Coronary artery disease dyspnea angina
Over the years patient has experienced
intermittent episodes of pressure like chest pain
located to mid precordium nonradiating
associated with dyspnea happening around him
in fashion, no identifiable precipitating event; This is
a request for Myocardial Perfusion Imaging
(Nuclear Cardiology Study).; The patient has not
had other testing done to evaluate new or
changing symptoms.; The study is requested for
congestive heart failure.; There are new or
changing cardiac symptoms including atypical
chest pain (angina) and/or shortness of breath.;
There is known coronary artery disease, history
of heart attack (MI), coronary bypass surgery,
coronary angioplasty or stent.; The member has
known or suspected coronary artery disease.;
The BMI is 30 to 39
