumed myopericarditis, right lung mass, finger discoloration (US occlusion of distal right radial artery ? etiology), tachycardia, ? hepatic hemangioma and (incidental?) hep A infection. Recent lung bx with Dr. A

hypertension and serve; This study is being ordered for Vascular Disease.; 4/2015; There has been treatment or conservative therapy.; pain in legs; medication

hypertension and serve; This study is being ordered for Vascular Disease.; 4/2015; There has been treatment or conservative therapy.; pain in legs; medication
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for CT Angiography of the Abdomen and Pelvis.

62 y.o. with h/o Nicotine dependence, GERD, HLD, HTN, Aortic thoracic Aneurysm(Aoritic Root Angiogram 4.1cm), Non-obstructive CAD s/p SCA 8/2014 showed mid LAD 30% stenosis, mild diffuse disease to LCx and RCA. She c/o SOB for the past 1-2 years.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 62 y.o. with h/o Nicotine dependence, GERD, HLD, HTN, Aortic thoracic Aneurysm(Aoritic Root Angiogram 4.1cm), Non-obstructive CAD s/p SCA 8/2014 showed mid LAD 30% stenosis, mild diffuse disease to LCx and RCA. She c/o SOB for the past 1-2 years.; It is not known if there has been any treatment or conservative therapy.; Shortness of breath and CAD. 62 y.o. with h/o Nicotine dependence, GERD, HLD, HTN, Aortic thoracic Aneurysm(Aoritic Root Angiogram 4.1cm), Non-obstructive CAD s/p SCA 8/2014 showed mid LAD 30% stenosis, mild diffuse disease to LCx and RCA. Sh

Yes, this is a request for CT Angiography of the abdomen.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease

This is a request for a MR Angiogram of the abdomen.

; This study is being ordered for Congenital Anomaly.; unknown; There has been treatment or conservative therapy.;

This is a request for a heart or cardiac MRI

This is a request for a Heart CT.

To evaluate the heart before a RF (radiofrequency) ablation for atrial fibrillation.; Is this a request for one of the following? Heart CT

; This is a request for CTA Coronary Arteries.; A study not listed has been completed.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Chest pain on exertion.; This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

It is not known if patient has any conditions like diabetes, age over 50 etc.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Chest pain and near syncope; Yes, there is Chronic Chest Pain.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; 43 yo female with migranes presenting with SOB and chest pain. For the past 1 year she c/o mild, B/L, pressure-like chest pain which is constant but fluctuates. Worse when supine. Not worse with exertion but c/o DOE.; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Angina pectoris syndrome; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; DOE with edema and chest tightness.; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient checked himself into the ACMC ER about 2 to 3 weeks ago for CP. He had bad cp but the enzymes were negative. He was shopping at walmart when the CP started. It was a 4/10 substernal pain like someone sitting on his chest. ER said he may have anxie; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; patient had a RSE that was non diagnostic. Even tho she was unable to achieve her target heart rate. Family hx father had MI at age 58. considering recommending sleep study due to OSA.; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pre surgical eval, having SOB, and chest pain, had CABG, substernal pain started 2 wks ago. former smoker, severe family hx of heart disease; Yes, there is Chronic Chest Pain.

There is "Acute Chest Pain" or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; <Additional Clinical Information>; No, there is no Chronic Chest Pain.

This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Chest pain and pressure
This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Congstive Heart Failure.  WPW

This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Dyspnea, Edema, Palpitations.

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a cardiac surgical procedure.; <Additional Clinical Information>; Yes, the examination is for noninvasive coronary arterial mapping.

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a cardiac surgical procedure.; Pt scheduled to have emergent thoracic aorta aneurysm repair on 10/16/15. Not able to cath pt; Yes, the examination is for noninvasive coronary arterial mapping.

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; 57 year old male with CAD, hypertension, hyperlipidemia, and occlusion and stenosis of bilateral carotid arteries

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterruptible cardiac imaging .; ; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.;

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.;

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Anterior chest wall pain.

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Intercostal pain ..stress test on 12/29/2015 shows ischemia.

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; patient has tacky brady syndrome, heart is in 30/40s, dizzy and hypertension.

Clodication, artery disease.; This study is being ordered for Vascular Disease.; Unknown; There has not been any treatment or conservative therapy.; Pt has no pulses in arms or legs.

VASCULAR DISEASE with Chest pain, Leg Pain with PVD, known CAD with stents and Dyspnea with exertion.; This study is being ordered for Vascular Disease.; 07/22/2015; There has been treatment or conservative therapy.; Chest pain, Leg Pain with PVD, known CAD with stents and Dyspnea with exertion.; Medication therapy and physical therapy pt not getting better and has chest pain and SOB and is progressively getting worse.

Yes, this is a request for CT Angiography of the abdominal arteries.

< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had a recent non-nuclear stress test.; The results of the previous nuclear cardiology study were not normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 year ago; There has not been any treatment or conservative therapy.; Sob on exertion, chest pain

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has not been any treatment or conservative therapy.; weakness with minimal exertion, chest pain worse with exertion, shortness of breath with the pains.

. I was at work sitting typing on the computer and programs and I felt a sudden mid chest severe pain and I felt a few minutes later it happened again and I sat for a while and walked into another office and my work colleague noticed that I was pale and I; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

; It is not known if the patient is diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The study is being ordered for a post myocardial infarction evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

10/13/15 Patient is here for evaluation of chest pain. Chest pain began about 2 months ago . Chest pain location is just left of sternum . Chest pain quality is just a pain . Chest pain intensity is 6/10 . Chest pain occurs sometimes wakes her up at night; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

10/27/15 Patient attempted a Stress echo Treadmill that was non diagnostic in office as she could not walk to reach target heart rate.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

28 year old obese male presenting with dyspnea and chest pain.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

31 year old man presents with atypical chest pain. He presented to ER twice for the same. ER work up EKG and enzymes negative. CXR no acute issues. He has no cardiac risk factors and no premature CAD in family. He is very concerned about this pain. Since ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

33 year old male with syncope and collapse, hypertension, palpitations, chest pain and atrial fibrillation; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

39year old female with hypertension and obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

42 year old female with dilated cardiomyopathy, pre-excitation syndrome, palpitations, and precordial pain.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

43 year old female presenting with chest pain; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

43 year old female with hyperlipidemia, chest pain, abnormal ekg, hypertension, and strong family history of heart disease.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

43 yr. old Male with left sided chest pain/pressure with dizziness. reports nothing relieves pain. Hx of HTN, Hyperlipidemia, family hx of CAD. pt has Paroxysmal vertigo therefore would not be able to do exercise stress test prior due to dizzy episodes.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

44 year old male with chest pain and palpitations; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

46 year old female with hyperlipidemia, hypertension, chest pain, and strong family history of heart disease.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

46-year-old white male with a very strong family history of coronary artery disease develop a single episode of pressure-like chest pain located to mid precordium, severe in intensity, radiating into his neck and his jaw, associated with dyspnea, only rel; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

50 year old male with angina, COPD, and abnormal ekg.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

53 year old female with palpitations, dyspnea, precordial pain, chest pain, syncope and collapse, hypertension and cerebrovascular disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; It is not known if there are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

53 year old with shortness of breath and chest pain.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

54 year old male with palpitations, chest pain, dizziness, palpitations, and edema.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

55 year old male with chest pain and dyspnea.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are no new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

55 year old male with hypertension and abnormal ekg.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

57 y.o. Hispanic male with h/o TIA, HTN, HLD (Crestor) BAVD, CAD s/p (7/2014) PCI of RCA x2 BMS Veriflex 2.75x32 & 20, SCA (8/2014) revealed EF 50% and 40% stenosis of Proximal LAD here for cardiac evaluation. Last seen by Dr Cawich 8/2014. Today;; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

58 F with no significant cardiac history is here with multiple complaints. She has complaints of fatigue and weakness in legs. She just started working after she has been home for 2 yrs and since then feels like her BP fluctuates (she has home BP readings r; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

58 year old male with heart failure, hypertension, hyperlipidemia, paroxysmal atrial fibrillation, palpitations, and bradycardia.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

59 y/o male with Ventricular Rhythm problems and palpitations. He is fatigued, has Hypertension, diabetes, hyperlipidemia, and is a tobacco smoker. He has sleep apnea as well.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

59 year old male with hypertension, palpitation, precordial pain, and fatigue along with strong family history of heart disease.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

59year old female with abnormal ekg, hypertension, chf, and angina; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

60 year old female with cardiac murmur, chest pain, nonrheumatic mitral valve insufficiency, palpitations, and pre-excitation syndrome.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

60 year old male with chest pain and hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

60 yo male with Htn and recently diagnosed CAD (NSTEMI s/p LCx DES; also has 50-60% mid LAD) here for follow up.; Doing well since discharge. No chest pain or SOB.; Back to work but not exercising. Waiting for cardiac rehab.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

63 year old male with syncope and collapse, CAD, and hypertension.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

64 y.o. male with h/o Tobacco abuse, TIA (?), A-fib, Necrosis of right great toe s/p amputation (11/2015) severe PVD s/p R fem pop with vein (11/2015) here for hospital f/u appt. Last seen by Dr Guajardo (11/2015).; Still c/o left leg claudication ; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

64 y/o male with Abnormal ECG showing non-specific ST. He has Syncopal episodes and Vertigo w/blurred vision. Dr. wants nuclear test due to his poor balance.; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Abnormal EKG poor exercise ability and pt can not do the treadmill.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

abnormal EKG, smoker, strong family history of heart disease, hypertension; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

abnormal ekg, tachycardia, shortness of breath, and angina. Family hx of CAD and MVP; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

abnormal EKG; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

active chest pain SOB and left arm numbness; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Angina episodes, mainly with exercise, and relieved NTG, not at rest, below neck, no recent radiating pain...smoker discussed issue...discussed diet carbs low glycemic index and weight loss.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

angina, chest discomfort, mixed hyperlipidemia. Chest Pain (Angina) This is a new problem. The current episode started more than 1 week ago. The problem occurs rarely. The problem has been resolved. Associated symptoms include chest pain. Pertinent nega; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

angina, hypertension, shortness of breath, back pain, abnormal ekg; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

angina, SOB, HTN, dizziness.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

ANGINA,SOB, SMOKER, FAMILY HISTORY OF CAD, CAD S/P STENT, HTN, OBESITY; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

atypical CP, history non-ST elevation MI in 2009 with elevated troponins; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

AVR x 3. Not feeling well for a while. Describes heart skipping and pain and pressure mainly with exertion. had 1v bypass after last surgery by CDW. Gets SOB with exertion for last month. Occ. has to prop head up on pillows. Has more leg swelling x 2mos. ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

cardiomyopathy,; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

CHEST PAIN & PRESSURE, DOE, SMOKER, FAMILY HISTORY OF CAD, TACHYCARDIA, HTN, HYPERLIPIDEMIA, DIZZINESS & DIASTOLIC HEART FAILURE; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

chest pain and Abnormal EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest Pain Angina Preoperative Cardiovascular Evaluation  Osteoarthritis  Former Smoker High Blood Pressure Family History of Heart Disease; This study is being ordered as a pre-operative evaluation.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; It is not known whether this evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

CHEST PAIN, CHEST TIGHTNESS, DOE, FAMILY HX OF CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CHEST PAIN, DOE, PALPS W/IRREGULAR HEART RYTHM, FAMILY HISTORY OF CAD.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Chest pain, Dyspnea, edema.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

chest pain, essential hypertension, other hyperlipidemia, fatigue, fast heart rate. Lori S Miller is a 46 y.o. female who presents for a routine follow up. She is a former pt of Dr. Josef's in this clinic and wants to establish care with Dr. Vengala. Pati; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Chest pain, hypertension, obese with BMI 34.93, palpitations at rest, and former smoker. Family hx of CAD.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

chest pain, hypertension. Karla Roach is a 46 y.o. Caucasian female who presents for post ER visit follow up. She had an episode of epigastric burning that radiated to chest and throat relieved by burping. Work up negative. Taking PPI now and has not had ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

chest pain, left arm pain, anxiety. Chest Pain (Angina) This is a recurrent problem. The current episode started more than 1 week ago. The problem occurs every several days. The problem has not changed since onset. Associated symptoms include chest pain.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

chest pain, short of breath; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

chest pain, shortness of breath, dizziness and giddiness. Palpitations  This is a recurrent problem. The current episode started more than 1 month ago. The problem occurs daily. The problem has been unchanged. Nothing aggravates the symptoms. Associated; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest pain, Shortness of breath, Palpitations, hx of cardiomyopathy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

chest pain, shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CHEST PAIN, SOB, SYNCOPE, PALPS, HTN, DYSLIPIDEMIA, DIABETES, OBESITY; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

CHEST PAIN, SOB, TACHYCARDIA, PALPS, SMOKER, FAMILY HISTORY OF CAD, ABNORMAL EKG, COPD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Chest pain. Sometimes associated to dyspnea and diaphoresis.; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest pain/hypertensive/dizziness/light headiness/obesity/r07.9 r00.2 r42 e66.9; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

CHEST PAIN; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest Pain; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest Pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Chest pains, shortness of breath/exertional, Pain with and w/o exertion.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

CHIEF COMPLAINT  Chest pressure, tightness and shortness of breath with exertion  HISTORY OF PRESENT ILLNESS Jacquita M Engles is here at the request of David Brightwell for consultation and diagnostic testing, as needed, due to chest pressure, tightn; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Chronic diastolic (congestive) heart failure; Essential (primary) hypertension; Mixed hyperlipidemia; Arteriosclerosis of native coronary artery w/ other form of angina pectoris; Encounter for other preprocedural examination: CV risk assessment for herni; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are no new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CHRONIC RENAL DISEASE, CP, CARDIOMYOPATHY, HYPERLIPIDEMIA; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Concerned with abnormal ECG, and had abnormal stress test ...she is a smoker....and wants stress test....cant run do Lexiscan discussed.....and discussed smoking issue.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had a recent non-nuclear stress test.; The results of the previous nuclear cardiology study were not normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

COPD, Asthma, persistent dull ache in the upper left side of his chest, no family history adopted.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

cp, abn ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CP, HYPERLIPIDEMIA, HYPERTENSION; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CP, palpitations, PVC, Syncope, Moderate Mitral Insufficiency; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

daily chest pain; abnormal EKG (9/28/15); The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

DIABETIC, CP, HYPERLIPIDEMIA,HYPERTENSION; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Dyspnea at times with exercise, not at rest, not associated chest pain, stable mild symptom....associated fatigue...main symptom last few months....legs get tight end day, not claudication, stable symptom....non smoker.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

ECG on 12/3/15 shows sinus rhythm, Heart Rate 86 bpm with minor nonspecific T-wave flattening.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient states the symptoms having been going on for quite some time but her first visit w/cardiologist is 12-3-2015.; There has not been any treatment or conservative therapy.; Chest pain with exertional shortness of breath and occasional palpitations.

ECHO from 9/18/15 shows Mild concentric LVH, LVS normal, no PE, Mild Aortic sclerosis w/out stenosis, No valve stenosis. He has multiple risk factors including diabetes, hypertension, Family Hx of CAD, Dyslipidemia and was recently hospitalized for uncount; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent stress echocardiogram.; The results of the previous nuclear cardiology study were not normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

EKG - Sinus bradycardia. Voltage criteria for left ventricular hypertrophy. Left anterior fascicular block. Inferior subepicardial ischemia. Nonspecific ST-T wave changes.; Patient has chronic lower back pain, tobacco abuse history, diabetes;; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

EKG raises concern for left ventricular hypertrophy and some ST-T wave changes. Possibility of ischemic changes. Left axis deviation is present.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

EKG was abnormal. Sinus bradycardia with possible atrial fibrillation noted.; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

EKG was abnormal. Her father died at age 69 and CAD was the cause of death. Patient has dyspnea with the chest discomfort.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Father is deceased. Cause of Death MI at the age 58. Father's history includes CAD.   Mother is living. Mother's history includes diabetes, hypertension and CHF.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Fibrillation; EKG 12/18 abnormal; heart rate 38 beats per minute. Marked sinus, axis deviation.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Following up on Chest Pain and SOB, pt had abnormal EKG. Moderate Right precordial repolarization disturbance. EKG consists of Pulmonary Disease.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Followup appointment for evaluation of chest discomfort. The patient is having increasing substernal chest sensation that is described as index substernal heaviness of moderate to severe intensity, exacerbated by exertion and associated with increased sho; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Having precordial chest pains, both at rest and exercise, , radiating back, left shoulder and arm, episodes last 3-5 minutes, associated dyspnea, , chest feels tight, episodes several times a week....NTG helped...discussed diet and carbs low glycemic inde; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

he has been doing well. No concerning cardiac symptoms and he says he is compliant with meds.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

He is morbidly obese with bilateral LE edema; He has been limited by his knee issues; He has family history of CAD and he has diabetes, hypertension and his EKG is abnormal.; We will order stress test and echo; Venous mapping for the venous insuf.; MORBID; This study is being ordered for Vascular Disease.; Unknown; There has been treatment or conservative therapy.; Shortness of breath and abnormal EKG; He is morbidly obese with bilateral LE edema; He has been limited by his knee issues; He has family history of CAD and he has diabetes, hypertension and his EKG is abnormal.; We will order stress test and echo; Venous mapping for the venous insuf.; MORBID

He's a nice fellow who has been referred by Dr. vice for a cardiac evaluation. He has intermittent left chest pain which doesn't last very long and he has always attributed it to indigestion. It gets a little winded when he exerts himself and is somewhat ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

History of Heart enlargement and murmur, hypertension, Tachycardia, Chest pain, Hypothyroidism, Scoliosis, Hyperlipidemia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

HISTORY OF PRESENT ILLNESS; Carolyn Wagoner is here at the request of Dr. Bogle for consultation and diagnostic testing, as needed. She has not been feeling well. She has had problems with progressive dyspnea symptoms with exertion that started about a year; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

HPI ; ; Dyspnea: moderate, for the last year, worse in the last 6 months, worse with exertion, better with rest, PFT was within normal limits, better with inhalers, Dr. Travis would like to evaluate for CHF, normal Echo 6 months ago at Dr. Travis's office ; Ed; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

HTN; Congestive Heart Failure ; Family History of Heart Disease ; Diabetic; Smoker; Overweight; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient has congestive heart failure.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Hyperlipemia; HTN; Angina; CAD; ; Given DOT we will plan for a Cardiolute Stress Test; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

HYPERLIPUDEMIA, HYPERTENSION, CP; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

I had breast cancer treatment had colon cancer ; recurrent chest pains been having them off and on. It feels like a pain in the middle and tight; ; Died heart attack at 61 years old; ; Former smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

known CAD, COPD can not exercise on treadmill; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Known CAD, S/P Myocardial Infarction, Asthma, HTN; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Left side chest pains, syncopal episode, shortness of breath; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Melondy scheduled this appointment to discuss chest pain. She states that she has episodes of chest discomfort, at rest or with exertion, which last 1-2 minutes before resolving. Nitroglycerin helps but does not completely relieve the pain immediately. Th; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

member did have a treadmill stress test /normal and now having recurring chest pain abnormal EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

member was in hospital with chest pain sob abnormal/borderline ekg obese; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

moderate chest pains for the past 3 weeks, history of tachycardia and hypertension he is on Digoxin and Metoprolol cannot due regular stress test.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

moderate chest pains, shortness of breath, heart palpitations. strong family history of coronary artery disease; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Arthur is referred by Dr. Stamp to evaluate palpitations. These started about a year ago, moderately severe, lasts for up to an hour, associated with chest pressure, not exacerbated by activity. Does have dyspnea on exertion with moderate exertion; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mr. Blum is a 54 y/o WM referred by Dr. Deborah Cerrato for an abnormal ECG and dizziness. He had a moderately severe episode of "lightheadedness" almost 2 months ago while working in a yard, lasted 30-60 seconds, associated with substernal chest pressure; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mr. Forrest is here today as a new pt referred by Andy Guinn, APN at SAMA with irregular heart rate, more tired lately, & dizziness.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Krause last scene July 2 015. He has history of CAD CABG. He had an OEM 50% in a diagonal of 80% that was not bypassed by report. He is not having anginal symptoms per se. He denies chest pain. No chest pressure. No CHF. No symptoms. Just on my pressu; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Martin has been experiencing intermittent chest pain, as described earlier in this request for the last month and on each occasion the pain becomes worse.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mr. Pomtree comes in for follow-up last seen January 2015. He has history of CAD and continued risk factors of diabetes. Last stent 2013. He has recently been on testosterone shots starting in June. He is certain level has come down. He mainly started his; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Primm is here today as a new pt referred by Dr. Richard Davis with chest pressure at his xyphoid process. He also had 1 spell where he felt like he was going to faint, but he thinks it was from anxiety. He also states the Omeprazole seems to be helpin; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mr. Turner is here today as a new pt. He has been having chest pains, shortness of breath, & fatigue.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Mr. Ward was a referral to us after an EKG at baptist showed AFib with right BBB. His EKG today is sinus rhythm but still showing a RBBB. He has no symptoms related to this. EKG was done preop and anesthesia canceled case and sent him to me. He had a stre; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Whiddon is here today as a new pt referred by Dr. Chambliss with chest pains. He presented to the ER with left anterior chest pain that radiated to his left arm. He also noted his heart "pounding" hard. Denies any shortness of breath, dizziness or syn; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mrs young is a 51 year old white female here as a New patient with no known hx of cad. She has hx of hypertension, hyperlipidemia, diabetes and anxiety. She reports having sharp chest pains with rest or exertion radiating through to her back causing left ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient is being evaluated for hx of hypertension and suspected coronary artery disease. Pt complains of chest pain and dyspnea.; There has not been any treatment or conservative therapy.; chest pain; sob

Mrs. Knight is here today referred by Dr. Ked Davis with an abnormal EKG. She states having shortness of breath occasionally.; Need Nuclear stress test to evaluate ischemia.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mrs. Pagan is here today as a new pt referred by APN J P Mobley with a family history of heart disease. A couple months ago she went through a spell where her heart felt irregular & she would get short of breath. She states feeling fine lately.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mrs. Perritt is here today as a new pt referred by Dr. Ked Davis with fatigue & dizziness. She's also having dizziness & left shoulder pain that's going up into her neck.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mrs. Thompson is here today as a new pt referred by APN Andy Guinn with irregular heart rate, shortness of breath, & high blood pressure.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Mrs. Turner is here today as a new pt referred by APN Leeann Glidwell with chest heaviness & shortness of breath. Vital Signs; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Ms. Barham is self-referred for evaluation of cardiovascular risk in setting of multiple cardiac risk factors. Her mom (Martha Henry, also my patient) just underwent CABG. She has had occasional episodes of chest pain provoked primarily by anxiety and rel; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Ms. Eddington is self referred for severe substernal chest pain that radiates up and around her neck causing the left arm to go numb and at times has occurred in the right arm. Has had 3 episodes over the last week and the last episode lasted about 7min. ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Ms. Elliott was referred by Dr. Dietzen for evaluation of chest pain and shortness of breath. She describes a sharp, stabbing substernal chest pain, lasts for 1-2 minutes and resolves spontaneously, occurs at rest and also with minimal exertion, associate; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Ms. Morder is referred by Dr. Cobb for cardiac evaluation related to strong family history of heart disease and exertional dyspnea. Dyspnea with strenuous activity, improves with rest, with no associated chest pain or discomfort. Rare episodes of brief pal; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Ms. Williams is here to establish care. She was seeing Dr. Sharma in El Dorado but he is no longer practicing in the state. She has known ASHD with stent to the RCA. She also has a history of right renal artery stenosis. She is having some left-sided chest; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

n/a; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

New patient 3 weeks history chest pains, mid precordium, episodes last one minute usually, at times radiating left arm, associated with dyspnea, one episode at rest, associated chest pressure, usually at rest, episodes 2 times a week....had episode sweat; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient left precordial chest pains, last 2 years, getting worse and more frequent, and radiating left arm , daily rest episodes last 8 days, episodes last 10 minutes, associates dyspnea, associated COPD and he is smoker, 1-2 packs a day...leg and hip; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient referred Dr Barnett with chest pain chest last one month, left precordial, usually one minute duration, pinprick pain, no radiation, not associated dyspnea, a few episodes a week, not related exercise....at times chest tightness....with anxiet; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient referred DR Fox, multiple risk factors CAD, no angina, at times dyspnea with exertion, discussed diet carbs low glycemic index....no syncope,,cant run..need stress test.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

New patient referred DR Fox, she has dyspnea with exertion, not at rest, no associated syncope.....has COPD still smokes...at times mild left sided atypical chest pain, episodes are short , no radiation, and not related exercise, has abdominal pain..has h; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

New patient referred preop clearance Dr Samuel Moore orthopedics, has CAD and had AMI and coronary stent 1999 at UAMS., no angina, no dyspnea daily activities, no syncope....ex smoker in 2001.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient with CAD had circumflex stent 3,0-18 mm 2012.....no angina...no dyspnea.....has back pains, limited on pain medication.....smokes on Saturdays....; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient....referred Dr Baskin preop clearance, abnormal ECG....no angina ...no dyspnea.....EKG shows septal MI.; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

NO; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

None; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

none; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

None; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Now 3 years post LAD stent. Has some RCA dz. on medical rx. Returns feeling well with no CP or SOB. Some wt. gain. Not exercising that much. No leg swelling. No palp. or syncope. Last A1c was 9.0. Dr. Ulmer follows this and lipids. Due to have colonoscopy; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Obesity; not able to get on treadmill; palpitations and SOB; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Palpitations- symptoms haven't change since last visit. Also, dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

PALPITATIONS; DIABETES MELLITUS ; HYPERTENSION ESSENTIAL;
CHEST PAIN; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Past Medical History ; Medical history ; Cardiac: hyperlipidema. ;
; Family history ; Coronary Artery Disease. ; Hypertension.
; Diabetes Mellitus.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has ESRD with dependence on renal dialysis. Her EKG shows a possible anterior myocardial infarction. NYHA II for chronic systolic CHF-patient has mild exertional symptoms. She appears to be euvolemic.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient also has Bradycardia, unspecified.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Patient coming in with Chest discomfort. Been having his chest discomfort over the last one year. Last episode around a week ago was more severe in intensity localized in the mid aspect of the chest, and radiating to the right upper back. She has RBBB, ; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient had an abnormal carotid UA in 2014 w/50% blockage.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

patient has a abnormal EKG shortness of breath with palpitations, and syncope; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has a past history of premature beats. His TMST 4 years ago was negative. He has a commercial pilots license and want to make sure his heart is OK to fly. The PACs occur with stress and caffiene intake. He needs a cardiac clearance for possible kn; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has chest pain, family history of heart disease, and hyperlipidemia. She is also a former smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has COPD, history of seizures and strong family history of heart disease. Chest pains that diffuse across the chest, shortness of breath with pains, this is not with exerting.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has family history of heart disease. Suspected CAD.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has H/o Coronary Artery Disease status post Stent placement to Left anterior descending and obtuse marginal in 8/2014.; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has had an abnormal ECG and a regular stress test may give a false positive. Doctor is requesting a nuclear stress test.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

patient has had back surgery and neck surgery, therefore member is not able to get on treadmill, abnormal EKG, cardiac murmur; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Patient has had hip replacement surgery and has a moderate activity level. Exercise includes cycling and she exercises 3-4 times per week.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient has had surgery and is unable to get onto a treadmill and pt is obese. Pt has had an abnormal EKG.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has heart disease.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has history of CAD, hypertension, hyperlipidemia as well as obesity. In 2013 lateral wall myocardial infarction. Emergency cauterization, drug alluding stent. No complaints of chest pain/angina. Patient is feeling well; follow up.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has history of minor CVA in the past. On 9/30/15 she had inability to raise the arms. EKG on 9-29-15 shows Sinus Rhythm w/ minor T-wave abnormality.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient has hypertension and diabetes. Cardiac bypass surgery in 2014.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; A study not listed has been completed.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

patient has known anomalous RC origin from the superior aspect of the left coronary cusp at the level of proximal pulmonary artery and hypertension; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has known CAD and experiencing chest pain; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has recently been diagnosed with diverticulitis with GI bleeding. Patient is also diabetic; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient is a heavy tobacco smoker.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient is also complaining of palpitations with his chest pain and Dyspnea.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient is having increased shortness of breath and has had dizziness.; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient is in a wheelchair, obese and can not walk; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient is seen today for a routine follow up. He Continues to have a left-sided chest pain with shortness of breath. He has also had progressive fatigue We went down the pathway looking for sleep apnea which he had a mild case and a CPAP trial was attempt; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient is unable to walk on treadmill has arthritis and fibromyalgia, this for pre-op evaluatiojn; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Patient needing surgical clearance for right hip replacement due to degenerative joint disease. She has a history of Tctopic atrial tachycardia, dizziness and giddiness and hypertension.; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; It is not known if the patient had a recent stress echocardiogram.; It is not known if the patient had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient presented with complaints of intermittent chest pain that occurs mostly when she is lying down. She states that this happens when she turns at her waist.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

patient referred for palpitations. Reports racing palpitations for the past 3 months associated with dizziness and chest tightness. She had 1 syncopal episode in November when she was eating dinner and became dizzy then passed out. She also c/o shortness ; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient was diagnosed with Chronic CAD on 10/31/2014. Patient also has Diabetes.; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

patient was in the hospital having shortness of breath; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient was made to have a stress echocardiogram and was unable to complete this exam so the lexiscan stress test is recommended.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Patient weighs 298 lbs and abnormal EKG. She was also told she has a cardiomegaly on her chest x-ray. She has occasional dizziness as well.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

patient with abnormal EKG, shortness of breath, palpitations, obese; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient with Known CAD S/P PTCA, Low back pain unable to exercise on the treadmill. HTN; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient's Chest CT on 10/27/2015 shows mild coronary artery calcification of the native vessels. Risk factors include Hypertension and family history of CAD.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient's experiencing chest pressure; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Physician Noted episode of class 4 chest pain, started in left arm into chest 2 weeks ago. Pt has uncontrolled hypertension, BP 172/120; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Physician would like to rule out ischemia. Patient has not found any means of avoiding or resolving symptoms until they do so spontaneously. Occasionally palpitations subside but patient remains with pressure-like chest pain for 2-3 minutes more. Ultimately; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

post surgery; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

presented to ER, mi was ruled out and referred to them for chest pains.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pressure, irregular heartbeat, diabetic with hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Prior history of edema, episodes of severe mid precordial sharp chest pain with no associated symptoms and resolves spontaneously and nothing could do to prevent or resolve symptoms.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt came in for a pacemaker evaluation on 11.30.15. Stored electrogram showed multiple high ventricular episodes. Unfortunately the detection criteria was not turned on to detect the atrioventricular. We need the stress test to make sure no signif; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt can not gert on treadmill, anemic, abnormal EKG.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

pt had holter monitor that shows some Ventricular tachycardia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Pt has abn EKG; active smoke, asthma, shortness of breath on exertion; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt has Cardiomegaly with EXTREAM shortness of breath. cannot complete excersize stress test, Abnormal ECG, Abnormal Pulmonary function test, Hperlipedemia,; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt has known CAD and new onset of chest pain, Ventricular tachycardia,Cardiomyopathy,Mixed hyperlipidemia,Type 2 diabetes mellitus without complication,Essential hypertension,S/P implantation of automatic cardioverter/defibrillator (AICD); This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

PT HAVING CP AND DSYRNA; HX OF CVA.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt is having chest pain and shortness of breath.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt is having chest pain associated with exertion. Dr is trying to r/O CAD. Pt has family hx of CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

pt is having chest pain with dyspnea with any type of exertion. she does have a very strong family hx of early death of family members due to CAD. she is morbid obese, has HTN and is a smoker.; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

PVD; HTN; DM II without Complication; Obstructive Sleep Apnea; Morbid Obesity; Peripheral Venous Insufficiency ; RBBB; Fatigue; Discolored feet and legs; High blood pressure; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

R/O arrhythmia at etiology due to risk factors and progressive nature of symptoms.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

R/O CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

recent hospital stay with n/v, chest pain, & elevated HR. Currently SOB, fatigue, & palpitations. hx of aortic root repair; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

reports chest pain with exertion sometimes relieved with rest pt complaining of chest discomforts; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Rhythm is irregularly irregular consistent with atrial fibrillation.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

right bundle block, strong family history for CAD 2 episodes of chest pain at rest and a former smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

rule out CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

she complains of chest pains onset about a few months ago, described as a burning anterior chest pain which is brought on by exertion and relieved with rest. CP variable in intensity and duration. HR noted to be slow at times. Associated symptoms include S; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

She has had recent burning chest pain in the substernal area of varying intensity and duration. She also noted numbness in the left arm with tightness in the shoulders.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

she has PMI/CDA/Hypertension; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

shortness of breath , dizziness; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Shortness of breath; Edema of lower leg; Chest pressure recurrent; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

shortness of breath, chest pain (nausea , vomiting) , dizziness and early T-wave on EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Shortness of breath; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

String family HX of heart attack; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Stroke 2009 and 2010; Angina (413.9): new onset with abnormal ECG; pressure in the chest and arm on 8-23-2015 and I was in JRMC and three NTG tablets helped; PULM I am SOB with some ADL; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

substernal chest pain exertionally; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

Supraventricular tachycardia: PSVT history; Palpitations; Other chest pain: Chest pain/angina; Shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Swelling in the legs, Shortness of Breadth.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Syncope. He was seen for having syncopal episode. He has had a carotid duplex which was negative. He had episode of sinus Tachycardia but no evidence of any atrioventricular block. He has been having dyspnea on exertion. Anytime he walks on a flat surface; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The cardiologist has changed her prescriptions on 11 medications, stopping 7 meds and starting her on 3 new meds and changing dosage on one other.; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient has a family history of CAD. She has not had a previous cardiac workup. She has been having some episodes of increase palpitation and some chest pain. The chest pain often comes without the palpitations. She is only taking one sotalol per day.; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is a white female who has tachycardia. The tachycardia is better but has had near syncope. She has had increased swelling over than last month. She has chest pain at rest and with activity. She is limited by back pain and can walk 3 blocks; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is having episodes of chest discomfort and chest heaviness. It is a relatively typical angina that he describes. His 12 lead electrocardiogram from the emergency room when he presented with chest discomfort is within normal limits. At this time; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has diabetes.

The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.

The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient has congestive heart failure.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested to evaluate a suspected cardiac mass.

This patient came to establish cardiac care, The patient has a strong FH of heart disease and has been having chest pains with shortness of breath for 2 weeks.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

This study is being ordered as a pre-operative evaluation.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise. to rule out CAD; abnormal EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

To rule out ischemia, patient has shortness of breath and ECG was abnormal shows NSR non-specific st changes; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

tobacco use and alcohol use; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

unknown; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

unknown; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Unknown; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

Uses tobacco, hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

will fax in; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Cardiac-imaging PET scan.; This study is being ordered to identify a myocardial perfusion defect.; This patient has NOT had a SPECT scan within the past eight (8) weeks.; No, the patient does not have symptoms including chest tightness, angina and/or shortness of breath on exertion.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Cardiac-imaging PET scan.; This study is being ordered to identify a myocardial perfusion defect.; This patient has NOT had a SPECT scan within the past eight (8) weeks.; Yes, the patient has symptoms including chest tightness, angina and/or shortness of breath on exertion.; The patient does NOT have a body Mass List score index equal to or above 40.

This is a request for a Cardiac-imaging PET scan.; This study is being ordered to identify a myocardial perfusion defect.; This patient has NOT had a SPECT scan within the past eight (8) weeks.; Yes, the patient has symptoms including chest tightness, angina and/or shortness of breath on exertion.; The patient has a body Mass List score index equal to or above 40.

This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; It is not known if the patient has been recently diagnosed with and/or treated for congestive heart failure.; It is not known if the patient is presenting new cardiac signs or symptoms.; < Enter answer here - or Type In Unknown If No Info Given. >

This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are documented clinical findings consistent with hypertension.; Patient had a heart cath and her EF at that time was 25-30%. Patient is currently wearing a Life Vest and needs to be reevaluated.

This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; It is not known if there are EKG findings consistent with cardiomyopathy or myocarditis.; There are no stress echocardiogram findings consistent with cardiomyopathy or myocarditis.; It is not known if there are abnormal lab findings consistent with cardiomyopathy or myocarditis.; PT HAS HAD A TRANSTHORACIC ECHO-ABNORMAL.  LEFT HEART CATHETERIZATION  No angiographic evidence of significant obstructive atherosclerotic CAD, LVEF: 30%, severe global hypokinesis, LVEDP: 15 mmHg, elevated, Normal pulmonary artery pressure, PAP: 32/

This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; There are EKG findings consistent with cardiomyopathy or myocarditis.;

This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; There are EKG findings consistent with cardiomyopathy or myocarditis.; tachycardic-induced cardiomyopathy < Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 year ago; There has not been any treatment or conservative therapy.; Sob on exertion, chest pain

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has not been any treatment or conservative therapy.; weakness with minimal exertion, chest pain worse with exertion, shortness of breath with the pains.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; over a month; There has not been any treatment or conservative therapy.; bilateral LE edema, pcp gave Lasix but nothing is helping.

; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;

Chest pain with and without exertion. He will start running a fever and then will have chest pain associated with SOB; This study is being ordered for Vascular Disease.; Unknown; There has not been any treatment or conservative therapy.; Chest Pain with and without exertion. He will start running a fever and then will have chest pain associated with SOB

diabetic with hyperlipidemia; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; six weeks ago; It is not known if there has been any treatment or conservative therapy.; chest pain on exertion, relieved by rest, precordial with dyspnea.

Mr Rodrigues is a very pleasant 37year old gentleman, here today from Sherwood urgent care as a work in d/t being awakened with chest pain/pressure at 4:00am. Patient states he woke up at 2:00am sweating, no chest pain, walked around for a bit, went back ; This study is being ordered for Vascular Disease.; Mr Rodrigues is a very pleasant 37year old gentleman, here today from Sherwood urgent care as a work in d/t being awakened with chest pain/pressure at 4:00am. Patient states he woke up at 2:00am sweating, no chest pain, walked around for a bit, went back ; There has not been any treatment or conservative therapy.; Mr Rodrigues is a very pleasant 37year old gentleman, here today from Sherwood urgent care as a work in d/t being awakened with chest pain/pressure at 4:00am. Patient states he woke up at 2:00am sweating, no chest pain, walked around for a bit, went back

New patient referred DR Gustavus with abnormal ECG...had 2 recent admission hospital, palpitations episodes...2 hours episodes, admitted Baptist North, not associated dyspnea or chest pain, felt dizzy....associated limb pains and shooting pains....and con; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/04/15; It is not known if there has been any treatment or conservative therapy.; New patient referred DR Gustavus with abnormal ECG...had 2 recent admission hospital, palpitations episodes...2 hours episodes, admitted Baptist North, not associated dyspnea or chest pain, felt dizzy....associated limb pains and shooting pains....and con
Peripheral Edema, Hypertension, Dyspnea on Exertion, and Reactive Airway Disease.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; N/A; It is not known if there has been any treatment or conservative therapy.; Peripheral Edema, Hypertension, Dyspnea on Exertion, and Reactive Airway Disease.&#xOD; &#xOD; swelling, elevated blood pressure, Short of breath

Pt has a hx of Marfans with new onset of CP, syncope, and dizziness. Need to rule out aortic dissection.; This study is being ordered for Congenital Anomaly.; 10/15/15; It is not known if there has been any treatment or conservative therapy.; Chest pain, dizziness, syncope

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has an enlarged heart; The patient's enlarged heart is not due to any of the listed indications

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; This is for the initial evaluation of a pericardial disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a cardiac mass.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; This is for the initial evaluation of a cardiac mass.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; It is unknown if there been a change in clinical status since the last echocardiogram.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has NOT been a change in clinical status since the last echocardiogram.; It is unknown if this request is for initial evaluation of a murmur.; This is a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has NOT been a change in clinical status since the last echocardiogram.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are NOT clinical symptoms supporting a suspicion of structural heart disease.; This is a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 24 months or more since the last echocardiogram.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; It is unknown if there is a change in the patient's cardiac symptoms.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for symptoms of a heart problem. VASCULAR DISEASE with Chest pain, Leg Pain with PVD, known CAD with stents and Dyspnea with exertion.; This study is being ordered for Vascular Disease.; 07/22/2015; There has been treatment or conservative therapy.; Chest pain, Leg Pain with PVD, known CAD with stents and Dyspnea with exertion.; Medication therapy and physical therapy pt not getting better and has chest pain and SOB and is progressively getting worse.

Pt here to discuss further treatment for aortic stenosis. She saw Dr. Nolen on 11/19 and would like to review. Her evaluation with Dr. Nolan demonstrated that she had a porcelain the order. It was very hesitant to commit her to a surgical replacement when; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac device or completed NON diagnostic TTE.

This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.

This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of persistent fever in a patient with any intracardiac devise (artificial valve, pacemaker, ASD closure device etc).

This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of suspected acute aortic pathology such as aneurysm or dissection.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

; This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;

; This study is being ordered for Vascular Disease.; Thoracic Aortic aneurysm without rupture, SVT post ablation.; There has been treatment or conservative therapy.;

Ms Reed is a very pleasant 59yo lady with significant history of HLD, presents from Dr. Lea's office for evaluation of palpitations and syncope. She reports that she recently had one episode of nighttime palpitations with associated substernal chest pain,; This study is being ordered for Vascular Disease.; Ms Reed is a very pleasant 59yo lady with significant history of HLD, presents from Dr. Lea's office for evaluation of palpitations and syncope. She reports that she recently had one episode of nighttime palpitations with associated substernal chest pain,; It is not known if there has been any treatment or conservative therapy.; Ms Reed is a very pleasant 59yo lady with significant history of HLD, presents from Dr. Lea's office for evaluation of palpitations and syncope. She reports that she recently had one episode of nighttime palpitations with associated substernal chest pain,

This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

Radiology Services Denied Not Medically Necessary

Aneurysm: Jugular venous aneurysm. Radiculopathy of cervical region: Of radial nerves bilaterally. Peripheral vascular disease, unspecified: PAD bilateral SFA 90% (+). Arteriosclerosis of native arteries of extremity w/ rest pain Nonrheumatic aorti; This study is being ordered for Vascular Disease.; 9/15/2015; There has been treatment or conservative therapy.; shortness of breath, chest pain, dizziness, and right arm paralysis transient.; Carotid Doppler showed right jugular vein 2.70 cm, will further evaluate. Patient instructed to continue current medical therapy until further evaluation.

Radiology Services Denied Not Medically Necessary

Aneurysm: Jugular venous aneurysm. Radiculopathy of cervical region: Of radial nerves bilaterally. Peripheral vascular disease, unspecified: PAD bilateral SFA 90% (+). Arteriosclerosis of native arteries of extremity w/ rest pain Nonrheumatic aorti; This study is being ordered for Vascular Disease.; 9/15/2015; There has been treatment or conservative therapy.; shortness of breath, chest pain, dizziness, and right arm paralysis transient.; Carotid Doppler showed right jugular vein 2.70 cm, will further evaluate. none; This study is being ordered for Vascular Disease.; unknown; There has not been any treatment or conservative therapy.; chest pain

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

rule out MS and rule out Pathology; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; headache numbness face upper and lower extremities serve pain; medicine; blood work

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

visual changes and objects moving within the field of view (floaters). MRI of brain for acute loss of vision on left eye. vision changes. some floaters . would move with his eye. lasted about 5 hours . has not happened in one week. decreased vision on l; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >

Candidate for epidural injections; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in the right upper extremities; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

r/o extrusion; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness-limited use in the l arm; unable to work due to numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Neurological deficits; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Unknown; This study is being ordered for a neurological disorder.; September 2015; There has been treatment or conservative therapy.; Back pain radiating down right arm resulting in numbness and weakness in right arm.; Patient has had acupuncture, physical therapy and chiropractic care.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

Unknown; This study is being ordered for a neurological disorder.; September 2015; There has been treatment or conservative therapy.; Back pain radiating down right arm resulting in numbness and weakness in right arm.; Patient has had acupuncture, physical therapy and chiropractic care.

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Been in everyday since 10/30/2015; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

chiro care for 4 wks-- not getting better; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
patient had 2 wrecks and MDO has treated patient twice; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

Musculoskeletal:: Motor Strength and Tone: normal and normal tone. Joints, Bones, and Muscles: no contractures or bony abnormalities and limited ROM (decreased ROM with flexion and extension of the left wrist) and tenderness (lateral left hand and distal ; This study is being ordered for trauma or injury.; 10/30/15; There has been treatment or conservative therapy.; pain and swelling; OTC anti-inflammatories, wrist splint

Musculoskeletal:: Motor Strength and Tone: normal and normal tone. Joints, Bones, and Muscles: no contractures or bony abnormalities and limited ROM (decreased ROM with flexion and extension of the left wrist) and tenderness (lateral left hand and distal ; This study is being ordered for trauma or injury.; 10/30/15; There has been treatment or conservative therapy.; pain and swelling; OTC anti-inflammatories, wrist splint

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; clinicals bypassed

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

To rule out cartilage tears, bone tumors, ligament or tendon tears and infection.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; severe pain and inflammation; Chiropractic and Physical Therapy

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/2/2015; There has been treatment or conservative therapy.; WEAKNESS IN BOTH KNEES; PT 2 TIMES A WEEKS & INJECTIONS

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

History of liver abscess, alcoholism. Pain in right mid to low abdomen.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

ONGOING MINDGRANGES HEACHECHE; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and neck pain, radiculopathy; pain medication, NSAIDs, back surgery 41 years ago

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain, radiculopathy; physical therapy, pain medications, muscle relaxers, NSAIDs

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDS, pain medication

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, physical therapy

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, muscle relaxers, NSAIDs

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; physical therapy, pain medication, NSAIDs

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; gradually over time; There has not been any treatment or conservative therapy.; neck and back pain

Ordering studies to determine tremor vs poss focal dystonia; This study is being ordered for a neurological disorder.; 4/2015; There has not been any treatment or conservative therapy.; Patient has shaking in both hands neck and right arm pain mildly radiates

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; &Enter Additional Clinical Information> No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.;

weakness and swelling; This study is being ordered for trauma or injury.; 10/12/15;
There has been treatment or conservative therapy.; decrease ROM, numbness and
tingling down extremities and severe pain; PT 3x a week for 4 weeks, medications,
muscle relaxers and is getting worse

; This study is being ordered for a neurological disorder.; gradually over time; There
has been treatment or conservative therapy.; neck and mid back pain; physical
therapy, pain medication, NSAIDs

; This study is being ordered for something other than: known trauma or injury,
metastatic disease, a neurological disorder, inflammatory or infectious disease,
congenital anomaly, or vascular disease.; ; There has been treatment or conservative
therapy.;

; This study is being ordered for something other than: known trauma or injury,
metastatic disease, a neurological disorder, inflammatory or infectious disease,
congenital anomaly, or vascular disease.; gradually over time; There has been
treatment or conservative therapy.; neck and mid back pain; pain medication, muscle
relaxer, NSAIDs

; This study is being ordered for trauma or injury.; ; There has been treatment or
conservative therapy.;

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.;
The study is being ordered due to chronic back pain or suspected degenerative
disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.;
The study is being ordered due to chronic back pain or suspected degenerative
disease.; The patient is experiencing or presenting symptoms of recent fracture on
previous imaging studies.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; ; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Injection and PT are not effective; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 06/14/2015; There has been treatment or conservative therapy.; decreased range of motion, pain, numbness and tingling, muscle spasms. SI Joint dysfunction.; 12 weeks PT, medication, and time off from work. ; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and bilateral knee pain; pain medication, NSAIDs

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and neck pain, radiculopathy; pain medication, NSAIDs, back surgery 41 years ago

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain, radiculopathy; physical therapy, pain medications, muscle relaxers, NSAIDs

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDS, pain medication

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, physical therapy

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, muscle relaxers, NSAIDs

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; gradually over time; There has not been any treatment or conservative therapy.; neck and back pain

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

Continued pain after conservative treatment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/10/2015; There has been treatment or conservative therapy.; Radiating pain into arms and legs.; Anti-inflammatories, PT, rest and activity modification.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Neurological deficits; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8 years ago; There has been treatment or conservative therapy.; back and hip/pelvis pain; pain medication, muscle relaxers, NSAIDs

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 9/2/2012; There has been treatment or conservative therapy.; mbr has numbness, tingling, decreased range of motion and spasms; medication and PT plus time off work

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

weakness and swelling; This study is being ordered for trauma or injury.; 10/12/15; There has been treatment or conservative therapy.; decrease ROM, numbness and tingling down extremities and severe pain; PT 3x a week for 4 weeks, medications, muscle relaxers and is getting worse

; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and bilateral knee pain; pain medication, NSAIDs

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

; This study is being ordered for a neurological disorder.; 01/01/2005; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, chiropractor

Radiology Services Denied Not Medically Necessary

; This study is being ordered for a neurological disorder.; 01/01/2010; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs

Radiology Services Denied Not Medically Necessary

; This study is being ordered for a neurological disorder.; 01/01/2014; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs

Radiology Services Denied Not Medically Necessary

; This study is being ordered for a neurological disorder.; 08/01/2015; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs

Radiology Services Denied Not Medically Necessary

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.
family HISTORY OF MIGRAINES AND BRAIN TUMORS; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

None; This study is being ordered for trauma or injury.; 11-28-15; There has not been any treatment or conservative therapy.; Dizziness, headache, cervical spine tenderness.

This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.
This is a request for a brain/head CT.; The study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.
This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

WORST HEADACHE OF PATIENT LIFE BLURRY/GLAZY VISION; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is suspicion of bone infection, [osteomyelitis].fct"

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.

< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient is experiencing dizziness.

; This study is being ordered for trauma or injury.; Enter date of initial onset here -   03/18/2015; There has been treatment or conservative therapy.; ;

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

PATIENT HAS COUGH FEVER FOR THREE CHEST XRAY SHOWS ABNORMAL WITH CT RECOMMENDED FOR FURTHER EVAL; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Pt has wheezing, reported 25 pounds weight loss in past four months, and cough.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pain in chest while breathing and when he coughs; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;

None; This study is being ordered for trauma or injury.; 11-28-15; There has not been any treatment or conservative therapy.; Dizziness, headache, cervical spine tenderness.

patient was in an mva on 09/30/15. they have neck pain; It is not known if the patient has any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot have a Cervical Spine MRI.

pt involved in MVA; pt has had x-ray that were abnormal; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;;

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

; This study is being ordered for trauma or injury.; Enter date of initial onset here -   03/18/2015; There has been treatment or conservative therapy.;;

tenderness and pain around L3 , THINK HE MAY have possible Transverse Myelitis or DISCITIS; This study is being ordered for a neurological disorder.; 9/27/2015; There has not been any treatment or conservative therapy.; numbness and tingling from his feet to his waste  both hands and fingers are numb

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

tenderness and pain around L3 , THINK HE MAY have possible Transverse Myelitis or DISCITIS; This study is being ordered for a neurological disorder.; 9/27/2015; There has not been any treatment or conservative therapy.; numbness and tingling from his feet to his waste  both hands and fingers are numb

tenderness and pain around L3 , THINK HE MAY have possible Transverse Myelitis or DISCITIS; This study is being ordered for a neurological disorder.; 9/27/2015; There has not been any treatment or conservative therapy.; numbness and tingling from his feet to his waste  both hands and fingers are numb

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month;
Other

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; abd pain,

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were abnormal.

; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is not know

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

Radiology Services Denied Not Medically Necessary

ophthalmologist wants her to have a ct exam; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

Radiology Services Denied Not Medically Necessary

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.

Radiology Services Denied Not Medically Necessary

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.

Radiology Services Denied Not Medically Necessary

; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; <Enter Additional Clinical Information>; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >

Radiology Services Denied Not Medically Necessary

acute back pain w/ radiates down into right leg and buttocks; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient hurt back 3 weeks ago and his back pain is worsening; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

patient is having pain in the lower back and right hip; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Radiology Services Denied Not Medically Necessary

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; patient has had shoulder pain for 8 days. also has limited range of motion and swelling

Radiology Services Denied Not Medically Necessary

; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; Yes, the member experience a painful popping, snapping, or giving away of the knee.

Radiology Services Denied Not Medically Necessary

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

Radiology Services Denied Not Medically Necessary

(903) 614-2283; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Radiology Services Denied Not Medically Necessary

; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; The study is requested for known or suspected brain tumor, mass or cancer.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for post-operative evaluation.

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

has a pituitary adenoma; h/a and blacking out; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient diagnosed pituitary (2.6 cm) worsening headaches and blurred vision.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient has cancer to the bone and his brain !; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.

testicular hypofunction.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

possible adreanal carcinoma,; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.

possible adreanal carcinoma;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for Parathyroid SPECT imaging.; Hypercalcemia

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging sstudy, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Thyroid Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Head/Neck Cancer.; The patient has Thyroid cancer.; This would be the first PET Scan performed on this patient for this cancer.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Radiology Services Denied Not Medically Necessary

Maria Roberts is a 56 year old African American female of low titer positive rheumatoid arthritis, constipation, and diabetes (managed with life style) who presents to clinic for evaluation of hypercalcemia.  Patient presents for history of hypercalcemi; This is a request for neck soft tissue CT.; Surgery is NOT scheduled within the next 30 days.; The patient has a suspicious infection or abscess.

Radiology Services Denied Not Medically Necessary

found on exam; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is unknown if the patient has new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.

Radiology Services Denied Not Medically Necessary

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>

"This request is for face, jaw, mandible CT.239.8"; "There is a history of serious facial bone or skull, trauma or injury.fct"

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

Patient continues to have dysphagia after an extensive work up including an EGD, CT soft tissue neck, swallow study, thyroid ultrasound, and an xray of her esophagus. All of which came back normal. Her TMJ specialists is recommending we get an MRI TMJ and; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; July 2015; It is not known if there has been any treatment or conservative therapy.; Pharyngeal phase dysphagia/ Nausea

Biopsy positive for adenocarcinoma of the stomach on EGD, further evaluation for metastatic disease and staging.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

collagenous colitis, colon polyps,; This study is being ordered for Inflammatory/ Infectious Disease.; 09/01/2015; There has been treatment or conservative therapy.; bloody diarrhea black tar stools; steroids, nsaid, advil, Colonoscopy

Patient has been experiencing severe chest pain that occurs constantly. Patient also admits to a history with the diagnosis of pleurisy as well. The goal is to rule out any infection or disease.; There is no radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.

Pt has colon cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

To reassess the liver and the prior pulmonary nodule.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Abdominal Discomfort

History of abdominal CT 10/15/15 that was unremarkable; At the time of CT scan, he was having left side pain after lifting a box; Pain persisted and he went to the ED in October with same pain; CT AP performed then; Reports that he doesnt have the urge; This study is being ordered for Inflammatory/ Infectious Disease.; 09/08/2015; There has been treatment or conservative therapy.; LOWER ABDOMINAL PAIN AND CONSTIPATION; HAD CT ABD 10/15/15 THAT WAS UNREMARKABLE, WENT TO ED IN OCTOBER WITH SAME PAIN, HX OF DIVERTICULOSIS PER COLONOSCOPY RESULTS, MEDS

History of abdominal CT 10/15/15 that was unremarkable; At the time of CT scan, he was having left side pain after lifting a box; Pain persisted and he went to the ED in October with same pain; CT AP performed then; Reports that he doesn't have the urge; This study is being ordered for Inflammatory/ Infectious Disease.; 09/08/2015; There has been treatment or conservative therapy.; LOWER ABDOMINAL PAIN AND CONSTIPATION; HAD CT ABD 10/15/15 THAT WAS UNREMARKABLE, WENT TO ED IN OCTOBER WITH SAME PAIN, HX OF DIVERTICULOSIS PER COLONOSCOPY RESULTS, MEDS

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; unknown/first visit with this provider; It is not known if there has been any treatment or conservative therapy.; unknown

History of abdominal CT 10/15/15 that was unremarkable; At the time of CT scan, he was having left side pain after lifting a box; Pain persisted and he went to the ED in October with same pain; CT AP performed then; Reports that he doesn't have the urge; This study is being ordered for Inflammatory/ Infectious Disease.; 09/08/2015; There has been treatment or conservative therapy.; LOWER ABDOMINAL PAIN AND CONSTIPATION; HAD CT ABD 10/15/15 THAT WAS UNREMARKABLE, WENT TO ED IN OCTOBER WITH SAME PAIN, HX OF DIVERTICULOSIS PER COLONOSCOPY RESULTS, MEDS

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Abd pain elevated liver enzymes ultrasound; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Abdomen CT triple phase being ordered to evaluate liver that was found to have a suspicious mass on ultrasound. Patient has a history of Hep C.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

Biopsy positive for adenocarcinoma of the stomach on EGD, further evaluation for metastatic disease and staging.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

COLITIS AND ADOMINAL PAIN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Elevated liver enzymes; Elevated liver enzymes with several risk factors to develop NASH/CASH including obesity, hypertension, undiagnosed dyslipidemia and also drug induced liver injury associated to tamoxifen. Regarding Tamoxifen therapy has been linked; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, ; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, ; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Pt had an abnormal CT, adenoma/left adrenal gland.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, ; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, ; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Pt is having abd pain and swelling pt has hep c, dr wants to check liver for sclerosis; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, ; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, ; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Pt. is anemic. Having a GI hemorrhage. Tubular adenoma and signs of biliary obstruction found on US. 18LB weight loss in 3 mos.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, ; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, ; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Screening for HCC; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a Is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are findings that confirm hepatitis C.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.

To reassess the liver and the prior pulmonary nodule.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Abdominal Discomfort

This is a request for CT Angiography of the Abdomen and Pelvis.
Yes, this is a request for CT Angiography of the abdomen.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for ketones.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient does not have Crohn's Disease, Ulcerative Colitis or Diverticulitis.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

bloated, ruling out IBS, tender to touch; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

collagenous colitis, colon polyps;; This study is being ordered for Inflammatory/ Infectious Disease.; 09/01/2015; There has been treatment or conservative therapy.; bloody diarrhea black tar stools; steroids, nsaid, advil, Colonoscopy

Duration of Symptoms: Start: 12/01/2015   Physical Exam Findings: RUQ wall mass, tender to the touch S/P EGD and colonoscopy done 12/01/2015; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.
had a EGD that was inconclusive; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

luq and lluq pain; nausea; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

Mbr has severe abdominal pain that radiated into her legs, bloating, previous HX of Hysterectomy.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

ngoing abdominal pain for a year, chronic hepatitis C, unintentional weight loss of 15 pounds in the last, r/o gall bladder disease or gall stones; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Patient has had multiple abdominal surgeries. She has had chronic abdominal pain for several years. Possibly adhesions and scar tissue. Need CT to confirm or rule out any other abdominal condition.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; It is unknown if the patient had an Ultrasound.

patient has known Crohn's diseaseMD wants to rule out small bowel obstruction; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Pt has colon cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

pt. having severe abdominal pain, unexplained weight loss, nausea and vomiting, trying to rule out appendicitis, gall bladder or any type of diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is not known if this is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; It is not known if there is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; It is not known if there are new signs or symptoms including hematuria, presenting with known cancer or tumor.; Caller does not know if there is a known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; It is not known if there is a palpable or observed abdominal mass.; n/a

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other;

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; change in bowel habits, abdominal pain, weight loss

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; constant right lower quadrant pain, with pubic tenderness

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Constitutional: Constitutional: no night sweats and weight loss (30 lbs).    ENMT: Mouth/Throat: no sore throat or difficulty swallowing (dysphagia).    Cardiovascular: Cardiovascular: no chest pain.    Respiratory: Respiratory: no cough or sp

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; diarrhea for 9 months, lower left quad pain not relieved by bowel movements

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; gastric ulcer and pyloric ulcer and trying to see what's causing pelvic pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Has a back ground of HTN AND GERD did recent colonoscopy and EGD WITH BIOPSY which gives the appearance of portal hypertensive gastropathy; will do CT TO LOOK FOR LIVER DISEASE ANOT EXCLUDING SCLEROSIS patient is very concerned BE; for bother died of colo

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Hx of Diverticulitis abd pain diarrhea

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pain hernia

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient admits to severe abdominal pain and tenderness. Patient has a personal history of colon cancer and colon resection.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient complaining of left quad pain trying to r/o diverticulitis left lower tenderness, diarrhea

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has abdominal pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt having abd pain, change in bowel habits, nausea, vomiting, had gallbladder removed but still having symptoms; Doctor trying to r/o Colitis or IBS

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; unknown

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Unknown by caller

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; US suggested renal lesion, possible hydronephrosis, etc. Need CT to further investigate.

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; It is not known if there has been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.; patient had a pill cam and colonoscopy, patient has iron deficiency anemia

THIS PATIENT IS HAVING ABDOMINAL PAIN IN ALL 4 QUADRANTS BUT MOST PROMINENT IN THE LUQ. SHE IS ALSO HAVING A CHANGE IN BOWEL HABBIT. A COLONOSCOPY WAS PREFORMED BUT WAS NON DIAGNOSTIC.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

we saw pt for the first time 12-15-15 - she has been previously seeing her PCP for this issue who referred her to GI for further work-up; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

< Enter answer here - or Type In Unknown If No Info Given. >; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.

Melena He is here for followup. From the emergency room after presenting there with a week of melena. He was originally having 2-3 melanic stools daily but this has decreased to once every other day. He is only havin

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; MULTIPLE CT SCAN INDICATED ABNORMAL LIVER LESIONS AS WELL AS POSSIBLE HEMANGIOMA.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; patient had ultrasound of abdomen and a suspicious lesion on her liver and we need MRI of abd w/ and w/out contrast to evaluate this lesion per radiologist. Patient is having left upper quadrant pain and tenderness.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; pt recently had a CT which findings were normal. Pt continues to have an elevated CA 19-9 with abd pain and ascites and physician wants to look further to rule out suspicious mass

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Ct showed liver lesions, MRI results done 3 months ago showed 7 areas of arterial enhancements demonstrate restricted diffusion within the liver, follow up in 3 months

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; past history of ovarian cancer, R lobe of liver lesion

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; active colitis , anti tnf agent, request before they put on humara

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; HX of cirrhosis w/liver lesions

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; patient had 11/3/2015 Ct for fatty liver and left density quadrant which may represent splenic aneurysm less like pancreatic or splenic liaisons 1.5cm recommend an MRI to follow on the area.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

abd pain; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

Diagnostic. The previous study could not be completed because of torturous colon/blockage. Couldn't get the scope all the way around; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.

It is not known if this patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; This patient has not undergone an attempted but incomplete conventional colonoscopy.; This patient does not have a known obstructing colorectal cancer.; The member had colon screening studies completed prior to this request.

one was tried and an obstacle was in the way and it was not completed so this case is being ordered; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

Pt. could not complete conventional colonoscopy-heart rate dropped to 40's.; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.

This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has not undergone an attempted but incomplete conventional colonoscopy.; This patient does not have a known obstructing colorectal cancer.; The member had colon screening studies completed prior to this request.

UNKNOWN; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.
; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/09/15; There has not been any treatment or conservative therapy.;

Diagnostic to verify pancreatic stricture prior to ERCP if needed.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

n/a; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient had her gallbladder removed in years ago, but is present today with signs gallbladder disease symptoms. MRCP being ordered to check for a stone in bile duct; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient is having RUQ pain which becomes worse after eating. She has a 25 lb weight loss over the last 3 months. Has history of elevated LFT's. Had recent EGD that showed hiatal hernia and Z-line irregular otherwise normal. Also, had recent liver biopsy th; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Pt having RUQ pain - had recent US of Liver that showed dilated common bile duct; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.

Unknown; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient continues to have dysphagia after an extensive work up including an EGD, CT soft tissue neck, swallow study, thyroid ultrasound, and an xray of her esophagus. All of which came back normal. Her TMJ specialists is recommending we get an MRI TMJ and; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; July 2015; It is not known if there has been any treatment or conservative therapy.; Pharyngeal phase dysphagia/ Nausea & Enter answer here - or Type In Unknown If No Info Given. &; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

pt is having recurring hiccups and no hiatal hernia or gastric volvulus found on EGD yesterday. wanting to r/o any underlying mass; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

abnormal gait and mobility numbness and weakness on left side; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

bilateral upper extremity and facial transient paraesthesia; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Chronic headache for 12 months. Intermittent. Severe.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

dizziness x 5 years; failed meclizine; r/o bleeding vs questionable mass; can't have MRI due to metal in stomach; This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently does not have cancer.; This is not a evaluation for a bone tumor or abnormality of the skull.; The study is requested for known or suspected brain tumor, mass or cancer.

dizziness, abnormal gait; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Domestic Abuse injury; This study is being ordered for trauma or injury.; 12/18/2015; There has been treatment or conservative therapy.; Blurred Vision, Epistaxis, Left Eye Contusion, Facial Pain; tramadol for pain; amoxicillin for possible sinusitis ear pain, left sided throat sore, neck and shoulder sore, body aches; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

facial trauma hit in head w/ board; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.

given his history of atrial fib, diabetes and recent syncopeal episode I feel it necessary to run these tests to evaluate his symptoms; This study is being ordered for a neurological disorder.; 11/29/15; There has been treatment or conservative therapy.; syncope, lightheadness; diabetic patient is already on blood thinner therapy and has been for over a year

HA; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Had syncope, dizziness, passed out several times over the last week, gets real dizzy and nauseated right before she passes out.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Headache - General   Reported by patient.  Location: band around head  Quality: not the worst headache ever; similar to previous headaches  Severity: % moderate  Duration: intermittent  Onset/Timing: better over time  Associated Symptoms: no nausea; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring. known; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.
memory impairment; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

memory loss and headaches; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.
Memory loss; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

migraines; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Ms. Shockey is a 25 yo right handed lady who presents for multiple complaints. Her most concerning problems started in Januray, 2015. She was at work and went to pick up a box off of the floor and got "stuck" because her whole body "froze and locked up ; This is a request for a brain/head CT.; The study is requested for new onset of seizures or newly identified change in seizure activity or pattern.

MVA yesterday with HA since accident; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

none.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

none.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/3/2015; There has been treatment or conservative therapy.; Pt has headaches that are worsening. intense nausea and vomiting.; Medications , steroids

None; This study is being ordered for trauma or injury.; 11/04/2015; There has been treatment or conservative therapy.; syncope, visual disturbance, swelling/pulling of blood above left eye; medication and ice packs

numbness on left side and dizziness, r/o CVA; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Patient does have an indent in her forehead; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

Patient experiencing confusion; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Patient has diagnosis of breast cancer. Doctor has ordered brain CT and chest CT to rule out cancer as there is a family history.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

patient having trimmers and headaches; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Patient is suffering from increased headaches, not responding to pain meds, mostly in the back of the head for the past two weeks. Patient has had Lumbar Punctures which have had limited effect but have not removed head pain.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

patient presents for recurrent headaches last several days at a time. patient has a personal history of aneurysm.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Patient seen for evaluation of recurrent headaches. Patient indicates they are in the right temple area with blurry vision. This has been going on for several years. A lot of his headaches were thought to be related to sinusitis. While on antibiotics h; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

patient vomiting, dizziness; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Patient woke up with double vision, went to the eye doctor and noticed she was not speaking correctly. Eye doctor told her he thought she had a stroke. Weakness and fatigue, and bad headaches.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.

presents with frontal and maxillary sinus pressure/discomfort and headache. no significant drainage however symptoms completely alleviated after taking sudafed. Past sinus infections have presented without rhinorrhea. antibiotics prescribed. patient pres; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Pt had a closed head injury with HA's & nausea; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

pt has a history of high blood pressure & heart rate is racing the left side of her face is tingling will lose use of left arm; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Pt has headache also and hx of seizures; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

Pt has history of closed head injury with LOC. Pt continues to have more confusion, loss of memory, decreased concentration, insomnia, and personality changes.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Pt is complaining of filling full. Pt was diagnosed with scleroderma; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Pt is having numbness of her entire R side of her body. Facial numbness, R side of her back, R arm, R leg x 1 week; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Pt. had MVA-has been having reoccurring h/a's since then.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

rule out possibility of a brain tumor b/c of her history and the chronic continuous olfactory hallucinations not related to migraine; This study is being ordered for a neurological disorder.; 6 months ago; There has been treatment or conservative therapy.; Sinusitis, Olfactory hallucinations, Migraine, TIA, memory changes; She has taken Bactrim and was referred to ENT. ENT said that her olfactory hallucinations were from a frontal lobe issue. She has had a history of migraines that have returning recently. She had memory issues with one last week.

seizure activity; This is a request for a brain/head CT.; The study is requested for new onset of seizures or newly identified change in seizure activity or pattern.

sudden onset of symptoms post injury, symptoms slurred speech, pt stumbling, pain; This study is being ordered for trauma or injury.; 12/05/2015; There has not been any treatment or conservative therapy.; slurred speech, neck pain, headache, feeling of stumbling when walking

the patient us having headaches and memory lost; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.
This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for infection or inflammation.

This is a request for a brain/head CT.; The study is requested for history of stroke, (CVA) known or follow-up.

This is a request for a brain/head CT.; The study is requested for Hydrocephalus or congenital abnormality.

This is a request for a brain/head CT.; The study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; The study is requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently does not have cancer.; This is a evaluation for a bone tumor or abnormality of the skull.; The study is requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Tremors and shaking in the hands; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Unknown; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

unknown; This study is being ordered for trauma or injury.; 1999; There has been treatment or conservative therapy.; Headaches since fall into glass table in 1999.; Home exercise, non refilled narcotic medicine.

vision changes, dizziness; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

worse headache of the patients life; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8";
"There is not suspicion of bone infection, cholesteoma, or inflammatory disease.ostct";
"There is a history of serious head or skull, trauma or injury.ostct"

"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8";
"There is not suspicion of bone infection, cholesteoma, or inflammatory disease.ostct";
"There is not a history of serious head or skull, trauma or injury.ostct"; "There is not
suspicion of neoplasm, or metastasis.ostct"; This is not a preoperative or recent
postoperative evaluation.; "There is not suspicion of acoustic neuroma, pituitary or
other tumor. ostct"

"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8";
"There is suspicion of bone infection, cholesteoma, or inflammatory disease.ostct"

Domestic Abuse injury; This study is being ordered for trauma or injury.; 12/18/2015;
There has been treatment or conservative therapy.; Blurred Vision, Epistaxis, Left Eye
Contusion, Facial Pain; tramadol for pain; amoxicillin for possible sinusitis
None; This study is being ordered for trauma or injury.; 11/04/2015; There has been
treatment or conservative therapy.; syncope, visual disturbance, swelling/pulling of
blood above left eye; medication and ice packs

metastasis.fct"

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset AND the patient improved, then worsened

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are unknown.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; Patient is having unrelieved recurrent sinusitis.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset

; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset

; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

Having severe headaches, sinus congestion, failed medical therapies.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

Here for follow up. Had R Max Sinusitis. Treated with Levaquin. Sinus XRays sig for R Max Opacification. .; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment imaging due to injury to the face; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.

MEM ON STEROIDS; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)

none; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); The time since onset is unknown

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/3/2015; There has been treatment or conservative therapy.; Pt has headaches that are worsening. intense nausea and vomiting.; Medications , steroids

Pain in head noted. Onset was more than 12 months ago. The pain is diffuse with no specific location. She characterizes it as moderate in severity, squeezing, and Pressure, pin-point like areas.. Associated symptoms include vision disturbance (blurry vis; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

pt got hit in the face with a metal cable; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.

radiologist suggested a ct because of sinus density didn't like what he was seeing.; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

This study is being ordered for pre-operative evaluation.; This is a request for a Sinus CT.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)

unknown; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 8 days; There has been treatment or conservative therapy.; Enlarged lymph nodes, painful swallowing, rapid weightloss, trying to rule out cancer; Antibiotics

Check the size of the lump; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump got smaller.

pt night sweats, chills, dizziness, sleeping difficulties and swelling; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.

R/O tonsillar abscess; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.

SORE THROAT SHORTNESS OF BREATH AND WHEEZING CHEST PAIN NORMAL RATE BUT INCREASED EFFORT NOTED. INSP AND EXP WHEEZING DIFFUSELY AND ABLE TO HEAR IT LOUDER OVER TRACHEA AFTER NED SILL INSP WHEEZING BUT EXP WHEEZING RESOLVED; This study is being ordered for Inflammatory/ Infectious Disease.; 10-15-2015; There has been treatment or conservative therapy.; SOB WHEEZING SORE THROAT AND CHEST PAIN; NEBULIZER

This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

This is a request for neck soft tissue CT.; The study is being ordered for recent trauma or other injury.

This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

unknown; This study is being ordered for trauma or injury.; 1999; There has been treatment or conservative therapy.; Headaches since fall into glass table in 1999.; Home exercise, non refilled narcotic medicine.

we would like to see if her thyroid has gotten any bigger.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pt has been having problems with her thyroid prior to 4/22/15. pt she has gotten worse.; There has been treatment or conservative therapy.; pt has been having behavior difficulties, hair loss, and severe fatigue, difficulty swallowing; pt has been placed on thyroid medication for treatment.

will fax clinicals; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 10/13/2015; There has been treatment or conservative therapy.; headaches, facial numbness and tingling, diagnosis with the 100% blockage in the past, has a history of it; has had a constant headache for 3 weeks; been to the er, took hydrocodone, antibiotics, blood pressure medication, takes a aspirin daily, cholesterol medication

Dr wants to check for vascular etiology of headaches and dizziness; This study is being ordered for Vascular Disease.; 06/01/2015; There has been treatment or conservative therapy.; Migraines, severe dizziness; Pt sees a neurologist who put her on Relpax and Topamax which helped her headaches but she still gets off balance and has episodes of dizziness

history of CAD with stent placement  recent history of transient global amnesia 9/28/2015 request for eval of carotid arteries and intracerebral arteries negative CT/MRI of brain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/28/2015; It is not known if there has been any treatment or conservative therapy.; transient amnesia 6 hr long, presented to ER, negative head CT and MRI for any CVA/TIA

known aneurysm seen on MRI/MRA brain; need CTA brain and CTA neck for further evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; end of Oct- being of Nov; It is not known if there has been any treatment or conservative therapy.; c/o headaches/ neck pain

Yes, this is a request for CT Angiography of the brain.

Dr wants to check for vascular etiology of headaches and dizziness; This study is being ordered for Vascular Disease.; 06/01/2015; There has been treatment or conservative therapy.; Migraines, severe dizziness; Pt sees a neurologist who put her on Relpax and Topamax which helped her headaches but she still gets off balance and has episodes of dizziness

history of CAD with stent placement; recent history of transient global amnesia 9/28/2015; request for eval of carotid arteries and intracerebral arteries; negative CT/MRI of brain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/28/2015; It is not known if there has been any treatment or conservative therapy.; transient amnesia 6 hr long, presented to ER, negative head CT and MRI for any CVA/TIA

known aneurysm seen on MRI/MRA brain; need CTA brain and CTA neck for further evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; end of Oct- being of Nov; It is not known if there has been any treatment or conservative therapy.; c/o headaches/ neck pain

Yes, this is a request for CT Angiography of the Neck.

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metastasis

"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/12/2015; There has not been any treatment or conservative therapy.; neck pain

1. eye issue  The symptoms are reported as being moderate. The symptoms occur constantly. He states the symptoms are acute and have improved. Pt was seen at The Eye Center early this week following problems of blurred vision. Upon exam with dilated p; This study is being ordered for Inflammatory/ Infectious Disease.; 10/25/2015; There has not been any treatment or conservative therapy.; BLURRED VISION

Abnormal cervical spine at C5-6. Correlation of MRI of cervical spine.; "This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation

He bumped heads with someone and injured his jaw; This study is being ordered for trauma or injury.; 10/2015; There has been treatment or conservative therapy.; Jaw pain, limited range of motion, swelling and tenderness (left side of the jaw); Anti inflammatory medication

The symptoms occur constantly. Associated symptoms include: swelling, sharp/aching pain, pressure. Patient states symptoms are acute & have worsened. Patient radiates from site to right ear down right side of jaw & neck; This study is being ordered for trauma or injury.; 11/9/2015; There has been treatment or conservative therapy.; The symptoms occur constantly. Associated symptoms include: swelling, sharp/aching pain, pressure. Patient states symptoms are acute & have worsened. Patient radiates from site to right ear down right side of jaw & neck; Warm compresses as needed Take medication as prescribed Follow up with primary dentist Steroid injection given, antibiotics (AMOXICILLIN 500 mg) prescribed, hydrocodone 7.5 mg acetaminophen 325 mg tablet. Patient is compliant, has been seen the foll

unequal pupils, blurry vision with flashes of light; This study is being ordered for a neurological disorder.; 7-30-15; There has not been any treatment or conservative therapy.; vision changes, flashes of light, blurry type area in right eye and c/o sparks in her vision. anisocoria

Unknown; This study is being ordered for a neurological disorder.; 11/23/2015; There has not been any treatment or conservative therapy.; Patient is experiencing smudge like vision. Decreased vision and color, closes good eye (right) black silhouette. No pain in eye; several eye exam. Patient might have MS or optic neuritis. Eye doctor recommended the visit; visual changes.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 10/13/2015; There has been treatment or conservative therapy.; headaches, facial numbness and tingling, diagnosis with the 100% blockage in the past, has a history of it; has had a constant headache for 3 weeks; been to the er, took hydrocodone, antibiotics, blood pressure medication, takes a aspirin daily, cholesterol medication

.Ms. Beebe is a 48 yo right handed lady who presents for evaluation of a long history of headaches, dating back to 2005 as well as numbness and tingling in the RUE and RLE. The symptoms have been worsening over the last 6 months. She was diagnosed with ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Ms. Beebe is a 48 yo right handed lady who presents for evaluation of a long history of headaches, dating back to 2005 as well as numbness and tingling in the RUE and RLE. The symptoms have been worsening over the last 6 months.; There has been treatment or conservative therapy.; Ms. Beebe is a 48 yo right handed lady who presents for evaluation of a long history of headaches, dating back to 2005 as well as numbness and tingling in the RUE and RLE. ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; A metabolic work up was done including urinalysis, electrolytes and complete blood count with results completed.; The lab results were normal.; The patient is experiencing loss of smell.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing dizziness.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head was between 24 hours and 1 week ago.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

; This study is being ordered for a neurological disorder.; brain lesions appeared in MRI that was done in 2014. Numbness in hands started in March 2015.; There has been treatment or conservative therapy.; abnormal nerve conduction study showing upper motor neuron lesion causing numbness in 4th and 5th digit of R hand. Patient states it feels like pins and needles.; Patient has been on steroids. The symptoms are worsening with rapid onset.

; This study is being ordered for Inflammatory/ Infectious Disease.; May 2015; There has been treatment or conservative therapy.; muscle weakness, urinary incontinence, headache; medications

; This study is being ordered for Vascular Disease.; 10/17/15; There has been treatment or conservative therapy.; headache with exertional activity; pain med and antiinflammatory

1. eye issue  The symptoms are reported as being moderate. The symptoms occur constantly. He states the symptoms are acute and have improved. Pt was seen at The Eye Center early this week following problems of blurred vision. Upon exam with dilated p; This study is being ordered for Inflammatory/ Infectious Disease.; 10/25/2015; There has not been any treatment or conservative therapy.; BLURRED VISION

1. Musculoskeletal pain  Onset: 6 days ago. It occurs intermittently. The pain is aching. There are no aggravating factors. There are no relieving factors. Associated symptoms include joint tenderness and numbness. Pertinent negatives include diff; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are not intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

ABNORMAL EEG; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

Along with other reason listed,pt had an episode a few days prior of memory loss,where he wanted to write something down but he couldn't remember how; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Ataxia Dementia and vision loss, unable to walk; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

Chronic condition they have had for some time, take and tolerate medication without difficulty for this, dull, sharp non radiating and located in the frontal and occipital region and migraine medication has not improved this.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

CHRONIC HEADACHE WITH A FAMILY HISTORY OF BRAIN ANEURYSM; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

chronic migraines with galactorrhea; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

DX with benign pituitary that has not been checked since childhood... increased headaches and precocious puberty; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.

Elevated prolactin lab; Bilateral nipple discharge; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing fatigue or malaise.

Enter answer here - or Type In Unknown If No Info Given; . noted to have a nonrecent stroke on CT of brain; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

FOOT DROP; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Had abnormal brain MRI-radiologist suggests pt needs pituitary MRI with contrast & sequential sequences.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache.

having daily HA, sometimes for a few hours, sometimes all day long. Headache is "all over" She is worried because mother had a pituitary tumor at the age of 23. She did go to eye doctor and has ordered new glasses, was told her vision did not change much; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

head injury from falling off chair , mild concussion , headache , some memory loss; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

HEADACHE, ABNORMAL BRAIN SCAN; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

headaches over a month. trouble sleeping; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Hx of Arnold chiari malformation and new onset headaches.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

HYPO GONADISM; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are not recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; Surgery is not planned within the next 4 weeks.; It is not known if an operation for shunt placement (for brain fluid drainage) is being considered or a non-metallic shunt is not functioning correctly.; The patient has a congenital abnormality.

involuntary tremors; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Lab results are pending. Patient c/o shaking in arms and legs with episodes lasting about an hour. These episodes occur 1-2 times a month and have been going on for about a year. was unable to work last weekend due to this; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

light headed, off balance, vision change, ringing in ears, balance disorder, vertigo, weight loss, still having problems; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vertigo.; It is unknown why this study is being ordered.

looking for new lesions; This study is being ordered for a neurological disorder.; 12/28/15; There has been treatment or conservative therapy.; foot drop, parasthesia in bilateral extremities, problems swallowing; Pt has had MS for 5 years...on weekly Avonex injections

MEMORY EVALUATION DUE TO MEMORY LOSS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

metastatic colon cancer; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

migraines; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache.

MVA, recurring head from trauma to her head.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

New onset of dizziness, lightheadedness, numbness and tingling in one arm. Need MRI to evaluate for possible MS, or mass lesion, etc. Need to evaluate this as soon as possible for treatment.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

No clinicals available; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

no other info given; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/2015; There has not been any treatment or conservative therapy.; PT is experiencing Headache, visual disturbances, and Light and motion sensitivity.

none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

none; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Ocular Migraines and visual disturbances during migraines.; This study is being ordered for a neurological disorder.; Ms. Crosby is a right handed lady who presents for evaluation of multiple complaints. She has a 6-8 month history of many neurologic complaints that are progressively worsening over the last few months. The first symptoms she noticed was having difficulty; It is not known if there has been any treatment or conservative therapy.; Ms. Crosby is a right handed lady who presents for evaluation of multiple complaints. She has a 6-8 month history of many neurologic complaints that are progressively worsening over the last few months. The first symptoms she noticed was having difficulty

Pain with turning left eye; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient came to office today with complaints of left arm numbness, tingling and also complaints of dizziness. Left side of face is numb and patient is unable to lift left arm. MD requests this procedure STAT TODAY!!!! This will rule out TIA; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

Patient complaining of dizziness, been going on for 2 months, tried medications and nothing is helping.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient describes a band around her head. Severe HA that has been going on for several months. Conservative medications have not improved symptoms and previous CT was negative.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient had an abnormal CT of the head 8/27/2015 for headache and it showed High remote right parietal CVA.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient had an MRI in 2013 showing impression of very subtle area in the left cerebellum consistent with a small, enhancing meningioma that is 8x6mm. Please approve this MRI so that we can see if this has changed.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

Patient has been having a headache, dizziness, and Syncore for more than a month we need to get an MRI to see what is going on; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient has been having moments of confusion and mixing up every day words; ex. knife for scissors; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

patient has been having moments of memory loss, blank stares, sudden confusion; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing fatigue or malaise.

patient has passed out on 2 different occasions; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient is experiencing dizziness.

patient has recurring headaches. she rates her pain 7/10.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). patient having recurring severe headaches with ptosis bilaterally.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient is referred to neurology for seizure activity. Has had a MRI performed two years ago, we do not have these results.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The results of the previous brain MRI are unknown.

Patient presents for follow up HEADACHES . Last visit was 3 month ago. Symptoms WITH NOIMPROVEMENT. Persistent symptoms include: still having headaches daily Patient DID take all of prescribed medications but pt states medication did not help.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient was hit in the head. Went to Er. dx w/concussion. had Ct scan. Presented 5 days later still c/o headache. needs mri for further evaluation; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient was in an accident where he was hit by a train in 1993. Patient has been hit in the head by a baseball bat in the past as well. Evidence of the head injury, old scar to left side of head. Skull tenderness to left temple area and vision changes.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient was referred to a pediatric endocrinologist and this doctor has requested this MRI of brain/pituitary; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are not recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; Surgery is not planned within the next 4 weeks.; An operation for shunt placement (for brain fluid drainage) is not being considered or a non-metallic shunt is not functioning correctly.; The patient has a congenital abnormality.

patient was seen at arkansas childrens hospital for years due to diagnosis. unfortunately she has gotten to the age where she can no longer be seen at that facilities. we are unsure when her last mri took place at ACH. this is a new onset seizure that need; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

patient with dizziness, slurred speech, cannot use right arm, possible stroke; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

patient with persistent headache waking up from sleep.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Pt had a fall and had a mri of the lumbar spine. One that study was done they found an abnormality and are wanting to evaluate with an MRI of the brain as well.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; It is not known if there are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known when the recent trauma or injury to the head occurred.

PT HAS MIGRAINES SINCE INFANCY. TREATED AT CHILDREN'S HOSPITAL. DR IS INVESTIGATING CAUSE; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Pt has Parathesia to left leg.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Pt is experiencing bilateral hearing loss.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the patient had a normal audiogram.; The patient is experiencing hearing loss.

Pt is now having stuttering problems that are followed up with seizures.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has NOT been a change in seizure pattern or a new seizure.; This is not a new patient.

pt with several months of HA qday. they last hours to all day. they respond well to aleva some days but not others. + double vision occ. + visual aura. + neck spasm. no missed meals or fluids. no caffeine changes lately. no fever. no syncope. + hx of head; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

R/O HNP; This study is being ordered for a neurological disorder.; 11/21/2015; There has been treatment or conservative therapy.; pain  numbness  tingling; Anti inflammatories  Home monitored exercises

R/O pituitary issues and possible tumor; Prolactin level has increased and is really high, 16.9 on 09/29/15 20.9 on 11/2/2015; Patient is really fatigued. History of headaches and thyroid problems, hyperactive; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Recent acute visual changes, in last month headaches are worsening even with TX.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

Right leg pain, weakness and numbness.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

ringing in left ear and gradually getting louder; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Risk of blot clot, stroke, and R/O tumor.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

severe headache that woke patient up from sleep; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

suspected stroke, memory loss, 40 min pt did not know where he was, trouble swallowing,; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if there are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.

unequal pupils, blurry vision with flashes of light; This study is being ordered for a neurological disorder.; 7-30-15; There has not been any treatment or conservative therapy.; vision changes, flashes of light, blurry type area in right eye and c/o sparks in her vision. anisocoria

unknown; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Unknown; This study is being ordered for a neurological disorder.; 11/23/2015; There has not been any treatment or conservative therapy.; Patient is experiencing smudge like vision. Decreased vision and color, closes good eye (right) black silhouette. No pain in eye; several eye exam. Patient might have MS or optic neuritis. Eye doctor recommended the visit; visual changes.

unknown; This study is being ordered for a neurological disorder.; 12/3/2015; There has been treatment or conservative therapy.; blurred vision, weakness, increased BP Readings, and pressure that starts at the back of the head and radiates to right temporal area; aspirin daily

unknown; This study is being ordered for a neurological disorder.; onset at 4th grade for headaches; onset of thoracic back pain unknown; There has not been any treatment or conservative therapy.; ha- squeezing, nausea, vomiting, photo sensitivity; back- stabbing, numbness progressing to pin pricks

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; has gotten worse in last 7 weeks; There has been treatment or conservative therapy.; ; Lumbar and cervical xrays abnormal. Failed improvement with Naprosyn, steroids, home physical therapy with heat and massage. She has been advised to avoid long term use of antiinflammatory medications related to her heart problem.

vision changes; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

With the elevated prolactin level of 31.4, and the irregular menses, the doctor wants to evaluate the pituitary gland.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

worsening vertigo with incoordination and hx of severe headaches and hx of MVA; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.

"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

< Enter answer here - or Type In Unknown If No Info Given. >; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

< Enter answer here - or Type In Unknown If No Info Given. >; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

,,,,,,,,,,,,,,; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; It is unknown if the patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for Inflammatory/ Infectious Disease.; Pt chest xray shows bilateral lung masses that resemble snow-balls. Pt TB skin test is negative. Doesn't look like pneumonia; There has been treatment or conservative therapy.; elevated white count, lung mass by chest xray.; Pt was given tb skin test and given oral antibiotics

; This study is being ordered for Inflammatory/ Infectious Disease.; pt. has initial onset on 10-12-15; There has been treatment or conservative therapy.; abdominal pain, chest pain; pt. was placed on antibiotics, chest x-rays, and anti-inflammatory medications.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/13/2014; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has abdominal and chest pain, night sweats and elevated WBC.; There has not been any treatment or conservative therapy.; abdominal pain, chest pain, leukocytosis and night sweats. unexplained. needs ct to r/o lymphoma

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown If No Info Given; There has not been any treatment or conservative therapy.; Patient Had an abnormal pulmonary exam so we followed up with a chest xray. Xray found abnormal mediastinum. Patient was feeling congestion in chest and coughing. Patient is a heavy smoker.

07/15/2015...2. Right pneumothorax: Appears loculated and is not causing tension or hemodynamic compromise. The chest pain has resolved. It is very likely that he has a component of trapped lung in that area, and evacuation will require a repeat thorac; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

1 year follow-up of 4mm mass in left lower lobe found on ct of abd/pelvis; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

3 mth follow-up (aug 2015) 2cm lung nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

3mo f/u to a nodule found on ct; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

62 yo male noted to have pulmonary nodules, seen on chest imaging on CXR & chest CT in June. Please schedule this pt for a repeat chest CT without contrast (has chronic kidney disease), to be done in mid September. Thanks!; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.

A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

Abnormal chest X-ray, nodules in lungs; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

abnormal chest x-ray; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Abnormal chest x-ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

abnormal chest xrays bilateral lubes; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Abnormal finding on a chest CT in march; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

ADN chest x-ray, nodules were found. Pulmonologist will not see Pt without CT; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

chest ct 2014 found pulmonary nodules 1yr f/u; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Chest Ct is being requested due to there being an abnormal Chest X-ray finding/ X-ray showed possible adenopathy; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Chest pain, cough; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Chest pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

chest x ray 07/28/15; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

chest x-ray found nodular opacity recommend chest CT for further evaluation; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

chronic cough, chest congestion, sob, hx of smoking; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Chronic cough, SOB possible Peribronchial swelling, bronchi and wheezing on left side of chest; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

COLON CANCER/ Caller is the PCP. Colon Rectal Surgeon recommended (Lance Burns MD, phone number is (501)664-2432- To see if there is metastasis.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

COPD; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Cough; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

CT abd/pel- rule out mass seen on previous abnormal abd exam 01/16/2014; CT chest r/o heart damage- patient thought she had a heart attack (patient had previous MI); This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/04/2015; There has not been any treatment or conservative therapy.; chronic chest and abd/pel pain-

CXR showed bullae; patient known asthma presents with increased SOB; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Dr. feels the pericardial sac has fluid in it.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

enlarged heart and murmur; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/11/2015; There has been treatment or conservative therapy.; enlarged and heart mur mur; xray

Enter answer here - or Type In pt seen by provider on 09/02/2015 for complaint of respiratory problems, chest x-ray done same day with findings emphysematous changes in the lungs w/out consolidation or effusion, CT chest done 09/10/2015 with findings one ; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

f/u for nodule; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

F/U from 6 month about lung nodule.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

f/u; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

FEVER, FATIGUE; This study is being ordered for Inflammatory/ Infectious Disease.; SEPT 1, 2015; There has been treatment or conservative therapy.; HIGH FEVER; ANTIBIOTICS

follow up for pulmonary nodules that measure 4mm each.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

follow up to abnormal CT; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

follow up to liver mass with biopsy showing fibrosis, and 10mm lung nodule; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; lung nodule and liver fibrosis; There has been treatment or conservative therapy.; abdominal pain, lower left quadrant weakness, inability to walk; patient was recently hospitalized, then discharged with home health and physical therapy

follow up; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

follow-up of chest ct from april 2015 for abnormal xray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

had night sweats and has tachycardia, rule out any mass; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

hemoptisis, smoker; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

history of malignant neoplasm right lower lobe lung. patient complains of productive cough. general aches and pain. white blood count was elevated at 14.1 on 04/17/15 , 12.2 on 10/24/15. Patient due for repeat ct of chest for lung cancer monitoring.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

History of renal cell carcinoma,unintentional weight loss, fatigue, night sweats u; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

hx of lymphoma, persistent cough,; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Increased in size METS- Lung METS and Brain and bone cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; having chest pain, with walking or exertion and having pain with deep inspiration or cough going on for 4 weeks; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

looking for blockage;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Mass of chest wall and rib pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; first onset; There has not been any treatment or conservative therapy.; red patchy plaquing noted to torso. quarter size soft mass noted to left chest

Member has a chronic cough. x rays are normal. Ultra sound was also normal; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

mestinal hilar adnopathy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/21/2015; There has not been any treatment or conservative therapy.; abnormal diagnostic imaging (ct angio coradid)

nicotine dependence; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

no other info given.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

NO; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

no; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/2013; There has not been any treatment or conservative therapy.; unexplained weight loss patient has lost over 45lbs since 1/2013 with no diet or exercise change which is causing blood pressure to drop

nodule on 4/29/15, recommended repeat CT; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

NONE; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Old granulomatous disease. Single small noncalcified nodule; inferior aspect of the right upper lobe is nonspecific and most likely; represents a small noncalcified granuloma. If patient is at high risk; for lung cancer then a follow-up CT scan of the chest; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

on chest xray his Physician has discovered pulmonary nodules that need to be looked at further to make sure they are not cancer.. HLittle,lpn; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

patient had an abnormal chest x-ray; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.
Patient has a history of lung cancer with recent bronchitis for 1 month.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Patient has a right lower lobe mass and recurrent cough. Needs CT for further examination of this mass; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Patient has diagnosis of breast cancer. Doctor has ordered brain CT and chest CT to rule out cancer as there is a family history.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Patient has lymph nodes.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Patient is having left sided chest pain. Normal xray and ekg; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Patient is inflamed around upper left chest area, we are trying to use an CT scan to r/o spleen infarction vs. bony disease.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

patient seen in office 12/21/15 for follow up visit from 11/19/15. was treated for fluid overload from Nov visit. Complains of Shortness of breath as usual, cough, chronic diarrhea, decreased appetite, and weight loss. She is a current everyday smoker wit; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

patient with chest pain continuous without relief; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Per CT on 8/26/15, imaging showed right hilar soft tissue; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

possible meniscus tear; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/2015; There has been treatment or conservative therapy.; knee pain knee swelling inflammation abnormal xray and possible meniscus tear; PT but got worse

PT HAD A CT CHEST ON 5/1/14 THAT SHOWED A 3 MM NONCALCIFIED NODULE IN THE RIGHT UPPER LOBE AND 6MM NODULE RIGHT MIDDLE LOBE AND 3MM AND 2MM NODULES IN LEFT LOWER LOBE. RADIOLOGIST RECOMMENDED FOLLOW UP CT TO CHECK ON IT.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Pt has COPD.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Pt has had a cough for almost a year that she been having treatments for and it comes and goes but never is dissolved/ X-ray is not clear of whether there is a mass or tumor and that is reason CT was recommended; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

pt is complaining of chest pain after MVA. pt states pain returned when all of steroids were gone.; There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.

pt w/chornic cough; ex smoker; med w/no relief; restrictive lung defect; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

Pt was diagnosed with chest wall mass in 2010, mass was benign and removed. Recently patient has had increased pain to the left side of chest and a untreatable cough which mimic the symptoms pt had before diagnosed with chest wall mass in 2010.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

pt. complains of sinus tenderness , drainage; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Pulmonary nodule; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

R/ o scare on lung vs. a mass , x-ray show an anomaly; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/23/15; There has not been any treatment or conservative therapy.; coughing , wheezing ,

Rectal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Repeat CT for lung nodules.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

repeat in one year; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Results / Interpretations   X-RAY, CHEST   nodules on rt middle congestion in lower trt; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

shortness of breath, lymphadenopathy; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

sob, rapid weight loss, f/u pulmonary nodule, r/o lung carcinoma, 3.1 nodule in right hilar region; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Sternoclavicular swelling and haziness on exam and chest xray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Suboptimal inspiratory effort. Cardiopericardial silhouette is enlarged. Costophrenic angles are sharp. Loss of the right heart border indicates a probable right middle lobe infiltrate, Bony structures are unremarkable impression cardiomegaly without evi; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.

The patient is presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

The Pt had abnormal chest X-ray, chest pain.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

The report of her chest x-ray is left hemidiaphragm is elevated that has not been there in the past.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

The request is for a chest, thoracic or sterno-clavicular joint CT.; "There is a nodule,coin lesion or other lung mass.cxct"

There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.

There is no radiologic evidence of non-resolving pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is radiologic evidence of a lung abscess or empyema.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; ongoing, having same issue.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient has hemoptysis and radiologic evidence of pneumonia; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient with SOB, cough, Left sided chest pain. Abnormal chest X-ray showing peri-hilar calcifications.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Persistent hazy opacification within the lingula which has been noted on multiple previous examinations indeterminate for recurrent inflammatory changes versus underlying chronic scarring or potential pericardial fat pad. Correlation with follow up CT of t; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt has hx of heart surgery 2014, after surgery has had constant chest pain for 8 months and breathing problems. Affecting pts daily activities.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Recently had pneumonia, getting better but running low fever. This is to rule out abscess; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Slightly abnormal chest x-ray with 7 mth persistent and productive cough.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; SOB and Persistent cough; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; The patient has had a chronic cough, and bronchial infection for several months, weight loss and not improving with antibiotic. the patient recently saw the dermatologist and was diagnosed with facial granulomas, suggestive for sarcoid.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There was a nodule found in the lung during a chest xray; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; to rule out cancer- or any other disorders; There has not been any treatment or conservative therapy.; cough

This is a 6 month follow up from CT done on 4/23/15.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Unknown; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Unknown; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

unknown; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

visible mass on left side; protruding off of chest; history of smoking.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

weight loss, right pleural effusion, anemia, elevated platelets, and hyponatremia; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

widened heart evaluation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Work up from cardiology showed Right lower lobe nodule 4mm.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 12/04/2015; There has been treatment or conservative therapy.; shortness of breath//tenderness and swelling in the right upper quadrant//pain//elevated alt levels; medication without relief

< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

5mm nodular density within the anterolateral right middle lobe. Recommend follow up CT 3-6 months to confirm stability.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Angina/Chest Pain   Reported by patient.  Location: chest; middle scapular; does not radiate  Quality: pressure; aching Severity: moderate  Duration: started 2weeks ago; lasts from minutes to hour  Onset/Timing: nocturnally (noted with first episod; This study is being ordered for Vascular Disease.; 10/22/15; There has not been any treatment or conservative therapy.; chest pain that woke patient from sleep

Left side chest pain; Rule out lesion; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

This is a request for a chest MRI.

This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; This is a request for a chest MRI.

; This is a request for an MR Angiogram of the chest or thorax

There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing cervical neck pain not improving despite treatment.

< Enter answer here - or Type In Unknown If No Info Given. >; The patient does have neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has not been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis,  Bowel or bladder dysfunction, Evidence of new foot drop, etc...; Caller does not know how many follow-up Cervical Spine CTs the patient has had.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

decreased grip strength in hands, dropping objects, shooting pains in arms; tingling pain in arms down neck and in shoulders; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Pain in head and neck; Unable to go to work due to pain; Unable to move neck; Injury occurred on 12/15/2015; When pt tries to move neck, makes her dizzy; The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis,  Bowel or bladder dysfunction, Evidence of new foot drop, etc...

Patient feel 10/11/2015. fell on hip, headache, swelling , bruising.; This study is being ordered for trauma or injury.; 10/13/2015; There has been treatment or conservative therapy.; neck, abdomen, R Hip, R knee pain, numbness, tingling.; Medrol pack, medications, hot packs.

Patient had xray today, shows degenerative changes. Radiculopathy, pain that radiates down patients arm when she pushes on her head.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

PREVIOUS GUN SHOT WOUND. PREV CHEST X-RAY.; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; CHEST AND MIDDLE BACK PAIN

sudden onset of symptoms post injury, symptoms slurred speech, pt stumbling, pain; This study is being ordered for trauma or injury.; 12/05/2015; There has not been any treatment or conservative therapy.; slurred speech, neck pain, headache,feeling of stumbling when walking

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

; This study is being ordered for trauma or injury.; pt. had the four wheeler fall on him 11-01-15.; There has not been any treatment or conservative therapy.; spinous process tenderness L3-L4. negative right ankle brachial reflexes.

It is not known if the patient has any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine CT.; The patient has had 3 or fewer Thoracic Spine CTs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.

PREVIOUS GUN SHOT WOUND. PREV CHEST X-RAY.; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; CHEST AND MIDDLE BACK PAIN

pt has thoracic spine pain that radiates entire back. there is associated numbness and tingling. x-ray shows no spinal abnormality; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.

Pt is experiencing back pain with numbness and tingling in left hand.; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.

The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.

The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot undergo a thoracic spine MRI.

This is a request for a thoracic spine CT.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; There is a reason why the patient cannot undergo a thoracic spine MRI.; There are no documented clinical findings of immune system suppression or AIDS.; The patient is not experiencing thoracic back pain associated with chest pain.

This is a request for a thoracic spine CT.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; There is a reason why the patient cannot undergo a thoracic spine MRI.

Thoracic Spine XRay today: Findings consistent with mild thoracolumbar scoliosis and post-surgical finding of CSpine. Potential linear change ~T6. Will obtain Thoracic CT for bone evaluation.; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.

; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for trauma or injury.; pt. had the four wheeler fall on him 11-01-15.; There has not been any treatment or conservative therapy.; spinous process tenderness L3-L4. negative right ankle brachial reflexes.

Patient fell 10/11/2015. fell on hip, headache, swelling, bruising.; This study is being ordered for trauma or injury.; 10/13/2015; There has been treatment or conservative therapy.; neck, abdomen, R Hip, R knee pain, numbness, tingling.; Medrol pack, medications, hot packs.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Callers says her notes just mention some weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in both hands; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 11/26/15; There has not been any treatment or conservative therapy.; - Fractured neck with radiculopathy, numbness and weakness on the L side

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; February 2014; There has been treatment or conservative therapy.; back pain, neck pain; medication with no improvement

; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.;

; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and tingling radiating down into the L arm, hand, and middle finger; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;

; This study is being ordered for a neurological disorder.; 7/10/2012; There has not been any treatment or conservative therapy.; Back pain, paresthasias

; This study is being ordered for a neurological disorder.; Has been going on for the last year or so started about January 5, 2015 and has not resolved with PT; There has been treatment or conservative therapy.; ; Ensaids and rx for pain has not helps has had 8 weeks of Physical Therapy and states pain is worse

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Chronic back pain; There has been treatment or conservative therapy.; Back pain; PT

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

; This study is being ordered for trauma or injury.; 6/18/2014; There has been treatment or conservative therapy.; Pt c/o back pain, decrease ROM, numbness, memory loss, and nausea. Pt also blacks out.; PT, medication and injections bypass; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; bypass; It is not known if there has been any treatment or conservative therapy.; bypass

FUNCTIONAL LOSS, PAIN LIMITING FUNCTION; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; FUNCTIONAL WEAKNESS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Having intermittent back pain. A few days ago he could hardly walk. He has pain in the Right arm intermittently. That occurs when his L leg is hurting...a dull nerve pain. No numbness or tingling of the R arm. Has pain in the outside of both sides of; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/06/2015; There has been treatment or conservative therapy.; Having intermittent back pain. A few days ago he could hardly walk. He has pain in the Right arm intermittently. That occurs when his L leg is hurting...a dull nerve pain. No numbness or tingling of the R arm. Has pain in the outside of both sides of; HYDROCODONE/3 MONTHS PT

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; No clinicals available

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;
<Enter Additional Clinical Information>

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Provider Plan Nerve conductions normal in both arms. Needle EMG was checked in several left arm muscles, which is the more symptomatic side. The arm muscles are normal, but there was one location in the C-spine where there seemed to be some P waves. T

just patient having pain and numbness that is not getting better; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; two months; There has been treatment or conservative therapy.; patient has shoulder and cervical pain that is going to the neck and right arm or with numbness. this has been going on 2 to 3 weeks; patient got multiple injections of medicine for the pain
looking for new lesions; This study is being ordered for a neurological disorder.; 12/28/15; There has been treatment or conservative therapy.; foot drop, parasthesia in bilateral extremities, problems swallowing; Pt has had MS for 5 years...on weekly Avonex injections

metastatic colon cancer; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

n/a; This study is being ordered for Inflammatory/ Infectious Disease.; n/a; There has been treatment or conservative therapy.; CERVICAL- numbness, tingling, L-arm numbness  KNEE- pain, difficulty walking; NSAID's

NA; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT HAS LIMITED RANGE OF MOTION ON EXAM. UPPER EXTREMITY RADICULOPATHY; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Neck pain not any better after inj 11/30/15; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Neck pain with radiculopathy down left arm several months. Steroids and Meloxicam ineffective for the pain, symptoms not improving.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

new patient, but pain mentioned. r/o Fracture in neck; This is a request for cervical spine MRI; Follow-up to Surgery or Fracture within the last 6 months; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.; There has not been a recurrence of symptoms following surgery.; The patient been not been seen by or is not the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

No clinicals available; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

NO; This study is being ordered for trauma or injury.; 9/4/2014; There has been treatment or conservative therapy.; ARM NUMBNESS, PAIN AND WEAKNESS, LEG PAIN, TINGLING, NECK PAIN; INJECTIONS, CHIROPRACTIC CARE, MILOXACAM

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/21/2014; There has been treatment or conservative therapy.; Pt has numbness and tingling in the upper extremities. numbness and tingling in to the lower upper extremities . mid back pain.; Physical Therapy , epidural injections, and medication therapy pain for greater than 3 months. tried conservative measures with worsening pain. nsaid, steroids, heat and ice, pain meds, physical therapy all with no relief; This study is being ordered for a neurological disorder.; july 1 2015; There has been treatment or conservative therapy.; bilateral upper extremity weakness and radiculopathy, lumbago, t-spine pain, chest wall pain, low back pain; Nsaid, physical therapy, pain meds, heat and ice

pain getting worse with numbness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7.1.2015; There has been treatment or conservative therapy.; back pain, neck pain , numbness into fingers and both arms , tenderness; Medication , Home Exercise

Patient has been in physical therapy since 07/21/15 with symptoms getting progressively worse with time. Patient has also had failed treatment with prescriptions and chiropractor.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; loss of sensation in hand/arm

Patient has had left arm numbness and tingling for over a month, persistent, and worsening now. She had been seen for this along with some other head symptoms that led the doctor to image the head. This was negative, but symptoms of tingling and numbness ; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

patient has taken Ibuprofen and Flexeril; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 21, 2015; There has been treatment or conservative therapy.; worsening pain in neck and lower back; patient has completed physical therapy

patient is on medication, and patient has osteoarthritis.; This study is being ordered for trauma or injury.; 1988; There has been treatment or conservative therapy.; back pain with radiculopathy and minimal relief; injections, PT

Patient needs study to be completed to proceed with surgical planning requirements.; This study is being ordered for a neurological disorder.; 2001; There has been treatment or conservative therapy.; Tingling of the right arm, of the right hand, of the posterior left thigh, and numbness of the right hand. Neck pain in trapezius extends into shoulder, increased by turning head, and progressively worsening. Low back pain is chronic. Mild weakness of the; Chiropractic therapy which did not help.
PREVIOUS GUN SHOT WOUND. PREV CHEST X-RAY.; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; CHEST AND MIDDLE BACK PAIN

pt's previous MRI shows grade 1 anterolisthesis of L5 on S1 with moderate DDD at L3-4,4-5,5-S1. Physical exam reveals BUE and BLE weakness, hyperreflexia in BLE and clonus. thoracic and cervical mri recommended to r/o canal stenosis; This study is being ordered for a neurological disorder.; 12/2008; There has been treatment or conservative therapy.; ; Physical therapy, Manipulation and epidural injections

Pts X-rays came back within normal limits and patient is still stating he is in pain. Needing MRI to rule out future injury so patient can return to work; This study is being ordered for trauma or injury.; Pt states that accident happened around 10/5/15; There has been treatment or conservative therapy.; Neck pain; Acute thoracic back pain; Lumbosacral radiculitis; Patient was sent to Physical Therapy and given medications to help with inflammation and pain

R/O HNP; This study is being ordered for a neurological disorder.; 11/21/2015; There has been treatment or conservative therapy.; pain; numbness; tingling; Anti inflammatories; Home monitored exercises

RADICULAPATHY; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The last cervical spine MRI was performed within the last 6 months.; Known Tumor with or without metastasis; Pt with craniocervical meningioma coming for 3 mos follow up with MRI

The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The last spine MRI was performed more than 6 months ago.; Known Tumor with or without metastasis

This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; Yes, there is evidence of recent development of unilateral muscle wasting.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.

This is a request for cervical spine MRI; Neurological deficits; Patient is experiencing lower extremity weakness and radiculopathy. Conservative medicine shows no improvement.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; &Enter Additional Clinical Information& No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; cervical pain not responding to physical therapy and medication; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; Xray done-showed no fracture-radicular pains reproduced with cervical foraminal compression (spurlings); No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; a degree of numbness up down left arm and radiculopathy down left arm

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Has had 2 ultrasounds related to breast cancer. Had a swollen lymph node in her L axilla is stable.; Growth in duodenum has resolved. Had repeat biopsies that were fine Ok to be off prilosec. ; Goes back to gastroenterologist here in December for her

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient's x-ray showed some abnormality, RO ruptured disc

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Previous c-spine xray showing deformity

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Pt woke up 09/06/15 on vacation with acute neck pain. Pain and numbness travels down left arm. Nsaids, Pain meds. 7 sessions Physical therapy and now worsening of symptoms

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; history of cervical fusion at C4-5. patient has new onset of neck pain into left shoulder. x-ray shows moderate to severe DJD, loss of disc space, and osteophyte formation

This is a request for cervical spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis

This is a request for cervical spine MRI; Trauma or recent injury; ; It is not known if the patient have new or changing neurological signs or symptoms.

This is a request for cervical spine MRI; Trauma or recent injury; 6/2014 Motorcycle accident limited range of motion of neck pain in back and neck; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

this patient has had back problems for 10 years, but recently re-injured back. they are having radiculopathy along with back pain; This study is being ordered for trauma or injury.; 10/12/15; It is not known if there has been any treatment or conservative therapy.; back pain, with radiculopathy

this patient has had this pain for going on 6 weeks. she has parathesia in the arms and legs. she is a diabetic and her blood sugar is running high because of the pain; This study is being ordered for a neurological disorder.; 08/19/15; There has been treatment or conservative therapy.; neck pain, back pain, numbness in arms and legs and toes, tingling in fingers, left arm twitching; hydrocodone-acetimenophin, flexeril

Unknown.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

unknown; This study is being ordered for a neurological disorder.; 10/2015; There has been treatment or conservative therapy.; decreased mobility, joint tenderness, trouble sleeping, spasms, weakness, disc degeneration; PT and medication

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; has gotten worse in last 7 weeks; There has been treatment or conservative therapy.; ; Lumbar and cervical xrays abnormal. Failed improvement with Naprosyn, steroids, home physical therapy with heat and massage. She has been advised to avoid long term use of antiinflammatory medications related to her heart problem.

We are sending patient to an orthopedic surgeon. These tests are needed so he can be seen and get his pain taken care of.; This study is being ordered for Inflammatory/ Infectious Disease.; March 26th of 2015; There has been treatment or conservative therapy.; decreased range of motion, sever pain; Radio frequency by orthopedic dr

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; Sharp pain. Interferes with work.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 9/2015; There has not been any treatment or conservative therapy.; headaches muscle weakness dizziness nausea neck pain unsteady gait.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Congenital Anomaly.; 11/16/2014; There has been treatment or conservative therapy.; chronic back pain in middle and lower back, muscle spasm, decrease range of motion, pain with motion, radiculopathy in both legs and chest; home exercise, medications

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 year ago; There has been treatment or conservative therapy.; back pain; OTC meds

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/18/2015; There has been treatment or conservative therapy.; numbness and tightness; chiropractic

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2007; There has been treatment or conservative therapy.; Neck pain, back pain; Injections.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8-10-15; There has been treatment or conservative therapy.; back pain with radiation; anti inflammatory, muscle relaxants, narcotic meds

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 11/09/2015; There has been treatment or conservative therapy.; Pain and numbness.; Referred to neuro surgeon.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 2005; There has been treatment or conservative therapy.; pain/pain down both legs instability/loss of sensation/limited range of motion; surgery and discectomy

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 6/15/2015; There has not been any treatment or conservative therapy.; NUMBNESS OVER HER LEFT LEG, HAVING PROBLEM WALKING DUE TO THE PAIN

; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pt is having hypoesthesia in left T1 Left.decreased ROM; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

; This study is being ordered for a neurological disorder.; 07/2015; There has been treatment or conservative therapy.; Upper and Lower Extremity Weakness/Numbness; Chiropractor, Massage, Medication

; This study is being ordered for a neurological disorder.; 9/28/15; There has been treatment or conservative therapy.; pt is having significant pain in T and L spine. Due to severity of pain, I will order MRI for further evaluation to rule out infection process vs intervertebral disc disorder. Rx for tramadol to use bid for back pain at this time; patient has been treated with tramadol for pain, he is worse

; This study is being ordered for a neurological disorder.; chronic with acute exacerbation x 1 1/2 months; There has been treatment or conservative therapy.; low to mid back pain with radiculopathy to thighs and calves; stiffness, worsens with flexion and twisting; pain with ROM in hips; tenderness noted in left laterak lower bajc radiating to hip with pain radiating to level of knee; Xray of L/spine showed ad; patient has been taking NSAIDS and heat therapy

; This study is being ordered for Congenital Anomaly.; 8/1/2015; There has been treatment or conservative therapy.; pain in the back , pt has had constant pain with burning down the right leg tingling down the toes; physical therapy and medication , muscle relaxer 6 weeks of pt

; This study is being ordered for Inflammatory/ Infectious Disease.; May 2015; There has been treatment or conservative therapy.; muscle weakness, urinary incontinence, headache; medications

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Chronic back pain; There has been treatment or conservative therapy.; Back pain; PT

; This study is being ordered for trauma or injury.; 6/18/2014; There has been treatment or conservative therapy.; Pt c/o back pain, decrease ROM, numbness, memory loss, and nausea. Pt also blacks out.; PT, medication and injections

; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; ;

47 yo white female. The patient is here for follow up visit. Patient is here for Medication refills. Patient to be evaluated for lower back pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.;

47 yo white female. The patient is here for follow up visit. Patient is here for Medication refills. Patient to be evaluated for lower back pain.

Broken Harrington rod in back.; This study is being ordered for a neurological disorder.; Approximately 2 months ago.; There has not been any treatment or conservative therapy.; Patient has history of scoliosis and the Harrington rod placed in her back to correct the curvature of her spine has disconnected at the top and is fractured at the bottom. Tingling sensations to right hand. Pain demonstrated with flexion and extension. R

Dr is trying to r/o tumor or mass.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/2015; There has been treatment or conservative therapy.; Pt is showing neurological deficits. Tingling and numbness in the abdomen region.; Pt was given medication with no improvement

Has history of ruptured disc.; This study is being ordered for trauma or injury.; unknown; There has been treatment or conservative therapy.; Radicular bilateral arm pain, upper back pain, low back pain, herniated lumbar disc.; Meloxicam 15 mg , take one tab po daily.

Has sustained a fall recently whihc has mad back issues worse  pain in ls region persistent despite nsaid and muscle relaxant as well as P.T exercise regimen done at home  Numbness in lle ongoing also having issues currently affecting LUE  Pain als; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; THREE YEARS; There has been treatment or conservative therapy.; LLe radiculopathy  progression of symptoms  xR -ddd-MOST PRONOUNCED LOWER THROACIC AND UPPER LS SPINE  P.T REGIMEN -DONE AT HOME SINCE NOVEMBER -LS AND THORACIC SPINE  nsaid otc; HOME PT, MEDICATION

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; ; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

It is not known if there are documented findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits." metastatic colon cancer; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/21/2014; There has been treatment or conservative therapy.; Pt has numbness and tingling in the upper extremities. numbness and tingling in to the lower upper extremities . mid back pain.; Physical Therapy , epidural injections, and medication therapy pain for greater than 3 months. tried conservative measures with worsening pain. nsoids, steroids, heat and ice, pain meds, physical therapy all with no relief; This study is being ordered for a neurological disorder.; july 1 2015; There has been treatment or conservative therapy.; bilateral upper extremity weakness and radiculopathy, lumbago, t-spine pain, chest wall pain, low back pain; Nsaids, physical therapy, pain meds, heat and ice

pain getting worse with numbness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7.1.2015; There has been treatment or conservative therapy.; back pain, neck pain , numbness into fingers and both arms , tenderness; Medication , Home Exercise

Palpable spasm with ROM, SLR + on Left at 30 degrees and - on Right; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Back pain with radiation to left leg.; Taking Mobic and Tizanidine

Patient complains of back pain. The discomfort is most prominent in the upper thoracic spine. This radiates to the neck. She characterizes it as constant, severe, sharp, and aching. This is an acute episode with no prior history of back pain. She states; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; Patient complains of back pain. The discomfort is most prominent in the upper thoracic spine. This radiates to the neck. She characterizes it as constant, severe, sharp, and aching. This is an acute episode with no prior history of back pain. She states; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

PATIENT HAS A 57 DEGREE RIGHT-SIDED SCOLIOSIS ON PLAIN X-RAY, (R) SIDE BACK PAIN, RADICULAR PAIN DOWN RLE, GAIT DISTURBANCE; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09-17-2014; There has been treatment or conservative therapy.; (R) SIDE BACK PAIN, RADICULOPATHY DOWN (R) LEG, GAIT DISTURBANCE, SCOLIOSIS; NSAIDS, ORAL STEROIDS, NON-NARCOTIC PAIN MEDS, MUSCLE RELAXERS, STRETCHING EXERCISES, PLAIN X-RAYS, PHYSICAL THERAPY

Patient is in extreme pain and is difficult to perform everyday tasks now; This study is being ordered for a neurological disorder.; 11/10/15 is when pain & numbness started, he has been through physical therapy and inflammatory meds that are not helping; There has been treatment or conservative therapy.; Extreme upper back and neck pain going down both arms with numbness in both hands; Physical therapy and anti inflammatory and steroids

Patient requests to have Chiropractic Evaluation, which requires additional imaging; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/26/2015; There has been treatment or conservative therapy.; Back Pain, Stiffness, Muscle Aches, Loss of Strength; Patient Failed Physical Therapy, Anti-inflammatory (Both OTC and RX strength), Steroid therapy (PO and Injectable), Muscle Relaxant Therapy

Patient with mid back pain with no causative trigger. Worse on the right side. XRAYS SHOW COMPRESSION FRACTURE PHYSICAL THERAPY NOT HELPING MEDS NOT WORKING VERY GOOD FURTHER DIAGNOSTIC EVALUATIONS; This study is being ordered for trauma or injury.; 09/24/2015; There has been treatment or conservative therapy.; BACK PAIN,TENDERNESS OF MUSCLES ESPECIALLY ON THE RIGHT,VERY LIMITED ROM,RIGHT HIP PAIN,SPASMS; stop meloxicam due to abdominal pain. OK to continue with 81mg aspirin enteric coated. skelaxin, cyclobenzaprine, hydrocodone for pain, Physical Therapy. Evaluate and treat. PREVIOUS GUN SHOT WOUND. PREV CHEST X-RAY.; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; CHEST AND MIDDLE BACK PAIN

previous mri of lumbar showed disc pretusion on L4 & 5; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/24/2014; There has been treatment or conservative therapy.; arm pain numbness and weakness ; low back pain radiating to both bilateral lower extremitys; lumbar injections ; nerve root block ; medication therapy

pt's previous MRI shows grade 1 anterolisthesis of L5 on S1 with moderate DDD at L3-4,4-5,5-S1. Physical exam reveals BUE and BLE weakness, hyperreflexia in BLE and clonus. thoracic and cervical mri recommended to r/o canal stenosis; This study is being ordered for a neurological disorder.; 12/2008; There has been treatment or conservative therapy.; ; Physical therapy, Manipulation and epidural injections

Pts X-rays came back within normal limits and patient is still stating he is in pain. Needing MRI to rule out future injury so patient can return to work; This study is being ordered for trauma or injury.; Pt states that accident happened around 10/5/15; There has been treatment or conservative therapy.; Neck pain; Acute thoracic back pain; Lumbosacral radiculitis; Patient was sent to Physical Therapy and given medications to help with inflammation and pain

R/O HNP; This study is being ordered for a neurological disorder.; 11/21/2015; There has been treatment or conservative therapy.; pain ; numbness ; tingling; Anti inflammatory ; Home monitored exercises

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Mid thoracic pain; the differential includes enthesopathy of the supra and interspinous ligament at the thoracic spine.; that could be positional in origin.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Pain in thoracic spine chronic in duration. Patient experiencing thoracic spondylosis. Chronic numbness and tingling bilaterally in feet and right lower leg.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; chronic back pain and already completed physical therapy; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; PT had an x-ray, shows a lost of height on T5. PT is having bad back pain.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

THERE IS A 2CM OVAL MASS, NON-MOBILE MASS LEFT LATERAL T SPINE, MILDLY TENDER TO PALPATION, 1CM FIRM NON-MOBILE MASS TO LEFT LATERAL L SPINE, VERY TENDER TO PALPATION; This study is being ordered for a neurological disorder.; ; There has not been any treatment or conservative therapy.;

This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to pre-operative evaluation.;

This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to pre-operative evaluation.; This patient is being referred for permanent spinal cord stimulator placement and MRI is needed for this reason.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; pain is radiating (thoracic spine at "bra strap")  Severity: worsening; severe (8-10); interference with work.  tenderness (b/l thoracic paraspinals at about t4-t5); The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.

this patient has had back problems for 10 years, but recently re-injured back. they are having radiculopathy along with back pain; This study is being ordered for trauma or injury.; 10/12/15; It is not known if there has been any treatment or conservative therapy.; back pain, with radiculopathy

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; increased muscle spasms, one leg is shorter than the other.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above

< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 9/2015; There has not been any treatment or conservative therapy.; headaches muscle weakness dizziness nausea neck pain unsteady gait.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Congenital Anomaly.; 11/16/2014; There has been treatment or conservative therapy.; chronic back pain in middle and lower back, muscle spasm, decrease range of motion, pain with motion, radiculopathy in both legs and chest; home exercise, medications

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1 year ago; There has been treatment or conservative therapy.; back pain; OTC meds

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/5; There has been treatment or conservative therapy.; NUMBNESS IN THE TOES; MEDICATIONS

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2007; There has been treatment or conservative therapy.; Neck pain, back pain; Injections.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4 years; There has been treatment or conservative therapy.; pain, decrease ROM on shoulder; steroids and pain meds

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/2015; There has been treatment or conservative therapy.; severe back pain, c4-c5 leg weakness and numbness bowel and bladder incontinence; Physical therapy -meds

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8-10-15; There has been treatment or conservative therapy.; back pain with radiation; anti inflammatory, muscle relaxants, narcotic meds

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; severe pain in knee, lumbar spinal stenosis

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 11/09/2015; There has been treatment or conservative therapy.; Pain and numbness.; Referred to neuro surgeon.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 2005; There has been treatment or conservative therapy.; pain/pain down both legs instability/loss of sensation/limited range of motion; surgery and discectomy

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 6/15/2015; There has not been any treatment or conservative therapy.; NUMBNESS OVER HER LEFT LEG, HAVING PROBLEM WALKING DUE TO THE PAIN

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; February 2014; There has been treatment or conservative therapy.; back pain, neck pain; medication with no improvement

<none; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above (will fax); The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.;

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; leg weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.;

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.;

; The study requested is a Lumbar Spine MRI.; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above

; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more than once for these symptoms.

; This study is being ordered for a neurological disorder.; 07/2015; There has been treatment or conservative therapy.; Upper and Lower Extremity Weakness/Numbness; Chiropractor, Massage, Medication

; This study is being ordered for a neurological disorder.; 7/10/2012; There has not been any treatment or conservative therapy.; Back pain, paresthesias

; This study is being ordered for a neurological disorder.; 9/28/15; There has been treatment or conservative therapy.; pt is having significant pain in T and L spine. Due to severity of pain, I will order MRI for further evaluation to rule out infection process vs intervertebral disc disorder. Rx for tramadol to use bid for back pain at this time; patient has been treated with tramadol for pain, he is worse

; This study is being ordered for a neurological disorder.; chronic with acute exacerbation x 1 1/2 months; There has been treatment or conservative therapy.; low to mid back pain with radiculopathy to thighs and calves; stiffness, worsens with flexion and twisting; pain with ROM in hips; tenderness noted in left laterak lower bajc radiating to hip with pain radiating to level of knee; Xray of L/spine showed ad; patient has been taking NSAIDS and heat therapy

; This study is being ordered for a neurological disorder.; Has been going on for the last year or so started about January 5, 2015 and has not resolved with PT; There has been treatment or conservative therapy.; ; Ensaid and rx for pain has not helps has had 8 weeks of Physical Therapy and states pain is worse

; This study is being ordered for a neurological disorder.; Karla Roach is a 46 y.o. female. Who complains of worsening cervical neck, thoracic and lumbar back pain. Cervical spine onset 2004 after rear ended in car accident with 14 weeks of physical therapy and back at that time. She has since undergone radiofreq; There has been treatment or conservative therapy.; mid & low back pain with numbness in extremities.; Karla Roach is a 46 y.o. female. Who complains of worsening cervical neck, thoracic and lumbar back pain. Cervical spine onset 2004 after rear ended in car accident with 14 weeks of physical therapy and back at that time. She has since undergone radiofreq

; This study is being ordered for Congenital Anomaly.; 8/1/2015; There has been treatment or conservative therapy.; pain in the back , pt has had constant pain with burning down the right leg tingling down the toes; physical therapy and medication , muscle relaxer 6 weeks of pt

; This study is being ordered for Inflammatory/ Infectious Disease.; May 2015; There has been treatment or conservative therapy.; muscle weakness, urinary incontinence, headache; medications

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-9-2013; There has been treatment or conservative therapy.; PAIN AT REST AND LYING DOWN, LBP, HIP PAIN; HIP REPLACEMENT, THERAPY, MEDICATION

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Chronic back pain; There has been treatment or conservative therapy.; Back pain; PT

; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;

; This study is being ordered for trauma or injury.; 6/18/2014; There has been treatment or conservative therapy.; Pt c/o back pain, decrease ROM, numbness, memory loss, and nausea. Pt also blacks out.; PT, medication and injections

; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;;

4 weeks of conservative therapy with worsening pain; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

47 yo white female. The patient is here for follow up visit. Patient is here for Medication refills. Patient to be evaluated for lower back pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; 47 yo white female. The patient is here for follow up visit. Patient is here for Medication refills. Patient to be evaluated for lower back pain.

abnormal x ray on 12/14/15 indicated Previous L5/S1 fixation with 8mm spondylolisthesis and probably hardware retraction from the L5 vertebral body. There is a 30% loss of vertebral body height and the posterior aspect of L5. There is 6mm spondylolisthesis; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Limited range of motion due to pain and muscle spasms of the lower lumbar spine. L5 point tenderness in which light tapping causes shooting pains in the dorsum of the ipsilateral foot and lateral knee areas, L4/5 functional weakness in inversion and dorsiflexion; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Back pain and radicular pain down right leg; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; naproxen, zanaflex

back pain for 6 wks; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Back pain is getting worse.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

back pain severity level is severe, it occurs persistently. The patient describes the pain as sharp. Context: lying down. Symptoms are aggravated by lying/resting. Symptoms are relieved by movement. patient states he has noticed his back pain since he had; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more than once for these symptoms.

back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Broken Harrington rod in back.; This study is being ordered for a neurological disorder.; Approximately 2 months ago.; There has not been any treatment or conservative therapy.; Patient has history of scoliosis and the Harrington rod placed in her back to correct the curvature of her spine has disconnected at the top and is fractured at the bottom. Tingling sensations to right hand. Pain demonstrated with flexion and extension. R

bypass; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; bypass; It is not known if there has been any treatment or conservative therapy.; bypass

c/o shooting pain up her back for several weeks now. States no trauma that she is aware of. States it makes it difficult to perform ADLs; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Clinical Information; History / Dx: M54.40 Bilateral low back pain with sciatica, sciatica laterality unspecified ; History / Dx: duration 8 years. problem is fluctuating. occurs intermittently. location of pain is lower back. pain is radiated to the l; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Decreased strength and tone in the lower legs, left more than right; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Dr is trying to rule out tumor or mass.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/2015; There has been treatment or conservative therapy.; Pt is showing neurological deficits. Tingling and numbness in the abdomen region.; Pt was given medication with no improvement

FAILED PT AND INJECTIONS. PAIN WORSENING.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; EXTREMITY WEAKNESS DOWN LEFT LEG; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Had a recent fall; pain in legs; numbness in feet; feels off balance; decreased rom and tenderness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; positive for weakness and numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Had an MRI in 2012, was referred to a neurosurgeon Dr. Burson, recommended surgery, degenerative changes and PARS defect, pain had gotten better, has gotten intermittent pain over the past month, but now pain is getting worse, legs feel weak mostly down t; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Has history of ruptured disc.; This study is being ordered for trauma or injury.; unknown; There has been treatment or conservative therapy.; Radicular bilateral arm pain, upper back pain, low back pain, herniated lumbar disc.; Meloxicam 15 mg , take one tab po daily.

Has sustained a fall recently whihc has mad back issues worse  pain in ls region persistent despite nsaid and muscle relaxant as well as P.T exercise regimen done at home  Numbness in lle ongoing also having issues currently affecting LUE  Pain als; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; THREE YEARS; There has been treatment or conservative therapy.; LLe radiculopathy  progression of symptoms  xR -ddd-MOST PRONOUNCED LOWER THROACIC AND UPPER LS SPINE  P.T REGIMEN -DONE AT HOME SINCE NOVEMBER -LS AND THORACIC SPINE  nsaid otc; HOME PT, MEDICATION

HAS TRIED MEDS (NEPROXIN); The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Having intermittent back pain. A few days ago he could hardly walk. He has pain in the Right arm intermittently. That occurs when his L leg is hurting...a dull nerve pain. No numbness or tingling of the R arm. Has pain in the outside of both sides of; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/06/2015; There has been treatment or conservative therapy.; Having intermittent back pain. A few days ago he could hardly walk. He has pain in the Right arm intermittently. That occurs when his L leg is hurting...a dull nerve pain. No numbness or tingling of the R arm. Has pain in the outside of both sides of; HYDROCODONE/3 MONTHS PT

inability to move legs; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; limited ROM; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Large mass was felt in the lower left lumbar spine. Severe pain is radiating down back and legs.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Location: pain radiating to the legs; Quality: dull; Severity: same; Duration: about 3 months; Onset/Timing: first episode; Context: trauma (slipped and wrenched her back in the summer); Alleviating Factors: rest; hot packs, Norco; Aggravating Factor; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Low back pain, headaches, patient fell off a horse last summer, PT with 4 visits completed and back pain is getting worse each time she goes; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Low back pain. From a car accident 2 years ago.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known what medications were used in treatment.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.
metastatic colon cancer; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Musculoskeletal:: Motor Strength and Tone: normal. Joints, Bones, and Muscles: tenderness and limited ROM; bilateral lumbar spine tenderness to palpation. decreased range of motion to side bending and rotation. hypertonicity to bilateral lumbar paraspinal; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Negative x-ray per report; hx of pain since mid-late 2014 - worsening discomfort; saw chiropractor for 3 months w/ no relief; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

NO; This study is being ordered for trauma or injury.; 9/4/2014; There has been treatment or conservative therapy.; ARM NUMBNESS, PAIN AND WEAKNESS, LEG PAIN, TINGLING, NECK PAIN; INJECTIONS, CHIROPRACTIC CARE, MILOXACAM

none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; left leg muscle weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/21/2014; There has been treatment or conservative therapy.; Pt has numbness and tingling in the upper extremities. numbness and tingling in to the lower upper extremities . mid back pain.; Physical Therapy , epidural injections, and medication therapy

not improving with anti inflammatory meds and pt has been non weight bearing//has increased and worsening numbness and tingling//uncertain is this is related to her back//pain radiates down both legs; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; worsening with motion with upper back or torso; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

pain for greater than 3 months. tried conservative measures with worsening pain. nsaids, steroids, heat and ice, pain meds, physical therapy all with no relief; This study is being ordered for a neurological disorder.; july 1 2015; There has been treatment or conservative therapy.; bilateral upper extremity weakness and radiculopathy, lumbago, t-spine pain, chest wall pain, low back pain; Nsaids, physical therapy, pain meds, heat and ice

pain getting worse with numbness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7.1.2015; There has been treatment or conservative therapy.; back pain, neck pain , numbness into fingers and both arms , tenderness; Medication , Home Exercise

pain radiates down right leg, decreased flexion and extension in her back, Nsaids and tramadol with no relief;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pain, weakness, and paresthesia.; This study is being ordered for a neurological disorder.; 2 months of radicular low back pain. Pain radiates down left hip and leg. Pt c/o weakness and paresthesia in LLE. Pt has tried and failed steroids and anti inflammatorys.; There has been treatment or conservative therapy.; Sx are lower back and left hip pain, paresthesia and weakness in LLE. Pt c/o not being able to stand or walk for very long.; Pt has tried and failed on anti inflammatorys and steroids, as well as home PT (back exercises and stretching).

Palpable spasm with ROM, SLR + on Left at 30 degrees and - on Right; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Back pain with radation to left leg.; Taking Mobic and Tizanidine

Patient complains of left hip pain. He has had a long course of pain. We did x-rays which showed some arthritis in the hips and SI joints and lower lumbar spine. He had steroid was provided much relief and he also had SI joint injection bilaterally which ; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient complains of left hip pain. He has had a long course of pain. We did x-rays which showed some arthritis in the hips and SI joints and lower lumbar spine. He had steroid was provided much relief and he also had SI joint injection bilaterally which ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient had a CT done in June 2015 that showed levoscoliosis, degenerative changes, disc bulge, and protrusion/herniation.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

PATIENT HAS A 57 DEGREE RIGHT-SIDED SCOLIOSIS ON PLAIN X-RAY, (R) SIDE BACK PAIN, RADICULAR PAIN DOWN RLE, GAIT DISTURBANCE; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09-17-2014; There has been treatment or conservative therapy.; (R) SIDE BACK PAIN, RADICULOPATHY DOWN (R) LEG, GAIT DISTURBANCE, SCOLIOSIS; NSAIDS, ORAL STEROIDS, NON-NARCOTIC PAIN MEDS, MUSCLE RELAXERS, STRETCHING EXERCISES, PLAIN X-RAYS, PHYSICAL THERAPY

Patient has back , has had previous MRI 2014, has had injection in May. Home exercises, no actual therapy.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient has complained low back pain with bilateral radiculopathy for 1 year. Pain is unresolved with pain meds, steroid, nsaid and home exercise therapy.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Pain is unresolved after 6 weeks of home exercise therapy.

Patient has degenerative disc - lumbosacral region and chronic pain. Has tried injections in the past.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient has had extensive treatment in the past. Physical therapy, pain management, and injections last year. MRI from 2014 showed significant bilateral foraminal stenosis in L4-L5 and L5-S1. He also has occasional pain right leg. These problems cont; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient has low back pain refractory to physical therapy w/radicular symptoms; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

patient has taken Ibuprofen and Flexeril; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 21, 2015; There has been treatment or conservative therapy.; worsening pain in neck and lower back; patient has completed physical therapy
Patient is experiencing back pain not relieved by pain medications.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

patient is on medication, and patient has osteoarthritis.; This study is being ordered for trauma or injury.; 1988; There has been treatment or conservative therapy.; back pain with radiculopathy and minimal relief; injections, PT

Patient needs study to be completed to proceed with surgical planning requirements.; This study is being ordered for a neurological disorder.; 2001; There has been treatment or conservative therapy.; Tingling of the right arm, of the right hand, of the posterior left thigh, and numbness of the right hand. Neck pain in trapezius extends into shoulder, increased by turning head, and progressively worsening. Low back pain is chronic. Mild weakness of the; Chiropractic therapy which did not help.

Patient requests to have Chiropractic Evaluation, which requires additional imaging; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/26/2015; There has been treatment or conservative therapy.; Back Pain, Stiffness, Muscle Aches, Loss of Strength; Patient Failed Physical Therapy, Anti-inflammatory (Both OTC and RX strength), Steroid therapy (PO and Injectable), Muscle Relaxant Therapy

patient was hit by a car and x-rays were negative, and she continues to have pain; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient was prescribed cyclobenzaprine HCl 10mg 1tablet po bid for back muscle #60 pills also prescribed tramadol HCl 50mg 1 or 2 tablet po bid #120 for pain . He was also given Low Back pain exercises for home physical therapy .; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

patient with continuing low back pain after motorcycle accident 4 months ago. no alleviating factors.; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

Patient with mid back pain with no causative trigger. Worse on the right side.  XRAYS SHOW COMPRESSION FRACTURE PHYSICAL THERAPY NOT HELPING MEDS NOT WORKING VERY GOOD FURTHER DIAGNOSTIC EVALUATIONS; This study is being ordered for trauma or injury.; 09/24/2015; There has been treatment or conservative therapy.; BACK PAIN,TENDERNESS OF MUSCLES ESPECIALLY ON THE RIGHT,VERY LIMITED ROM,RIGHT HIP PAIN,SPASMS; stop meloxicam due to abdominal pain. OK to continue with 81mg aspirin enteric coated. skelaxin, cyclobenzaprine, hydrocodone for pain, Physical Therapy. Evaluate and treat.

previous mri of lumbar showed disc pretusion on L4 & 5; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/24/2014; There has been treatment or conservative therapy.; arm pain numbness and weakness ; low back pain radiating to both bilateral lower extremitys; lumbar injections ; nerve root block ; medication therapy

Pt continues to have low back pain with radiculopathy despite conservative tx with oral medications and physical therapy. Will order MRI for further evaluation. I would like her to continue physical therapy at this time. I will start on Neurontin for her ; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; scoliosis; tenderness to left SI area with palpation. Pt continues to have low back pain with radiculopathy despite conservative tx with oral medications and physical therapy. Will order MRI for further evaluation. I would like her to continue physical th; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt has had a prior abnl MRI of LS. Has tried low back exercises. Tried meloxicam with little relief.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Pt has had PT among other conservative treatments without success.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

PT HAS HAD SURGERY ON BACK ONCE ALREADY. BACK PAIN IS WORSE.
NEUROSURGEON WILL NOT SCHEDULE APPOINTMENT TO SEE PATIENT WITHOUT NEW MRI BEING PERFORMED.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decrease in ability to flex legs.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

pt loss of sensation in both legs, l4 derma tomal pattern low back pain with radiation to both legs pain in l5to r1 dermatomal pattern; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above pt w/o improvement; anti inflammatory w/o improvement;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

pt with low back pain starting 2 yrs ago. Stiffness and radicular bilateral leg pain & numbness in buttock, thigh, lower legs and fee. Knee jerks 1+; hypereshtesia in L2,L3,L4 and bilateral L5 -Gabapentin rx's on 10/27/15 with no releif noted; xray done s; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt with recurrent right radicular lumbar pain w/ associated numbness.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pts X-rays came back within normal limits and patient is still stating he is in pain. Needing MRI to rule out future injury so patient can return to work; This study is being ordered for trauma or injury.; Pt states that accident happened around 10/5/15; There has been treatment or conservative therapy.; Neck pain Acute thoracic back pain Lumbosacral radiculitis; Patient was sent to Physical Therapy and given medications to help with inflammation and pain

R/O HNP; This study is being ordered for a neurological disorder.; 11/21/2015; There has been treatment or conservative therapy.; pain  numbness  tingling; Anti inflammatories  Home monitored exercises

Radiculopathy, low back pain, weakness, parathesia, Physical Therapy ineffective and NSAIDS ineffective.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Radicular pain and symptoms down one leg and trouble sitting/getting up after long periods (weakness); The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Recent MVA resulting in new, acute pain on top of patient's known chronic pain. Patient has been unable to tolerate physical therapy measures for the pain and reports no improvements since accident on 11/01; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Rule out blood flow obstruction to Left leg, r/o Abdominal aortic aneurysm, nerve impingement, bulging/herniated disc etc; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/1/2015 gradually getting worse. Increased pain and temp changes to extremity. Weakness Numbness tingling on Left Lower Extremity; There has been treatment or conservative therapy.; Pain, weakness, numbness tingling, claudication,; Steroid injection in clinic oral prednisone, pain medications and anti-inflammatory and CT ABD PELVIS last month

Sciatica LLE; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above

Scoliosis present; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; 3+ leg jerk with pain

See ICD 10 code per MDO; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness of R leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Still having pains in back, now having numbness down Left leg. LOP severe and nausea with any movement x week. radiating down left leg. numbness from knee to foot. doing PT but not helping. numbness is new. has done PT 4 weeks and NSAIDS and back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

TENDER TO LEFT LOWER BACK JUST LATERAL TO SPINE (L1-L3); The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The patient suffered an injury at work; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.

The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Known or suspected tumor with or without metastasis

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient does NOT have acute or chronic back pain.; The patient has Neurological deficit(s); This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.

The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s); The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

THERE IS A 2CM OVAL MASS, NON-MOBILE MASS LEFT LATERAL T SPINE, MILDLY TENDER TO PALPATION, 1CM FIRM NON-MOBILE MASS TO LEFT LATERAL L SPINE, VERY TENDER TO PALPATION; This study is being ordered for a neurological disorder.; ; There has not been any treatment or conservative therapy.;

this patient has had back problems for 10 years, but recently re-injured back. they are having radiculopathy along with back pain; This study is being ordered for trauma or injury.; 10/12/15; It is not known if there has been any treatment or conservative therapy.; back pain, with radiculopathy

this patient has had this pain for going on 6 weeks. she has parathesia in the arms and legs. she is a diabetic and her blood sugar is running high because of the pain; This study is being ordered for a neurological disorder.; 08/19/15; There has been treatment or conservative therapy.; neck pain, back pain, numbness in arms and legs and toes, tingling in fingers, left arm twitching; hydrocodone-acetimenophin, flexeril

unable to lift pt.; This study is being ordered for trauma or injury.; 10/26/2015; There has been treatment or conservative therapy.; Muscle weakness, decrease range of motion; steroids, medication, some PT and injection
unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

unknown; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; legs are really weak and having numbness and tingling in both legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

unknown; This study is being ordered for a neurological disorder.; 10/2015; There has been treatment or conservative therapy.; decreased mobility, joint tenderness, trouble sleeping, spasms, weakness, disc degeneration; PT and medication

We are sending patient to an orthopedic surgeon. These tests are needed so he can be seen and get his pain taken care of.; This study is being ordered for Inflammatory/ Infectious Disease.; March 26th of 2015; There has been treatment or conservative therapy.; decreased range of motion, sever pain; Radio frequency by orthopedic dr
We will need a fax number to provide the PT notes.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

worsening back pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pt has known herniated disc at L4-L5 and L5-S1. she has recently started having worsening back pain and we are needing an updated MRI to see if there has been a change; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.

; This study is being ordered for trauma or injury.; pt. had the four wheeler fall on him 11-01-15.; There has not been any treatment or conservative therapy.; spinous process tenderness L3-L4. negative right ankle brachial reflexes.

Duration of Symptoms: Start: 10/21/2014; Physical Exam Findings: Pelvic pain x 1 year with Dysmenorrhea. US limited due to difficulty in fully visualizing. 5.3 hypoechoic structure etiology unclear noted on US. Possible Right adnexal mass could not be exc; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.

member has a lump and it painful; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.

Pain; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.

patient had abnormal ultrasound; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.

Patient has been having pelvic pain with bleeding for a few weeks. The Dr. feels it could be an ovarian cyst and needs a CT to make sure before any treatment is given; The patient has painful hematuria.; It is unknown if the patient has had an IVP (intravenous pyelogram).; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.

Patient is having pelvic pain with a possible pelvic fracture. Patient is unable to bear full weight due to this fracture.; This study is being ordered as a follow-up to trauma.; There is NO laboratory or physical evidence of a pelvic bleed.; There are no physical or abnormal blood work consistent with peritonitis or pelvic abscess.; There is physical or radiological evidence of a pelvic fracture.; "The ordering physician is not a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

PT HAD HYSTERECTOMY IN 2006. OVARIES OBTAINED. HAVING VAGINAL BLEEDING. HAD CT ABD/PELVIS IN 2014 SHOWED SOME VASCULAR CALCIFICATIONS.; This study is being ordered due to known or suspected vascular disease.; The ordering physician is not a surgeon or PCP who is ordering on behalf of a surgeon who has seen the patient.; There is plain film, ultrasound or Doppler evidence of a vascular abnormality.; This is a request for a Pelvis CT.

Pt has been on several rounds of antibiotic and as soon as antibiotics are out he starts back getting prostatitis and abdominal pain comes back and blood in urine again/ but when on the antibiotics is asymptomatic / Pt has Dysuria; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "There are no physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.

Small Bilateral Hydroceles small varicoceles on the upper left hemiscrotum and nonenhancing mixed echotexture process likely representing herniated mesenteric fat . recommend correlation with a follow up CT of the pelvic extending through the scrotum for ; The patient has painful hematuria.; It is unknown if the patient has had an IVP (intravenous pyelogram).; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.

Started having abdominal pain 4 days ago, initially thought it was gas pain, took some MOM, getting worse and after 2 days couldn't even sit up straight. Went to the ER last night but didn't want to wait so went back home before being seen. Pain is low; The patient has painful hematuria.; The patient has not had an IVP.; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.

unknown; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.

urine test came back with moderate blood. Urine culture is still pending.; The patient has painful hematuria.; The patient has not had an IVP.; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.

will fax clinical info; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; February 2014; There has been treatment or conservative therapy.; chronic hip pain; physical therapy, tramadol for pain ; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;;

bypass; This is a request for a Pelvis MRI.; It is not known if this is a preoperative study.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess.

has history of tarlov cyst , needs follow up MRI every few months to make sure healing properly; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10-14-15; There has not been any treatment or conservative therapy.; Abdominal swelling mass and lump

Please schedule for MRI of Pelvis with and without dye at WCMC due to abnormal CT of pelvis showing possible fibro recommending MRI....JLR APRN; This is a request for a Pelvis MRI.; The study is being ordered for joint pain or suspicion of joint or bone infection.; The study is being ordered for something other than arthritis, slipped femoral capital epiphysis, bilateral hip avascular necrosis, osteomyelitis or tail bone pain or injury.

She did have an incidental finding of a nodule to her left adrenal gland.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 months ago; There has been treatment or conservative therapy.; muscle weakness and pain; meds

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or joint infection.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

Yes, this is a request for CT Angiography of the upper extremity.

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

< Enter answer here - or Type In Unknown If No Info Given. >; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Still painful and was giving home exercise to do at home; The patient received oral analgesics.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Decrease range of motion to the right shoulder, suspected rotator cuff tear

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; decreased ROM

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Has had pain in the right shoulder for a few months. Was throwing a football on 10/14/15 and had sharp pain.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; left shoulder pain and stiffness

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; patient has been healing from a left humeral neck fracture and we released him 1 month ago but he has began to notice worsening left shoulder pain that appears to be primarily in the joint. He does have some tenderness to palpation along the posterior mu

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt has decrease range of motion. Abduction, flexion and extension

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; suspected rotator cuff tear xray in er were inconclusive pt did follow up given pain med in er no relief cannot raise arm

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; unknown

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; xray showed ((oct 7) arthritic -patient had rotator cuff injury years ago degenerative changes of ac joint glenohumeral

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is NOT experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; The patient is experiencing joint locking or instability.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has not had recent plain films of the shoulder.;

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; pt is being scheduled to see an orthopedic surgeon for possible surgery evaluation

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are no physical findings (palpabel mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has not had recent plain films of the shoulder.; < Enter answer here - or Type In Unknown If No Info Given. >; The patient has not had a recent CT of the shoulder.

The requested study is a Shoulder MRI.; The pain is described as chronic.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

The requested study is a Shoulder MRI.; The pain is described as chronic.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The requested study is a Shoulder MRI.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for follow-up.; The study is requested to detect residual cancer after a course of treatment has been completed?; The request is for shoulder pain.

The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

The requested study is a Shoulder MRI.; The pain is from a recent injury.; There is a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; There is not a suspicion of tendon, ligament, rotator cuff injury or labral tear.

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The ordering physician is not an orthopedist or infectious disease specialist.; The patient has had recent plain films of the shoulder.; The plain films were normal.; c/o neck back and shoulder pain. complete pt for shoulder and still hurting. been taking alleve 2 at night.

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The patient has not had recent plain films of the shoulder.; extremity abnormal motor strength (2/5 right shoulder to anterior and lateral flexion reduced secondary to pain). Joints, Bones, and Muscles: limited ROM (decreased from right shoulder to anterior flexion and IR

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

unable to lift pt.; This study is being ordered for trauma or injury.; 10/26/2015; There has been treatment or conservative therapy.; Muscle weakness, decrease range of motion; steroids, medication, some PT and injection

unknown; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

unknown; This study is being ordered for a neurological disorder.; 10/2015; There has been treatment or conservative therapy.; decreased mobility, joint tenderness, trouble sleeping, spasms, weakness, disc degeneration; PT and medication

will fax; The pain is not from a recent injury, old injury, chronic pain or a mass.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/09/15; There has been treatment or conservative therapy.; Pt suffers from right arm numbness, hypertension and hypotension.; Medication; carotid doplar; Pt has different blood pressure reading in arms: Left reading high and right reading low.

Dr did a plain film on the pt with inconclusive findings. Want the CT for a better look. Pt can not have MRI cause he has a pacemaker.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/2015; There has been treatment or conservative therapy.; Pain in the knees.; Pt was put on anti-inflammatory medication with no improvements.

This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.

This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.

This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an ankle CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; There is not a suspected tarsal coalition.; The patient does not have a documented limitation of their range of motion.

x-ray report was abnormal and suggest a CT. Report states that pt. has a proximal tibial metaphysis. Shows a lesion.; This study is being ordered for trauma or injury.; 11-4-15; There has been treatment or conservative therapy.; pain, swelling, unable to walk on right leg and foot.; pt. was placed in brace and non weight bearing with crutches with no relief

Rule out blood flow obstruction to Left leg, r/o Abdominal aortic aneurysm, nerve impingement, bulging/herniated disc etc; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/1/2015 gradually getting worse. Increased pain and temp changes to extremity. Weakness Numbness tingling on Left Lower Extremity; There has been treatment or conservative therapy.; Pain, weakness, numbness tingling, claudication,; Steroid injection in clinic oral prednisone, pain medications and anti-inflammatory and CT ABD PELVIS last month

Yes, this is a request for CT Angiography of the lower extremity.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; It is not known if the study is requested for knee pain; The study is not requested for any of the standard indications for Knee MRI

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/2015; There has been treatment or conservative therapy.; Diagnosed with pseudo cushion.; Physical therapy

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2015; There has been treatment or conservative therapy.; was working out and heard a load pop and made he fall and has had swelling; MRI, injection, medication and is following up in a week

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9-3-15; There has been treatment or conservative therapy.; joint pain, right lower leg pain, numbness and tingling; ibuprofen, home physical therapy, hot and cold therapy

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; severe pain in knee, lumbar spinal stenosis

; This is a request for a foot MRI.; The study is being ordered for known fracture.; The study is NOT being ordered for a routine follow up or for a possible non union fracture.

; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; ; The patient received medication other than joint injections(s) or oral analgesics.

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

1. musculoskeletal pain  Onset: 6 weeks ago. It occurs intermittently. Location: right knee. The pain is aching and dull. Context: there is an injury. Trauma type: fall, occurred at home. The pain is aggravated by bending, walking and standing. A; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; There is no conservative treatment of Physical Therapy, physician directed course of non-steroidal medications, Immobilization or Physical directed exercise. 49 year old male w/ knee pain for about one month; joint pain. xray showed No abnormalities.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks. abnormal x-ray; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

CHRONIC KNEE PAIN ,worse when walking , has tried medication nothing is helping , more he is on his feet the worse his knee gets; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The results of the plain films is not known.; There are no documented physical or laboratory findings of a joint infection.; Known or Suspected Joint Infection

Foot/ankle - Right: pain.; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

Injections, pt has denied surgery due to payment and md wants to check the knee out.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; There is conservative treatment other than physical Therapy, physician directed course of non-steroidal medications, Immobilization or Physical directed exercise.

injured ankle, went to er, normal xrays, still hurting , swelling, using crutches; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

injury 4 months  reinjury nov 15  did own p.t regimen since 4 months ago  persistent pain and edema  XR done and slight narrowing of joint space; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Look for a tear; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; There is conservative treatment other than physical Therapy, physician directed course of non-steroidal medications, Immobilization or Physical directed exercise.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

MDO bypassing Medical Necessity Questions; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.

MENISCAL TEAR; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

meniscus and ligament tear; This study is being ordered for trauma or injury.; 11/42015 elbow; It is not known if there has been any treatment or conservative therapy.; knee and elbow pain

Neg x ray of knee on 10-08-15 has been seeing chiropractor and has had steroid burst and Fexerial pm for muscle spasms and shoulder pain.; This study is being ordered for trauma or injury.; mva 02-06-2015; There has been treatment or conservative therapy.; Lt shoulder pain with neck pain numbness tingling burning and headaches. low back pain into left leg neg ct of lumbar c spine and t spine on 02-06-15. Pain has gotten worse in shoulder and left leg with Lt knee pain and Lt ankle pain.; pt has had steroid burst, taken fexeril pm and hydrocodone 10mg 325 and has seen a Chiropractor and rest but the pain has increased.

NO; This study is being ordered for trauma or injury.; several years ago reinjured 11/02/2015; There has been treatment or conservative therapy.; The Pt has severe pain with prior injury and fractures. Pt is unable to ambulate.; The Pt has medication therapy, heat, wrap.

none; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

old football injury with no improvement. exam findings consistent with ACL tear. MRI to evaluate for ACL tear; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

Patient got injury on 9/30 he fell/non weight bearing crutches/ pt has swelling and pain; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Patient has been having severe pain in the knee for 3 months. XRay completed concerned about medial meniscus tear.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

Pt has sharp, tingling pain in knee that is worsening and not improved with pain meds. It interferes with sleep and work.; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Pain greater than 3 days

range of motion is limited to due tenderness; This study is being ordered for Inflammatory/ Infectious Disease.; Patient has had this pain, swelling and warmth to bilateral knees for greater than six weeks. Only getting worse and starting to buckle when ambulating.; There has been treatment or conservative therapy.; Swelling, popping and cracking upon rotation, tenderness to touch and palpation. Pain.; Physical therapy for weeks as well as NSAID's.

right knee swelling and in a lot of pain; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

source of pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; months; There has been treatment or conservative therapy.; pain and swelling, hard to walk; medications, injections, physical therapy

Swelling, pain for 1-2 months. Has tried NSAIDS and knee brace. Palpable fluid.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

The patient has had a cortisone injection without relief. She has also tried NSAIDs (Naproxen and meloxicam) with no relief; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; It is not known if there is documented findings of delayed healing.; There are no documented physical or plain film findings of prosthetic device dislocation.; ; Post-operative Evaluation

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are no documented physical or plain film findings of delayed or failed healing.; There are no documented physical or plain film findings of prosthetic device dislocation.; continued pain since surgery 10/2015; Post-operative Evaluation

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are no documented physical or plain film findings of delayed or failed healing.; There are no documented physical or plain film findings of prosthetic device dislocation.; possible tear; Post-operative Evaluation

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Swelling greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; Exostosis, possible osteochondroma, of the proximal fibula.; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; The patient received oral analgesics.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).

This is a request for a Knee MRI.; This study is being ordered prior to arthroscopic surgery.; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Locking

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; There is not a suspected tarsal coalition.; The patient does not have a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; There is not a suspected tarsal coalition.; The patient does not have a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

Unknown.; This study is being ordered for Inflammatory/ Infectious Disease.; November 2015; There has been treatment or conservative therapy.; Weakness and pain; Patient is compliant with therapy. Regular exercise

Unknown; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.

unknown; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Xray; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

x-rays completed 10-07-2015; home exercise; ice; meds; This study is being ordered for trauma or injury.; 09-26-2015; There has been treatment or conservative therapy.; left ankle and foot pain; medication

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; On going pain for years; Pain began to worsen 8/2015; There has been treatment or conservative therapy.; Bilateral pain; Worsened over the years; Pain pills and steroid injections helped only a little- Pain eased up but still present; Unable to complete daily activities or stand for long period of times; Tenderness; limited range of motion; Unable to bare a ; Steroid hip injections; Different RX's; Seen rheumatoid specialist; PT

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; February 2014; There has been treatment or conservative therapy.; chronic hip pain; physical therapy, tramadol for pain ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-9-2013; There has been treatment or conservative therapy.; PAIN AT REST AND LYING DOWN, LBP, HIP PAIN; HIP REPLACEMENT, THERAPY, MEDICATION

Mr. WILLIAMS presents with a diagnosis of passenger injury in MVA. This was diagnosed 10 days ago. The course has been progressively worsening. It is of severe intensity. They were traveling at 60 MPH and another vehicle pulled in from of them trying to c; This is a requests for a hip MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.

patient had a fall last week. It gave her trouble. we ordered xray which confirmed she has a fracture. asked to order mri.; This is a requests for a hip MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.

This is a requests for a hip MRI.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for staging.; The hip pain is due to a mass.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.

This patient is in a great deal of discomfort.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; The initial onset date was on March 16th of 2015.; There has been treatment or conservative therapy.; The primary symptoms: Pain in the patients hip, and back that is radiating down her left leg.; 1. Hip Injections of Depo Medrol. 2. Physical Therapy 3. Medrol Dose Pack 4. Norco 7.5 5. Referral to the orthopedic doctor. 6. Mobic 15 7. Home exercises

to rule out fracture; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient has idiopathic neuropathy; There has been treatment or conservative therapy.; stabbing pain in both hips; patient has been treated with steroid treatments

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 12/04/2015; There has been treatment or conservative therapy.; shortness of breath//tenderness and swelling in the right upper quadrant//pain//elevated alt levels; medication without relief

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/13/2014; It is not known if there has been any treatment or conservative therapy.;

10/08/2015   Physical Exam Findings: multiple liver lesions noted on CT scan. Radiologist recommend CT Abd with Hemangioma. Abnormal Mutiple liver lesions 10/08/2015; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

Abdomen: Bowel Sounds: normal. Inspection and Palpation: no guarding, masses, rebound tenderness, or CVA tenderness; epigastric tenderness and LUQ tenderness; and non-distended.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

abdominal pain constipation/ blood in stool /ongoing for about 2 weeks and getting worse. xray was normal; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

abdominal pain with nausea and vomiting over 10 days; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Abdominal palpitation revealed abnormalities protusion , tenderness above umbilicus. Would like to rule out Incarcerated ventral hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

abnormal liver function studies/AST is 61/ALT is 93/; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

abnormal ultrasound, possibly liver parenchymal disease; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

adrenal hypertrophy found on previous CT scan; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Calculus of left kidney and chronic low BP.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

DM2 patient uncontrolled. Obese patient with RUQ pain and palpable soft density; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis
follow up to abnormal CT; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

For Hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

For lymphoma; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

found pollup on gall bladder; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

LBP; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new symptoms including hematuria.

mass in gall bladder possibly; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

Mid abdominal pain, MD wants to rule out right side mid ventral hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Moderate to severe left upper quadrant pain for 2 weeks. Normal UA & bloodwork.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Patient complains of hurting in his lower abdomen and across bladder. Patient has had bright red blood with bowel movement. Patient rates their pain 7-8 and has had to be seen in urgent care for this same issue.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

patient had ultrasound which revealed low potassium, focus on adrenal gland.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Patient is experiencing ulcer disease, right sided lower back pain, gastro paresis, and upper abdominal pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

pt has abdominal pain. insomnia due to the pain. diabetic. thrombocytopenia.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

Pt has had elevated liver and pancreatic enzymes since March 2015. They have remained high, and gotten slightly higher; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

PT HAS HAD EPIGASTRIC ABDOMINAL PAIN FOR THE LAST 3 MONTHS. HAD EGD THAT CAME BACK NORMAL. HAS LOWER STERNAL TENDERNESS. HAD AMYLASE AND LIPASE LABS DONE AND BOTH WERE NORMAL. TRYING TO FIGURE OUT WHAT IS CAUSING THE PAIN.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

pt has had normal colonoscopy normal, US; continued pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

R lower pain for two weeks now and the pain is getting worse.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

RIGHT UPPER QUADRANT PAIN,BACK PAIN AND BLOATING ULTRASOUND-NEGATIVE NEXIUM AND RANITIDINE STARTED -NO RELIEF ALL LABS -NORMAL FEVER-NONE; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

severe abdomen pain x 2 months; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

swelling main problem; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

The patient has been complaining of left upper quadrant pain. He was taking ibuprofen for fever. The pain has been waking him up several times in the middle of the night. It is very tender to the touch. On physical exam, he had severe upper quadrant pain ; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a Is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is not newly diagnosed, it's known previous history.; There are new signs or symptoms other than hematuria.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.

This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.

This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; There is no evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Inflammatory bowel disease.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Diabetic patient with gastroparesis.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.; The hematuria is newly diagnosed.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Lymphadenopathy.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.

upper quad pain, nodule found on her liver, patient has had recent metastatic breast cancer. Weight lost and pain unrelieved.; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; Yes, this is a repeat of a CT of the abdomen within 6 weeks.

Angina/Chest Pain   Reported by patient.  Location: chest; middle scapular; does not radiate  Quality: pressure; aching Severity: moderate  Duration: started 2weeks ago; lasts from minutes to hour  Onset/Timing: nocturnally (noted with first episod; This study is being ordered for Vascular Disease.; 10/22/15; There has not been any treatment or conservative therapy.; chest pain that woke patient from sleep

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;

< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; November 25 2015; It is not known if there has been any treatment or conservative therapy.; radiculopathy Cervical Hematuria and Nephrolithiasis /Right flank pain urgency in urination/ history of Nephrolithiasis /

. acute blood loss gaurding abd destention tenderness in left lower quad tachycardia blood in urine neg preg; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

.&#xOD; Physical Exam Findings: Pt had US 05/23/14 in Van Buren Arkansas. Was never followed up by PCP. Right Hydronephrosis with fluid dorsal to bladder with free intraperitoneal fluid. It was recommended then by radiologist to have CT abd and Pelvis with con; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.

; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.
; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for Inflammatory/ Infectious Disease.; pt. has initial onset on 10-12-15; There has been treatment or conservative therapy.; abdominal pain, chest pain; pt. was placed on antibiotics, chest x-rays, and anti-inflammatory medications.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has abdominal and chest pain, night sweats and elevated WBC.; There has not been any treatment or conservative therapy.; abdominal pain, chest pain, leukocytosis and night sweats. unexplained. needs ct to r/o lymphoma

1. Bilateral nonobstructive nephrolithiasis more prominent on the left than the right and progressive from the exam of 2011.; 2. 3 cm left renal hypodensity appears relatively unchanged, presumed cyst but could not be definitively characterized on this ; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.

abdominal pain with cramping for 4-5 weeks, worsened the past few days with nausea and diarrhea. white blood cells were elevated, concerned about diverticulitis or gastritis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.

abdominal pain,vaginal bleeding,nausea,vomiting,bloating,heartburn,diarrhea,pain and bleeding with intercourse.  The severity of the problem is moderate. The location is peri-umbilical, right lower quadrant and left lower quadrant. The quality of the pa; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Abnormal HIDA scan ; r/o need for cholecystectomy; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

Associated symptoms include weight lost with no intention except for loss of appetite, or other symptoms include generalized abdominal pain, nausea,; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

chronic abdominal pain, constipation, pain radiates to her back; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Chronic contipation, recent abnormal weight loss, chills, nausea, feeling of early satiety, abdominal pain.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

Chronic radicular pain of lower back.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

COLON CANCER/ Caller is the PCP. Colon Rectal Surgeon recommended (Lance Burns MD, phone number is (501)664-2432- To see if there is metastasis.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

CT abd/pel- rule out mass seen on previous abnormal abd exam 01/16/2014; CT chest r/o heart damage- patient thought she had a heart attack (patient had previous MI); This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/04/2015; There has not been any treatment or conservative therapy.; chronic chest and abd/pel pain-

elevated white blood cell count, R/O appendicitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

elevated white blood count (17.7); This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

epigastric pain and discomfort that radiates to the shoulder blades for the past 24 hours. The symptoms are constant, and described as a deep boring discomfort. There is some right upper quadrant pain too. Does have past medical history peptic ulcer disease; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed. FEVER, FATIGUE; This study is being ordered for Inflammatory/ Infectious Disease.; SEPT 1, 2015; There has been treatment or conservative therapy.; HIGH FEVER; ANTIBIOTICS

Flank (renal) pain hx of endometriosis, may be related; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.

follow up to liver mass with biopsy showing fibrosis, and 10mm lung nodule; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; lung nodule and liver fibrosis; There has been treatment or conservative therapy.; abdominal pain, lower left quadrant weakness, inability to walk; patient was recently hospitalized, then discharged with home health and physical therapy

guarding with abdominal/pelvic pain, r/o diverticulitis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.

Guarding, on right side flank pain. Hematuria; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

had night sweats and has tachycardia, rule out any mass; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

hematuria; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

HERNIA IS PRESENT IN THE RIGHT INGUINAL AREA; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

HIGH WHITE BLOOD COUNT; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

History of renal cell carcinoma,unintentional weight loss, fatigue, night sweats u; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Hx of kidney stones; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

incarcerated 11/3/15, had problems urinating, nausea and vomiting. She has had IV fluids and a catheter and still having problems. Review of symptoms are positive for abdominal pain, low right side and right flank pain, and polydipsia. Findings on the phy; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Increased in size METS- Lung METS and Brain and bone cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

LLQ tenderness and RLQ tenderness; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

LLQ tenderness to palpitation of the abdomen; history of renal stone; the previous stone from 02/2015 had similar presentation; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

mass removed in 2010, blood in stool; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.
mestinal hilar adnopathy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/21/2015; There has not been any treatment or conservative therapy.; abnormal diagnostic imaging (ct angio coradid)

no; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/2013; There has not been any treatment or conservative therapy.; unexplained weight loss patient has lost over 45lbs since 1/2013 with no diet or exercise change which is causing blood pressure to drop

none; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

None; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

Patient complains of right lower abdominal pain for almost one week. Area tender to palpitation. Patient reports pain worsens with movement. White blood cell count 14.1. CRP at 0.60. suspicious for appendicitis versus diverticulitis.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Patient has a possible incarcerated umbilical hernia.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

PATIENT HAS HEMATURIA AND FLANK PAIN UPON CLINIC ASSESSMENT; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.

Patient has hematuria, flank and abdominal pain. R/O kidney stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Patient has persistent elevated CRP, mild increase in liver enzyme studies. Patient had cholecystectomy in August and an essentially normal upper GI study in September but complains of consistent abdominal pain.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

patient is having abdominal pain with nausea and diarrhea; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.

Patient is having severe abd pain. Blood and Leuks in urine. Sharp pains. Plain films obtained.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

patient seen in office 12/21/15 for follow up visit from 11/19/15. was treated for fluid overload from Nov visit. Complains of Shortness of breath as usual, cough, chronic diarrhea, decreased appetite, and weight loss. She is a current everyday smoker wit; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Pelvic mass, upper abd pain, chronic diarrhea.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

periumbilical pain with swelling that is getting worse. Pt also is experiencing dysmenorrhea for several months now, but a pregnancy test was negative; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

persistent right upper quadrant pain. No rebound. Does have guarding. Needs CT for further evaluation; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Positive for calcium-oxalate crystals in urine.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

pt c/o LLQ pain, has personal history of diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

pt had a MRI that showed a mass; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Pt has been experiencing severe abdominal pain for the past few weeks along with irregular vaginal bleeding. She had an abnormal abdomen xray today that showed a possible small bowel obstruction; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

PT has infection.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; It is not known if the urinalysis was positive for bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.

Pt has pain in rectal area and has trouble with bm.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.

Pt has severe abd pain that was sudden. Bloating/swelling noted, Weight gain, and tenderness; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

pt is experiencing elevated white count and rebound tenderness in right lower quadrant.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

Pt is having pelvic pain, dysuria and blood in urine; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

pt still having pain in low back and low abd. She has a longstanding hx of low back pain, but her abd pain seems to be a newer c/o. Was originally evaluated by Dr. Saul for this on 10/5. Was given Flomax for possible kidney stone. She followed up with me ; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

r/o appendicitis vs tubal ovarian abscess; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; It is not known if the urinalysis was positive for bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

R/O kidney stones; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Rectal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

RIGHT AND LEFT UPPER AND LOWER ABD QUADRANT PAIN, NAUSEA, PAIN WORSENING WITH RADIATING PAIN TO THE BACK; This study is being ordered for Inflammatory/ Infectious Disease.; REBOUND, EPIGASTRIC, TENDERNESS, LLQ,  History of Present Illness:  1. abdominal pain  The severity of the problem is moderate. The problem has worsened. The location is right upper quadrant, right lower quadrant, left upper quadrant and left lower quadra; There has been treatment or conservative therapy.; STARTED 9/22/2015, CONSTANT, MODERATE, ABD PAIN, LOW BACK RIGHT SIDE, RADIATES TO UPPER BACK, SPASMS, WEAKNESS, RIGHT UPPER ABD AND LOWER QUAD, LEFT UPPER ABD/LOWER QUAD PAIN, BLOATED, NAUSEA; DEXAMETHASONE IM, HEAT PACKS, MELOXICAM, MEDROL DOSE PACK, TYLENOL, ADVIL, CLONAZEPAM

Stone in gall bladder; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed a Kidney/Renal cyst(s)

suspicious node on previous Pelvic CT; This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.

The patient has urinary frequency, bilateral flank pain that began 2 days ago, trying to R/O kidney stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a strong suspicion of kidney or ureteral stones.; It is not known if this patient is experiencing hematuria.; Kidney/Ureteral stone; Unknown

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Palpable large abdominal pain in his left upper quadrant on physical exam

This is a request for an abdomen-pelvis CT combination.; It is not known if this is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; It is not known if this is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; It is not known if there is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; It is not known if there are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; It is not known if there is a palpable or observed abdominal mass.; Ept needs abdominal pelvic ct. with contrast. due to abnormal alpha feto protein tumor marker and elevated LFTs. Has had previous breast cancer. Moved here from another state.

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Acute Non-ulcerative Colitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Inflammatory bowel disease.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; r/o diverticulitis and nephrolithiasis

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Patient has shortness of breath, vomiting, appetite change, and diarrhea.

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.;

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; severe abdominal pain, nausea, vomiting, tenderness on exam,

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation; Patient had hernia surgery back in July of 2015 and has been complaining of pain in region for the past six weeks.

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation; two years of abd pain started getting worst in the past two weeks  Patient had a c section 3 months

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is NOT requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; The pre-op evaluation is for planned or possible ventral hernia repair ordered by a surgeon.; Pre-op or post op evaluation

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is NOT requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; The pre-op evaluation is not for planned or possible ventral hernia repair ordered by a surgeon.; The pre-op evaluation is not for a known tumor excision.; The pre-op evaluation is not for a known abdominal infection.; Pre-op or post op evaluation; This is for an Incisional Hernia from a previous abdominal surgery.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Diabetic patient with gastroparesis.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Lymphadenopathy.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Inflammatory bowel disease.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Ulcerative Colitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Follow up to abdominal pain. Patient went to ER for abdominal pain .

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; nausea, vomiting, RLQ abd pain

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Was concerned this pain and bloating is being caused by the over growth in bacteria due to her virus 1 month ago and causing some colitis. Treated patient with 2 different antibiotics and when antibiotics were finished patient was not any better. Would li

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Duration of Symptoms: Start: 11/08/2015   Physical Exam Findings: diarrhea, abdominal pain, RLQ FURTHER EVALUATION, R/O:APPENDICITIS

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; patient is having abdominal pain with history of abdominal hernia, episode of nausea, vomiting with continued abdominal pain and soreness

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; r/o diverticulitis

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other;

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; ABD PT in lower right quadrant.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abdominal and pelvis tenderness, abnormal finding in urine not specified moderate and worsening pain burning tenderness to the touch

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abdominal pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abdominal Pain for 6 weeks in duration. Normal gallbladder ultrasound. Continued nausea without vomiting due to promethazine.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abdominal pain for weeks, involuntary guarding on exam.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; abdominal pain, r/o protrusion possible hernia at belly button area, pain for 2-3 weeks, onset appeared 2-3 weeks ago without notice prior,

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abnormal pelvic exam and ultrasound

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abnormal X-Ray, having abdominal pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Answered no

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Continued abd. pain, intermittent low-grade fevers, nausea, no vomiting, foaming mucus stools. RLQ pain extends to pelvic area. R/o Appendicitis or Ovarian Cyst.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Diverticulitis  Diabetes mellitus Abdominal pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Frequent sharp stabbing abdominal pains and UTI with frequency and urgency.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; GENERAL: well developed, well nourished, in no apparent distress  GASTROINTESTINAL: normal bowel sounds; no masses or tenderness; no organomegaly  GENITOURINARY: bladder: normal; CVA Tenderness present on the left  MUSCULOSKELETAL: grossly normal tone

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; hernia on palpations

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; HPI  Mr. Gossett comes in for a follow-up visit. He was seen 1 month ago for LLQ abdominal pain. He reports his abdominal pain has not improved. It has actually worsened over the past week. He denies changes in bowel or bladder habits. No fever or

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; hx of diverticulitis, patient has a fever, patient has infection in the left lower quadrant.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; intermittent vomiting and feels sick frequently the last few days, Has some mild diarrhea. stat she has had intermittent lower abd pain and cramping the last several months. she has had and US that did not show acute findings

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Left abdominal pain x 4 months, nausea with no vomiting, pain radiates to her back

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; lower ABD Pain!!

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Lower abdominal pain and diarrhea

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; lower abdominal pain, decreased urination, dark orange urination

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Nausea, vomiting, diarrhea and fever for 3 weeks

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; No clinicals available

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; none

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; nonr

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pain after eating-

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Palpation: Abdominal palpation revealed abnormalities, diffuse abdominal pain more in the midepigastic,RUQ, and LLQ. Hernia: A hernia was discovered, small umbilical hernia.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient experiencing abdominal pain, elevated liver functions, weak and has difficulty performing daily activities. Continued weight loss.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient had an Ultrasound that showed an ovary that should not be there. This CT is needed to re-evaluate that situation.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient has been having abdominal pain for the last 6 weeks, history of diverticulosis, left lower quadrant pain, bowel sounds are hyperactive.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has chronic rt and lft flank pain for 2 years. Acute cystitis with sharp pains. Frequency of urination.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has had abdominal pain epigastric pain and left lower quadrant pain for two months. Patient has had colonoscopy that was normal. No nausea, vomiting or diarrhea Increase in GERD symptoms.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient has had abdominal pain with diarrhea x 3 weeks. She has taken antibiotics to treat colitis as she has a history of this. she completed the antibiotics but still with symptoms. we request CT of abdomen and pelvis for further evaluation.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has had moderate to severe right flank pain and abdominal pain for 1.5 weeks. His CBC came back with elevated WBC count. Was worried he was trying to pass a stone however, he had a urinalysis done that came back clean.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has not had her menstrual cycle in a while and the pain is in pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has peritoneal pain/ anorexia.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has suffered for quite some time, and she seems to be getting worse. I am thinking that there may be a cyst in her abdomen or pelvis causing her pain and worsening of symptoms.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient is experiencing left lower quadrant abdominal pain. She has also had nausea and vomiting as symptoms. We are trying to rule out any kind of ovarian cyst or stone.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient is having abdominal pain, constant for over 1 week, bowel habit changes, and nausea. She has not traveled any where and no one around her is ill.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient reports that she also has symptoms of belching and constipation.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient's had lower quadrant pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pelvic pain, difficulty urinating,

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Positive for nausea, vomiting, abdominal pain and diarrhea.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt experiencing abdominal pain 3 weeks duration, moderate intensity, meals aggravate, nausea/bloating, gall bladder ultrasound was negative with expectation of constipation

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; PT has been having abdominal pain for about 2 months. PT bowels are irregular. Pain is worsened with abnormal plain film.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has had unexplained generalized abdominal pain for other a month with no relief

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pt has upper quad pain radiates to back has nausea no vomiting

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt lipase came back high.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; recurrent urinary tract infections, two rounds of antibiotics with no changes

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; RLQ pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; RUQ pain; r/o hernia

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; SOURCE ABDOMINAL PAIN , DIVERTICULITIS.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; SUPRAPUBIC; HURTS INTO HER THIGHS, CHEST PAIN, TENDERNESS

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; The mother is in a medical field , fever, lower abd pain , clammy had a good bm last night and this morning , rule out appendicitis , pt denies any injury.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; The Pt has lower abdomen pain hurts getting up or sitting down, right side X 1 month.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; to make sure bile duct is not blocked

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Ultrasound showed lesion

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; UNKNOWN

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Vomiting   Reported by patient.   Notes: Patient is here today with his mom due to vomiting. Patient's mother states that it first started last spring and happened twice where lasted a week or so each time. She states that he has no other symptoms and

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement

This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is not experiencing hematuria.; Kidney/Ureteral stone; pain for 5 days middle back radiating pain injection with no relief

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement;

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; elevated hmh/pain

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Patient is having trouble urinating and it is due to enlarged prostate

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Onset of lower abdominal pain with mild rebound. Mass felt on exam on right lower quadrant.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; patient as a very large palpable mass the extends from the upper abdomen into the pelvis. patient has noticed for 3 weeks, and has come into the office for evaluation. dr perser needs this ct asap to find out what this mass is.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Pt had abdominal surgery in Oct. Hasnt had normal stool since. On physical exam, mass was palpated. Pt has pain in abdomen.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor;

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; patient has been treated for shingles and for kidney stones and kub was negative, and abdomen pain

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor;

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; <Enter Additional Clinical Information>

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; hernia

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; patient is having a lot of pain

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Pt has generalized abdominal pain

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Pt has sever abd pain associated with it.

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; It is not known if there is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; Went to ER for abdomen pain and vomiting. Going on for several weeks.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; Caller does not know if there is a known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.; &Enter Additional Clinical Information&

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has been a recent previous abdominal and or pelvis CT scan.; This would be a repeat of a CT of the abdomen and or pelvis within 6 weeks.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.; Please see PDF fax on original case.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; No, there is not a palpable or observed abdominal mass.

Yearly CT scan

This is a request for an abdomen-pelvis CT combination.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; Trauma

This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; It is not known if there is recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Trauma;

This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Trauma; Abnormal finding on an x-ray. Small nodule

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.

ultrasound came back fine, recom CT; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.

Unknown; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria. urq pain; nausea; abd tenderness and guarding; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

weight loss, right pleural effusion, anemia, elevated platelets, and hyponatremia; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if there is suspicion of metastasis.

HAS A MAN WRAPPED AROUND HIS PANCREASIS; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10-14-15; There has not been any treatment or conservative therapy.; Abdominal swelling mass and lump

She did have an incidental finding of a nodule to her left adrenal gland.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; The patient has not had an IVP.; unknown

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are not physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; "There are no active or clinical findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There is radiographical or ultrasound findings consistent with abnormal fluid collection, abdominal abscess, or ascites.";

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis.";

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; upper abd pain , vague , no radiation , not triggers No assoc SX's , hx pancreatitis Unknown If No Info Given.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; history of L renal mass with cryoablation, last MRI in 5/2015 showed new lesion recommended 3 month f/u MRI to check stability of the lesion

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; This was previously an incidental finding. Last imaging was over a year ago. Ruled to be benign.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; It is not known if the patient is undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; none

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon.";

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They did NOT have an Abdomen MRI in the last 10 months.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; < Enter answer here - or Type In Unknown If No Info Given. >

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; abnorman CT , bacteria in urine , enlarge prostate , flank pain , fever ,

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Enter answer here - abdominal ultrasound showed mass of 4cm x 2.2cm x 1.6cm and 4mm gallbladder polyp

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Hapatocellular carcinoma protocol. Abnormal findings on diagnostic imaging of other abdominal regions including retroperitoneum. Abnormal ultrasound.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Incidental finding of 3.1 cm hepatic lesion on noncontrast CT.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Incidental finding of a 3.1cm solid mass in the left kidney on ultrasound

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Liver mass was found on abdominal ultrasound.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Multiple masses seen in the liver

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had a CT that showed some spots and recommended MRI for further imaging.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient has a 3.5 left adrenal mass seen previously on a CT Scan. Per radiologist he recommends further evaluation of this mass by doing an MRI of the Abdomen to rule out an adrenal adenoma

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt had ABN ultrasound with lesion in liver.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; pt having abdominal pain and bloating had an abnormal ultrasound questionable liver mass per radiologist recommendation mri with and without contrast is requested

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Two suspicious appearing enhancing lesions within the liver with indeterminate characteristics on both US and CT. Findings are suspicious for possible fibronodular hyperplasia, hepatic adenoma or atypical hemangioma. Recommended correlation with a follow

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; UNKNOWN

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; US showed cyst or adrenal mass. .

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ct done by cardiologist on 09/28/2015 found indeterminate 2.8cm round lesion in the inferior right lobe of the liver. this could be further characterized with contrasted-enhanced mri

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; patient had a CT abd done 8/6/15 for abdominal pain - showed Anterior pancreatic head lobulated appearance is more prominent on today's exam than on the prior exams. Lesion demonstrates normal enhancement in comparison to the remainder of the pancreas an

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt has had CT and has hypokalemia. CT was abnormal and radiologist recommended patient have MRI of abdomen. Possible pancreatic body/tail lesion. Neuroendocrine tumor is not excluded.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Pt has a left hepatic lobe hyper-vascular lesion

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; pt has elevated liver functions. has seen GI. labs are trending up and doctor would like mri to assess.

HAS A MAN WRAPPED AROUND HIS PANCREASIS; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.
This is a request for a MR Angiogram of the abdomen.

cough and shortness of breath Levaquin 500mg patient is diabetic heart disease and Ischemia Trying to R/O Cancer; This is a request for a CT scan for evaluation of coronary calcification.

Yes, this is a request for CT Angiography of the abdominal arteries.
Yes; Limited or Follow up other than Sinus CT; Chest

< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

Breast density; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

left breast swelling , invasive ductal carcinoma; This is a request for Breast MRI.; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; It is not known if this is an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.

This is a request for Breast MRI.; This study is being ordered for a suspected implant rupture.; Yes, this study is being ordered to evaluate a suspected silicone implant rupture.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.

This is a request for Parathyroid SPECT imaging.; patient has elevated PTH level with symptoms of dizziness, myalgias and fatigue

< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

chest pain , syncope , shortness of breath , mytrol valve prolapse tachycardia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

chest pain w/diaphoresis, known smoker- pack a day, normal EKG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

elevated blood pressure; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

family hx of CAD; L side chest pain w/ shortness of breath; abnormal EKG; abnormal lab; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

hypertension with headaches, chest pain not related to activity, tachycardia, exercise restriction due to size/weight uncontrolled hypertension; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Previous X Ray showing an abnormality; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

seen in office 11/23/15 complaining of chest pain for 14 days, thought it was muscular but is not improving. Pain is described as tight and sharp. has shortness of breath at times. CXR and EKG done in office - not acutely concerning. B/P in office 148/94.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Stress echo 8/5/15 showed abnormalities; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient has had an abnormal treadmill stress test indicating the need for stress cardiolyte. Precordial chest pain with left arm pain.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.

The Pt has chest pain.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease

unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Melanoma.; This is for evaluation of regional lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

given his history of atrial fib,diabetes and recent syncopal episode I feel it necessary to run these tests to evaluate his symptoms; This study is being ordered for a neurological disorder.; 11/29/15; There has been treatment or conservative therapy.; syncope, lightheadness; diabetic patient is already on blood thinner therapy and has been for over a year

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is fora routine follow up of congenital heart disease.; It has been at least 24 months since the last echocardiogram was performed.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; To evaluate the heart prior to non-cardiac surgery.; The member does not have known or suspected coronary artery disease

< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms of Lung Cancer.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening (S8032).

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

This request is for a Low Dose CT for Lung Cancer Screening (S8032); This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.; The patient has not quit smoking.

; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP. Enlarged liver was incidentally found on an abdominal CT back in August 2015. This is her 4 month follow up exam.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.

He bumped heads with someone and injured his jaw; This study is being ordered for trauma or injury.; 10/2015; There has been treatment or conservative therapy.; Jaw pain, limited range of motion, swelling and tenderness (left side of the jaw); Anti inflammatory medication

optimostris is requesting the ct for eye exam coming normal.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Radiology Services Denied Not Medically Necessary

Pain in right upper extremity; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

pain is worse on left side of face and swollen; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

Radiology Services Denied Not Medically Necessary

patient has a ringing/roaring sound in her had that is getting worse, she is dizzy and lightheaded,, takes her 30 minutes to get out of bed due to the room spinning, her being sick to her stomach from the dizziness , her eyes are twitching left to right ; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Radiology Services Denied Not Medically Necessary

Patient c/o face warmness, eye feel tight right side. Patient having right sided headache day of visit on 9/28/15.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

Patient complained of headaches 3x a week that are getting worse. He also has large knot behind right ear that is painful to touch. Diagnosed as adenitis until CT confirms.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Radiology Services Denied Not Medically Necessary

Patient has done physical therapy in home since 5/6/15 and still complains of back pain and provider also order physical therapy again when patient cam in complaining of back problems on 10/14/15; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/6/15; There has been treatment or conservative therapy.; low back pain; physical therapy at home

Radiology Services Denied Not Medically Necessary

PATIENT HAS HAD A RECURRING HEADACHE EVERYDAY FOR THE PAST TWO MONTHS.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Radiology Services Denied Not Medically Necessary

Patient has memory loss stops in the middle of sentences and forgets what he was saying.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Radiology Services Denied Not Medically Necessary

Patient is complaining of new onset of worse headaches but states he has been diagnosed with migraines in the past. States he has been under a great deal of stress lately; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

Radiology Services Denied Not Medically Necessary

patient is having dizziness for two month has had meds and requesting CT instead of PT patient mother dead at a young age and would like to R/O; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Radiology Services Denied Not Medically Necessary

Patient returned to office stating headaches are worsening and cannot take the meds prescribed because of reaction to them. Chest pain and disoriented are some of the symptoms.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

patient right eye vision lost.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Radiology Services Denied Not Medically Necessary

Patient says that it feels like electric shock starting at base of head and moves to the whole head, Has headaches.; This is a request for a brain/head CT.; The study is requested for new onset of seizures or newly identified change in seizure activity or pattern.

Radiology Services Denied Not Medically Necessary

patient was getting better after hitting her head but is now condition is worsening; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for recent head trauma or injury.

Radiology Services Denied Not Medically Necessary

Patient with headache for greater than 2 weeks no relief with treatment of fioricet, toradol, BC Powder, tramadol. Needing further evaluation for this headache; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

Pt has a history of migraines, that are getting worse and now resulting in seizure activity.; This is a request for a brain/head CT.; The study is requested for new onset of seizures or newly identified change in seizure activity or pattern.

Radiology Services Denied Not Medically Necessary

pt has been having syncopal episodes.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Radiology Services Denied Not Medically Necessary

Pt has been on migraine medication and has been on over the counter medication and has been taking antibiotics with no relief. She has had headache now for 3 weeks with no relief, worsening.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Severe headaches not better with medication. This has been ongoing for 3 weeks.; There has been treatment or conservative therapy.; Headaches and chronic sinusitis. Pt has been on Levaquin antibiotics also.; Medication, otc medication and imitrex which is prescribed for migraines.

Radiology Services Denied Not Medically Necessary

pt has had headaches with history of migraine, head ache getting worse with sensitivity to light and sound; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Radiology Services Denied Not Medically Necessary

PT hit her head on counter; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

pt is experiencing sensitivity to light. has nausea, no meds have helped; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; The study is requested for headache.

Radiology Services Denied Not Medically Necessary

PT went to the eye doctor and diagnosed with papilladema.; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Radiology Services Denied Not Medically Necessary

pt with new onset of significant memory deficits; This is a request for a brain/head CT.; None of the listed reasons for the study have been selected.

Radiology Services Denied Not Medically Necessary

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; patient is experiencing worse neck and back pain and radiating to her shoulders and hands.

Radiology Services Denied Not Medically Necessary

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>

Radiology Services Denied Not Medically Necessary

limited range of motion, not responding to outpatient treatment has neck pain radiating and not responding to anti inflammatory; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

MD wants to rule out herniated disc; This study is being ordered for trauma or injury.; 10/02/2015; It is not known if there has been any treatment or conservative therapy.; upper and lower back pain

Radiology Services Denied Not Medically Necessary

N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; N/A; It is not known if there has been any treatment or conservative therapy.; N/A

Radiology Services Denied Not Medically Necessary

narrowing in c spine, radiculopathy, x-rays of l spine and c spine were abnormal; This study is being ordered for a neurological disorder.; 06/01/2015 per pt symptoms began 6 mnths ago; There has been treatment or conservative therapy.; straightening of c-spine seen on xray, weakness of rt hand, sciatica down right leg. tingling in legs.; chiropractic visits, heating pad

Radiology Services Denied Not Medically Necessary

neck mass the size of a quarter. Radiculopathy, stiffness, tenderness; spasms, decreased ROM;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Neck pain  Chronic in nature, h/o possible fibromyalgia, will try Lyrica, conitnue on NSAIDs, m relaxers prn. Will f/u if no imprvment.. Further diagnostic evaluations ordered today include(s) XRAY C-SPINE 2-3 VIEWS to be performed. Lower back pain; This study is being ordered for Inflammatory/ Infectious Disease.; LYRICA - 10/19/2015 CONTINUE NSAIDS AND MUSCLE RELAXERS; There has been treatment or conservative therapy.; FATIGUE,HEADACHE,ACTIMITY LIMITATION,MORNING STIFFNESS,DULL,ACHY AND THROBBING DISCOMFORT,SYMPTOMS WORSE WITH ACTIVITY,STANDING,WALKING AND COLD OR RAINY WEATHER.; PT HAS DONE 6 WEEKS OF PHYSICAL THERAPY WITH NO RELIEF,ALSO STARTED LYRICA 10/19/2015

Radiology Services Denied Not Medically Necessary

Neck pain for over 4 weeks.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

neck pain radiating down to arm, worried there is something going on with her disc; This is a request for cervical spine MRI; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

Neck pain with radiculopathy down left arm several months. Steroids and Meloxicam ineffective for the pain, symptoms not improving.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

neck pain, headaches, paresthesia, abnormal x-ray; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

None; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09-02-2015; There has been treatment or conservative therapy.; Cervical: R arm numbness and weakness radiates from neck to arm; Lumbar spine: BILAT leg numbness and weakness; medication, Nsaids, PT,

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9-23-2014; There has been treatment or conservative therapy.; Pain radiating down legs and arms.; Medication and HEP

Radiology Services Denied Not Medically Necessary

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; none; It is not known if there has been any treatment or conservative therapy.; none

Radiology Services Denied Not Medically Necessary

numbness and tingling in hands; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; <Document exam findings>

Radiology Services Denied Not Medically Necessary

PAIN AND NUMBNESS IN RIGHT ARM AND HAND.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Pain elicited by neck motion with radiculopathy; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain radiates down arms with a tingling sensation that becomes numbing in her fingertips.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Pain unchanged with conservative therapy. Studies ordered to eval for surgery or further injection.; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; Chronic low back and neck pain. Pain radiating into extremities. Numbness and tingling in extremities.; Physical Therapy, Epidural Steroid Injection, Narcotic Analgesics, NSAIDs, Muscle Relaxants, and TENS unit.

Radiology Services Denied Not Medically Necessary

Pain unchanged with current therapies, eval for possible surgery; This study is being ordered for trauma or injury.; 08/24/2015; There has been treatment or conservative therapy.; Burning, aching, radiating, continuous pains in the low back into the right lower extremity and neck into bilateral shoulders and upper extremities; Evaluation and treatment to date includes NSAID's, muscle relaxants, OTC analgesics, PT and epidural steroid injection.

Radiology Services Denied Not Medically Necessary

patient fell forward downstairs; This study is being ordered for trauma or injury.; 10/8/15; There has not been any treatment or conservative therapy.; x-ray; pain medications; directions for ice/heat

Radiology Services Denied Not Medically Necessary

Patient has had old injury in 2000 which was his last MRI reports. Still complains of having Chronic neck and back pain. Wanting to get established with a pain management doctor, which whom needs most recent MRI and X-ray reports; This study is being ordered for a neurological disorder.; old injury since 2000; It is not known if there has been any treatment or conservative therapy.; chronic neck and back pain with radiation down both arms and right lower extremity into hip(thigh) with numbness. hard time with balance and minimal movement of neck

Radiology Services Denied Not Medically Necessary

Patient has sclertic changes in Cervical spine the c5 and c6 as well as c6 and c7. As well as the shoulder reagion cannot flex the shoulder region beyond range of motion because of the pain.; This study is being ordered for trauma or injury.; 11/07/2015; There has been treatment or conservative therapy.; Pain in the neck and shoulders with fingers on left side and arm going numb; Has been doing PT at home and ensaids and Ice and heat at home trying to resolve not getting any better needs to be further evaluated

Radiology Services Denied Not Medically Necessary

patient has suffered from numbness It arm for the past 6 months that is exacerbating also pain in neck and mid back with no known injury; This study is being ordered for a neurological disorder.; 6/10/2015; There has been treatment or conservative therapy.; parasthesia left arm decreased strength pain; chiropractor physical therapy medication

Radiology Services Denied Not Medically Necessary

Patient is already seeing pain management for lumbar spine treatment. Needing these MRIs to see if additional treatment is needed.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN; There has been treatment or conservative therapy.; The cervical spine pain worse with rotation of head and intermittently causing pain down both arms into the 2nd & 3rd fingers. The thoracic spine pain is a stabbing pain radiating toward abdomen.; Takes Skelaxin, Gabapentin, & Norco for back pain. Sees pain management for lumbar pain.

Radiology Services Denied Not Medically Necessary

Patient is experiencing degenerative disorder, after vehicle accident; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Patient is having continuous headache daily.; This is a request for cervical spine MRI; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

Patient is in extreme pain and is difficult to perform everyday tasks now; This study is being ordered for a neurological disorder.; 11/10/15 is when pain & numbness started, he has been through physical therapy and inflammatory meds that are not helping; There has been treatment or conservative therapy.; Extreme upper back and neck pain going down both arms with numbness in both hands; Physical therapy and anti inflammatory and steroids

Radiology Services Denied Not Medically Necessary

Patient presents to clinic with bilateral shoulder and neck pain. Patient went to E.R. on 11/24/15 and had CT of cervical showing potential ligamentous injury. Patient came to clinic stating pain and radiculopathy is worse.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Patient states pain radiates down to elbow; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-28-15; There has not been any treatment or conservative therapy.; Patient has neck and arm pain that limits range of motion

Radiology Services Denied Not Medically Necessary

patient was seen in ER 10/10/15 with right sided neck pain that radiates into her head, feels like a 'crick' in neck. no headache, ct was negative. pain has continued and she would like it further evaluated with MRI; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; rom is restricted, pain with flexion/extension. spasm on right side, hydrocodone for pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

Patient with acute onset of neck pain and headache not relieved with prescribed medications.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/27/2015; There has been treatment or conservative therapy.; acute neck pain , headache ,  unrelieved by pain medications or muscle relaxers.; Toradol Injection and Tizanidine 4mg at bedtime , that was given 09/28/2015.

Radiology Services Denied Not Medically Necessary

positive or neck and back pain with radicular pain to both legs; This study is being ordered for Inflammatory/ Infectious Disease.; unknown; There has not been any treatment or conservative therapy.; cervical neck pain, right shoulder pain, numbness and tngling to both arms.  low back pain with numbness and tingling to both legs

Radiology Services Denied Not Medically Necessary

POSSIBLE SURGERY; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SEVERAL YEARS; There has been treatment or conservative therapy.; CHRONIC PAIN AGGRAVATED BY TOUCH OR LATERAL MOTION; NSAIDS, PHYSICAL THERAPY

Radiology Services Denied Not Medically Necessary

PREVIOUS GUN SHOT WOUND. PREV CHEST X-RAY.; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; CHEST AND MIDDLE BACK PAIN

Radiology Services Denied Not Medically Necessary

PT COMPLAINS OF NECK THAT RADIATES TO THE LEFT ARM FOR THE LAST WEEK. NO H/O TRAUMA OR INJURY.PAIN IS WORSENING; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

pt in an accident and want to see where pain is coming from; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/30/2015; There has not been any treatment or conservative therapy.; pain radiating down limb

Radiology Services Denied Not Medically Necessary

Pt presents with complaints of pain in both shoulders, right elbow, and back of the neck. These pains have gradually been building over the past 3 years. It has gotten much worse over the past 6 months or so. He does not recall any specific injuries that ; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt presents with complaints of pain in both shoulders, right elbow, and back of the neck. These pains have gradually been building over the past 3 years. It has gotten much worse over the past 6 months or so. He does not recall any specific injuries that ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

R/ o scare on lung vs. a mass , x-ray show an anomaly; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/23/15; There has not been any treatment or conservative therapy.; coughing , wheezing ,

Radiology Services Denied Not Medically Necessary

Radiculopathy and left sided weakness and numbness; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

rates pain at 7 and initially it was at a 7; This study is being ordered for trauma or injury.; july 20th; There has been treatment or conservative therapy.; pain, decrease range of motion, radiculopathy; medication

Radiology Services Denied Not Medically Necessary

Right shoulder tenderness, bony tenderness in cervical back w/spasm; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right shoulder tenderness,   bony tenderness in back w/spasm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

She is also having a lot of neck and low back pain with radicular symptoms down both upper and lower extremities. She has been having a lot of falls and thinks this could be do to the back pain and loss of balance because of her abnormal gait. She is dizzy; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Pain decreased ROM radicular symptoms down both upper and lower extremities dizziness; rest and at home exercises NSAIDS Ice and heat

Radiology Services Denied Not Medically Necessary

She reports an injury in 2007 (herniated disc at L5). She had surgery on her back by Dr. Simpson. She has been okay, but has recently aggravated the injury and now has pain in her lower back and down her left leg.; This study is being ordered for trauma or injury.; 2007; There has been treatment or conservative therapy.; Pain in lower back and down left leg.; Back surgery

Radiology Services Denied Not Medically Necessary

Steroids, anti inflammatory medications and PT and still not any better.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Radiating down her arm, so she is having weakness in both of her arms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

tenderness and limited ROM neck tingling and down into hands and arm on right; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

the doctor trying to see if there is a rupture or bulging disk; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/3/15; There has been treatment or conservative therapy.; the patient is having neck and upper back pain and also having numbness and tingling down both arms; the patient has been at home exercise and is on inflammatory medicine and steroids

Radiology Services Denied Not Medically Necessary

The naproxen is helping, but he continues to have radicular symptoms. The hands could be related to some CTS and legs to sciatica, but could also indicate cervical spine lesion.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; He has numbness into both fingers. This typically starts after 15 to 20 miles worth of driving. He also gets symptoms in the right leg.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>

Radiology Services Denied Not Medically Necessary

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Patient has been a victim of domestic violence for a number of years.

Radiology Services Denied Not Medically Necessary

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Pt had abn x-ray showing anterior and posterior spurring at C-5 & 6 with disc narrowing. C7 level demonstrates more narrowing on the left side.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; It is not known if the patient has been seen by or if the ordering physician is a neuro-specialist, orthopedist, or oncologist.; This is a continuation or recurrence of symptoms related to a previous surgery or fracture.; Follow-up to Surgery or Fracture within the last 6 months; No other information to provide at this time.; No, the patient does not have new or changing neurological signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Neurological deficits; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Neurological deficits; Unknown; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; <Enter Additional Clinical Information>; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; cervical pain not responding to physical therapy and medication; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; None of the above; Will FAX; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.;

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; headaches, neck pain, burning sensation on right side of head

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Patient had MVA in 1997. Came to our office for initial visit on 9/24/15. She complained of left sided neck pain that radiated down left arm and had numbness to left pinky finger. Ice/heat and Tylenol#3, Mobic and flexeril. Patient returned to our offi

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; patient has neck pain and history of herniated disc. Patient also has headaches

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Ti vertebral body is suboptimally demonstrated There is a straighten of the normal curvature of the Cervial Spine Spurring is present c3-c7 and c7-T1  Chronic anterior endplate degenerative  Xray Recommend correlation with a CT of the Cspine occult pat

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Swelling in the extremities and muscle weakness  and numbness

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Worsening cervcalgia with new onset right lateral arm and forearm paresthia.intemittent subjective grip weakness

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; ; It is not known if the patient have new or changing neurological signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; ; No, the patient does not have new or changing neurological signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; 3 wk history of neck pain radiating down to left shoulder and down to left axillary area. States he was pulling his hair up in a ponytail when he felt the pain. Pain is getting worse.; It is not known if the patient have new or changing neurological signs or symptoms.

Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; PATIENT SHOWS SIGNS OF NERVE DAMAGE; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Radiology Services Denied Not Medically Necessary

this patient has had back problems for 10 years, but recently re-injured back. they are having radiculopathy along with back pain; This study is being ordered for trauma or injury.; 10/12/15; It is not known if there has been any treatment or conservative therapy.; back pain, with radiculopathy

Radiology Services Denied Not Medically Necessary

To eliminate pain level for patient and to provide a better view for our practitioner.; This study is being ordered for Inflammatory/ Infectious Disease.; Unknown; There has been treatment or conservative therapy.; Pain and Inflammation; Physical therapy Pain management

Radiology Services Denied Not Medically Necessary

Unknown.; This study is being ordered for trauma or injury.; Nov 21, 2015; There has been treatment or conservative therapy.; Radiating pain down to right leg, low back pain, tenderness, decreased ROM.; Medications but they have not helped.

Radiology Services Denied Not Medically Necessary

Unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Positive Arthralgia in neck and worsening neuropathy. Weakness in left arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

unknown; This is a request for cervical spine MRI; None of the above; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in left upper extremity; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiology Services Denied Not Medically Necessary

unknown; This study is being ordered for a neurological disorder.; 12/3/2015; There has been treatment or conservative therapy.; blurred vision, weakness, increased BP Readings, and pressure that starts at the back of the head and radiates to right temporal area; aspirin daily
