Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		Daughter found pt. with uncontrollable shaking with eyes rolled back in head, LOC for 3 minutes.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		Dizzieness, double vision, cant drive; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	Pt. is c/o increased unsteadiness. Unable to do Tai Chi, due to unsteadiness, pt. has HTN.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; It is unknown why an MRI is not being considered	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	2
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	6
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This is a request for a brain/head CT.; This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.; This study is being requested for a recent head trauma or injury.; This study is being requested for a recent head trauma or injury.	1
Advanced Practice Registered Nurse	Approval	70480 CT ORBIT,EYE SOCKET, SELLA TURCICA, POSTERIOR FOSSA,EAR ETC.	"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is suspicion of bone infection, cholesteoma, or inflammatory disease.ostct"	1
Advanced Practice Registered Nurse	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.	1

Advanced Practice Registered Nurse	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST	Patient to be evaluated for acute upper respiratory infection of multiple sites. These have been present since yesterday. The symptoms include ear stuffiness, eye itching/watering, temporal headache, nasal congestion, watery nasal discharge and sneezin; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)	1
Advanced Practice Registered Nurse	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST	Severe sinonasal polyposis and presumed mucocele formation possibly from allergic fungal sinusitis. Aggressive sinusitis requiring ENT consultation. Sinuses are expanded, particularly frontals and ethmoids; with extrinsic impression on the frontal lobes; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	1
Advanced Practice Registered Nurse	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)	2

Advanced Practice Registered Nurse	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; It is unknown if this is being ordered by an ENT specialist.	1
Advanced Practice Registered Nurse	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	2
Advanced Practice Registered Nurse	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	1
Advanced Practice Registered Nurse	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient has a known aneurysm.; This is a request for a Brain MRA.	1
Advanced Practice Registered Nurse	Approval	70544 Mr angiography head w/o dye	This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.	1
Advanced Practice Registered Nurse	Approval	70547 Mr angiography neck w/o dye	This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		1

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	changes in white matter of the brain, hypertension., diabetes; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; Is is not known if the patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; It is not known if the doctor notes on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	ct was inconclusive; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Having numbness of mouth and lips; tingling in her hands; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are not intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1

Approval

70551 MRI HEAD, BRAIN, BRAINSTEM
WITHOUT CONTRAST

Pt had a brain mri in 2014 that showed a small brain aneurism; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

1

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has vision loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	R/O MS Facial numbness and pain in extremities; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are not intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	The patient had 2 low testosterone levels. he had a high prolactin level as well.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	4
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	10

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.	2
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	6
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	2

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for and infection or inflammation.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	4
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	none; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Advanced Practice Registered Nurse	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	2
Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2016; There has been treatment or conservative therapy.; severe back pain; PT for 6 weeks medications medvol hydrcone	1

Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis, &#xOD; Bowel or bladder dysfunction, Evidence of new foot drop, etc...	1
Advanced Practice Registered Nurse	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2016; There has been treatment or conservative therapy.; severe back pain; PT for 6 weeks medications medvol hydrcone	1
Advanced Practice Registered Nurse	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	1
Advanced Practice Registered Nurse	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	3

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 2 years ago; There has been treatment or conservative therapy.; Pain and numbness; nerve blocks and medication	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; About a year; There has been treatment or conservative therapy.; sharp pain; Chiropractic care	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	He has been having a lot of headaches and neck pain the past year or so. He has neurofibromatosis syndrome and has multiple skin growths all over his body. They are more concentrated on his back, neck and the back of his head. Several members of his famil; This study is being ordered for Congenital Anomaly.; 05/05/2015; There has been treatment or conservative therapy.; He does get headaches when the tumors in his posterior neck get irritated and inflamed.; meloxicam started in 2015	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Hyperreflexia on exam.; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; Low back pain Paresthesia Weakness in BLE; IM and oral steroids IM and oral anti-inflammatories Physical therapy over the years for low back pain	1

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several years; There has been treatment or conservative therapy.; Chronic pain, crepitus, numbness and headaches; PT in 2015	1
---------------------------------------	----------	--	---	---

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	1
---------------------------------------	----------	--	--	---

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
---------------------------------------	----------	--	--	---

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	3
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	3

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	11
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	2
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Abnormal x-ray suggests further imaging	1

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Advanced Practice Registered Nurse	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	hx ca; tried muscle relaxers; pt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Advanced Practice Registered Nurse	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Hyperreflexia on exam.; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; Low back pain Paresthesia Weakness in BLE; IM and oral steroids IM and oral anti-inflammatories Physical therapy over the years for low back pain	1
Advanced Practice Registered Nurse	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1

Advanced Practice Registered Nurse	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	2
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 2 years ago; There has been treatment or conservative therapy.; Pain and numbness; nerve blocks and medication	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; About a year; There has been treatment or conservative therapy.; sharp pain; Chiropractic care	1

Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.</p>	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>hx ca; tried muscle relaxers; pt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.</p>	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>None.; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above</p>	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>PT done.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.</p>	1

Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	37
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	5
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	9
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient has right leg weakness; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Advanced Practice Registered Nurse	Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered as a follow-up to trauma.; There is NO laboratory or physical evidence of a pelvic bleed.; There are no physical or abnormal blood work consistent with peritonitis or pelvic abscess.; There is physical or radiological evidence of a pelvic fracture.; "The ordering physician is not a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.	1
Advanced Practice Registered Nurse	Approval	72192 CT PELVIS WITHOUT CONTRAST	Having right groin area; pain radiates to rt testicle; hx of frequently lifting heavy equipment; expected hernia; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
Advanced Practice Registered Nurse	Approval	72192 CT PELVIS WITHOUT CONTRAST	Right groin pain over the past month, ultrasound did not show hernia. Trying to r/o hernia or whatever may be causing the pain.; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
Advanced Practice Registered Nurse	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect	1
Advanced Practice Registered Nurse	Approval	72196 MRI PELVIS	MDO requested to bypass Medical Necessity Questions; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1

Advanced Practice Registered Nurse	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.	1
Advanced Practice Registered Nurse	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	1
Advanced Practice Registered Nurse	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.	1
Advanced Practice Registered Nurse	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.	1

Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	none given; This study is being ordered for trauma or injury.; 10-1-2016; There has been treatment or conservative therapy.; Numbness, weakness to the point that she drops things, and bilateral pain; Pain meds, xray done that showed a tear, bilateral wrist splint	2
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; < Enter answer here - or Type In Unknown If No Info Given. >	2
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; abnormal x-ray showed a questionable cyst. May be bone cyst.	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Acute pain	1

Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; none given	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	6
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.	2
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.	1
Advanced Practice Registered Nurse	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	2

Advanced Practice Registered Nurse	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.	1
Advanced Practice Registered Nurse	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	HPI: 62 y.o. female presents with left ankle pain x 3 months. Associated symptoms include burning and edema. The pain is intermittent. Better with rest and worse with walking. She hurt it originally 3 months ago walking in heels. She rolled her ankle in t; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; It is not known if there is a suspicion of tendon or ligament injury.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.;" There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Instability	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	1

Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	3
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking	2
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	4
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Swelling greater than 3 days	1

Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	4
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1

Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several years; There has been treatment or conservative therapy.; Chronic pain, crepitus, numbness and headaches; PT in 2015	1
Advanced Practice Registered Nurse	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	1
Advanced Practice Registered Nurse	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	2

Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; pain possible injury possible rotator cuff	1
Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; The patient has right chronic shoulder pain x years and is getting worse with time. She has pain, numbness and tingling that radiates down her right arm to her hand/fingers. MRI of neck negative in 2013. She has had no relief with physical therapy or NSAID	1
Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; < Enter answer here - or Type In Unknown If No Info Given. >	1

Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; complain of some chronic right shoulder pain	1
Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has not had recent plain films of the shoulder.;	1
Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1

Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Advanced Practice Registered Nurse	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	unknown; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary		1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; It is not known if the study is requested for knee pain; The study is not requested for any of the standard indications for Knee MRI	1

Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; 10-14-16.; There has been treatment or conservative therapy.; Bilateral Knee pain  Neck pain  Headaches; Hydrocodone-Acetaminophen 5-325 MG Tablet 1 tablet as needed Orally every 6 hrs	2
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; MVA 10/14/16; There has been treatment or conservative therapy.; Pain in rt knee , and cervicalgi 2 months with no improvement; Hydrocodone 5-325 MG 1 tablet every 6hours as needed with no improvement	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	None; This is a request for a foot MRI.; The study is being ordered forfoot pain.; The study is NOT being ordered for chronic pain, acute pain, rule our tarsal coalition, known or suspected septic arthritis or oseteomyelitis, tendonitis, neuroma or plantar fasciitis.	1

Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; May 2016; There has been treatment or conservative therapy.; double vision dizziness headache phonophobia photophobia limping joint tenderness popping decreased mobility difficulty initiating sleep; Pt had hip xray.   has been treated for migraines with Topamax and imitrex	1
Advanced Practice Registered Nurse	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several years; There has been treatment or conservative therapy.; Chronic pain, crepitus, numbness and headaches; PT in 2015	1

Advanced Practice Registered Nurse	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	ELEVATED LIVER ENZYMES ON LAB DRAW X 2 WITH INCREASE IN LEVEL ON 2 DRAW; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Advanced Practice Registered Nurse	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pt has been referred to dietary and exercise counseling.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; onset 10/26/16 for 3 weeks; There has been treatment or conservative therapy.; abd pain upper and lower abd,nausea,vomiting,bloating and appetite loss.; ranitidine hcl	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary		1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.	1

Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	Pts had RLQ abd pain for over a week. I saw her in clinic on 12-21, she had some right upper and right lower quad tenderness at that time but it had just started 24hrs before. WBC was 10.2 and neuts were 6.6. She was to RTC the next day if her pain worsen; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other;	1

Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; 53y/o female presents to clinic today c/o n/v/d since Saturday morning, she reports the last 2 days she has had chills, is unsure if she was running fever, she c/o generalized abdominal pain that she describes as sore/cramping, her abdomen is soft/non-dis	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; abdominal pain	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Pain with nausea and vomiting	1

Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	1
Advanced Practice Registered Nurse	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	No info given.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Advanced Practice Registered Nurse	Disapproval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	Radiology Services Denied Not Medically Necessary	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.	1
Advanced Practice Registered Nurse	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	pt has been referred to dietary and exercise counseling.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; onset 10/26/16 for 3 weeks; There has been treatment or conservative therapy.; abd pain upper and lower abd,nausea,vomiting,bloating and appetite loss.; ranitidine hcl	1
Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.	3

Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	2
Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year)	1
Allergy & Immunology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
Allergy & Immunology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	Patient with CVID, CHRONIC MAXILLARY SINUSITIS, LYMPHOPENIA, COUGH.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Ambulatory/Walk-in Clinic	Approval	70450 CT BRAIN, HEAD		Pt was recently hit in the head with a softball, and since the injury pt has had a headache that is not relieved by medications.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

Ambulatory/Walk-in Clinic	Approval	71250 CT CHEST, THORAX		"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Ambulatory/Walk-in Clinic	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Trauma or recent injury; Pt was seen for post MVA with Neck pain. X-ray showed disc disease. MRI has to be completed before referral can be sent.; It is not known if the patient have new or changing neurological signs or symptoms.	1
Anesthesiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	1
Anesthesiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Anesthesiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; sept 2 2016; There has been treatment or conservative therapy.; headaches; otc ibuprofen	1

Anesthesiology	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Anesthesiology	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
Anesthesiology	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Anesthesiology	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Anesthesiology	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	It is not known if the patient has any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.	2

Anesthesiology	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	rule out granuloma formation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/1/2016; There has been treatment or conservative therapy.; Pain in the thoracic and low back region.; Surgery, medication therapy, a pain pump.	1
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK		1
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	rule out granuloma formation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/1/2016; There has been treatment or conservative therapy.; Pain in the thoracic and low back region.; Surgery, medication therapy, a pain pump.	1
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.	2
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.	1

Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	7

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1996; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATION	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; CONSTANT, SHARP, SHOOTING PAIN FROM NECK GOING DOWN BOTH LEGS.; LESI SERIES, LFJI SERIES AND RFA'S X2, MEDICATIONS, PT	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATIONS AND INJECTIONS	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATIONS, VARIOUS INJECTIONS	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; PAIN IN NECK, BACK AND KNEE;	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; NOVEMBER 2015; There has been treatment or conservative therapy.; NECK AND BACK PAIN; X-RAYS AND MEDICATION	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; OCT 25 2016; There has been treatment or conservative therapy.; Pain and numbness Limited ROM; Medication and PT	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;;	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Anterior flexion and Hyperextension at cervical spine causes neck pain radiates to upper extremities. Bilateral Spurlings test positive . Muscles strength and tone are normal. Palpable taut bands /trigger points in bilateral Trapezius muscles. Palpable t; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient reports neck pain, back pain, joint pain, joint swelling and muscle pain or tenderness. The patient reports headache and leg weakness. The treatments tried in the past include bed rest, Ice and heat therapy, massage, physical therapy and home ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	back pain and displacement, neck pain and displacement; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/11/2016; There has been treatment or conservative therapy.; back pain and displacement, neck pain and displacement; medication, hot/cold compresses	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; MRI cervical spine is being requested to further evaluate the patients persistent pain as well as the more worrisome neurologic symptoms. MRI is not typically needed prior to initiating treatment, unless there is a rapid change in condition or a deterioro</p>	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>None; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.</p>	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Post op complication; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; After surgery in June 2016; There has been treatment or conservative therapy.; Pain and numbness in L arm; Medication Hydrocodone	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt. has tried all options such as medications, and physical Therapy.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt. can not grasp anything with his had due to weakness. Pt. can not hold anything.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; This is a continuation or recurrence of symptoms related to a previous surgery or fracture.; Follow-up to Surgery or Fracture within the last 6 months; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	5

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	29
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	3
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	3
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	11
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST		1

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2016; There has been treatment or conservative therapy.; pain radiating down back of leg to right side; medication	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 2010; There has been treatment or conservative therapy.; PAIN IN BACK GOES DOWN LEGS WITH NUMBNESS.; Physical therapy, medications and injections.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; Previous neuro surgery, continued chronic pain.	1

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	3
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	5

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 1990; There has been treatment or conservative therapy.; Pt has pain radiating down from the back into the legs; chiro, trigger point injection, nerve simulator and several xrays	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST		7
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness and tingling down both of her legs and down to her feet about 8 days ago getting worse day by day need to make sure not abcess , does limp on the right leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right leg weakness and numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	3
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 6/1/2016; There has been treatment or conservative therapy.; low back pain, radicular pain, hip pain; home exercise, insets, pain medication	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	2

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1986; There has been treatment or conservative therapy.; Neck and back pain, arm numbness, leg numbness; Medication, PT	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/1985; There has been treatment or conservative therapy.; low back pain on right side , numb feet, burning stabbing pain , pain in neck to shoulders, disc bulge; medications, going to specialist, braces , PT	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/2012; There has been treatment or conservative therapy.; numbness , tingling ;; Home Exercise	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1996; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATION	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; CONSTANT, SHARP, SHOOTING PAIN FROM NECK GOING DOWN BOTH LEGS.; LESI SERIES, LFJI SERIES AND RFA'S X2, MEDICATIONS, PT	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATIONS AND INJECTIONS	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATIONS, VARIOUS INJECTIONS	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; PAIN IN NECK, BACK AND KNEE;	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; NOVEMBER 2015; There has been treatment or conservative therapy.; NECK AND BACK PAIN; X-RAYS AND MEDICATION	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; OCT 25 2016; There has been treatment or conservative therapy.; Pain and numbness Limited ROM; Medication and PT	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;;	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 2010; There has been treatment or conservative therapy.; PAIN IN BACK GOES DOWN LEGS WITH NUMBNESS.; Physical therapy, medications and injections.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	back pain and displacement, neck pain and displacement; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/11/2016; There has been treatment or conservative therapy.; back pain and displacement, neck pain and displacement; medication, hot/cold compresses	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	bilateral low back pain radiating to bilateral thighs. Patient feels symptoms are worsening. MRI is needed for treatment; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	History of Present Illness; The patient presents today for a follow up appointment s/p Lumbar Rhizotomies. She states the procedures did help her; pain at about 50 percent overall, however she is still experiencing some pain in her right hip and buttocks.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Anesthesiology

Approval

72148 MRI LUMBAR SPINE OR LOW
BACK WITHOUT CONTRAST

Imaging needed for continue of treatment possible spinal injection or neurosurgery evaluation; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; patient will continue home exercise and is going to Physical Therapy 3 times a week for 6 weeks.

Approval

72148 MRI LUMBAR SPINE OR LOW
BACK WITHOUT CONTRAST

increased bilateral radiating low back pain. Patient has not received pain relief from physical therapy or spinal injections.; MRI is needed for possible Neurosurgery evaluation; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	MRI is being requested due to patient having Lumbago. Evaluation is necessary with imaging to help diagnosis patient complete situation.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has had greater than 3 months of lower back pain with bilateral lower extremity radicular symptoms. Patient has not improved on oral meds or home exercise.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.;	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Post op complication; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; After surgery in June 2016; There has been treatment or conservative therapy.; Pain and numbness in L arm; Medication Hydrocodone	1
----------------	----------	--	--	---

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Preprocedure evaluation for possible epidural steroid injection.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Deep tendon reflexes 1-2/4 bilaterally and symmetric.   CN's II-XII intact, sensation grossly intact to light touch except some right L5 dysesthesias.	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>She has long standing low back pain. She has tried conservative measures like PT for 4-6 weeks. She just finished. Due to this failure of conservative care we will need to check an MRI of the lumbar spine. We can start some tramadol for the prn pain in; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; She has a 6 year h/o lbp. She has axial pain. She thinks the pain started about 6 years ago after she had her son.; She has tried PT for 4-6 weeks. She just finished that. She takes exceedrin for painShe has long standing low back pain. She has tried conse; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.</p>	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?</p>	6
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.</p>	2

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	16
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	138
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	5
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	6
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	8

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 1990; There has been treatment or conservative therapy.; Pt has pain radiating down from the back into the legs; chiro, trigger point injection, nerve simulator and several xrays	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	We discussed checking an MRI of the lumbar spine. She has had an EMG that was abnormal and showing an L5-S1 radiculopathy. She also had an Xray that showed L5-S1 arthritis. She has some decreased sensation over the left ant thigh vs the right. Because of; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72192 CT PELVIS WITHOUT CONTRAST	Pelvic pain; This study is being ordered as a follow-up to trauma.; "The ordering physician is a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.	1
Anesthesiology	Approval	72196 MRI PELVIS	; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Anesthesiology	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1

Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";	1
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	9
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Anesthesiology	Approval	73700 CT LEG OR LOWER EXTREMITY		1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; PAIN IN NECK, BACK AND KNEE;	1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion	2

Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		
Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 6/1/2016; There has been treatment or conservative therapy.; low back pain, radicular pain, hip pain; home exercise, insets, pain medication	1
Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1

Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).	1

Cardiac Surgery	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Pt was found to have extremely elevated ICA/CCA ratio on the right by Doppler of 5.8, indicating greater than 70% diameter narrowing. On the left, stenosis is suggested to be approx. 50% diameter narrowing. Pt needs CTA Head and Neck to delineate carotid ; This study is being ordered for Vascular Disease.; 9/30/16; There has not been any treatment or conservative therapy.; Pt has severe multi-level cardiovascular dz, having just undergone coronary artery bypass grafting. Carotid stenosis was found on preoperative testing by Doppler without acute symptoms but history of symptoms consistent with TIA events.	1
Cardiac Surgery	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	5
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	4
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2

Cardiac Surgery	Approval	71250 CT CHEST, THORAX	3 month Follow up with a chest ct; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	8
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	chest mass was seen in July 2016 on CT scan. This is a follow up CT to evaluate mass growth.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	follow -up to surgical procedure,; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	left lower lobe nodule measuring up to 8 mm in size. Also aneurysm of the ascending thoracic aorta measuring up to 5.5 cm; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	Pt is status post sternal plating and is having superficial swelling in his chest. Test ordered to accesss for abcess.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	Surgery is scheduled within the next 30 days.; A Chest/Thorax CT is being ordered.; The patient is having an operation on the chest or lungs.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1

Cardiac Surgery	Approval	71250 CT CHEST, THORAX	The ordering physician a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is radiologic evidence of a lung abscess or empyema.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	There is not a known inflammatory disease.; There is not a known tumor.; "The ordering physician is NOT an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; There is known vascular disease.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	unknown; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; There is no physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is being ordered for Vascular Disease.; ; It is not known if there has been any treatment or conservative therapy.;	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1

Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Abdominal aortic aneurysm with bilateral iliac artery aneurysms; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Ascending thoracic aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pre-op evaluation; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Pt needs CTA to delineate complicated anatomy to assess possible aortic root obstruction s/p two previous Gore Tex tube reconstructions as a young child for pulmonary artery atresia. Pt now has severe bilateral pulmonary artery stenosis and is being consi; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	thoracic aortic aneurysm without rupture; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71555 MRA, MRI ANGIOGRAPHY CHEST[NOT MYOCARDIUM] WITH/WITHOUT CONTRAST	; This is a request for an MR Angiogram of the chest or thorax	1
Cardiac Surgery	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1

Cardiac Surgery	Approval	73206 CT ANGIOGRAPHY UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; prior to 11/17/16; There has not been any treatment or conservative therapy.; numbness up the pain and neck/ no pulse	1
Cardiac Surgery	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.	1
Cardiac Surgery	Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	1
Cardiac Surgery	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	pt. have a fragmented vena cava filter; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Cardiac Surgery	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	6
Cardiac Surgery	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the abdomen.	1
Cardiac Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor	1

Cardiac Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; <Enter Additional Clinical Information>	1
Cardiac Surgery	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Ct scan of abdomen shows a 10mm nodule in the right lower lobe of lung. Family hx of Tuberculosis. History of alcohol abuse. Chronic productive cough.	1
Cardiac Surgery	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	; This study is being ordered for Vascular Disease.; ; It is not known if there has been any treatment or conservative therapy.;	1
Cardiac Surgery	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	15
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
-----------------	----------	---	---	---

Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
-----------------	----------	---	---	---

Cardiac Surgery	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.	1
Cardiac Surgery	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Cardiac Surgery	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1
Cardiac Surgery	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	1

Cardiac Surgery	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	patient arm and hand is now feeling and numbness and left over extremity weakness; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	1
Cardiac Surgery	Disapproval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Pt was found to have extremely elevated ICA/CCA ratio on the right by Doppler of 5.8, indicating greater than 70% diameter narrowing. On the left, stenosis is suggested to be approx. 50% diameter narrowing. Pt needs CTA Head and Neck to delineate carotid ; This study is being ordered for Vascular Disease.; 9/30/16; There has not been any treatment or conservative therapy.; Pt has severe multi-level cardiovascular dz, having just undergone coronary artery bypass grafting. Carotid stenosis was found on preoperative testing by Doppler without acute symptoms but history of symptoms consistent with TIA events.	1
Cardiac Surgery	Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the Neck.	1
Cardiac Surgery	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Disapproval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdomen.	1

Cardiology	Approval	70450 CT BRAIN, HEAD	Mrs Linenfelser presents to clinic c/o syncopal episode that was witnessed by her co-workers that lasted from 1338 to 1407. She states she drives for a living and stopped to let people off van when symptoms began. She woke up with slurred speech, memory l; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.	1
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	2
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.	1

Cardiology	Approval	70450 CT BRAIN, HEAD	Unknown; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Syncope/Fainting; It is unknown why an MRI is not being considered	1
Cardiology	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1

Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;	2

Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	worsening syncopal episodes, dyspnea on exertion, shortness of breath, carotid stenosis, carotid bruit, TIA like symptoms, hypertension, hyperlipidemia, CC3 angina, family history of diabetes, current heavy smoker; This study is being ordered for Vascular Disease.; Carotid stenosis, carotid bruit, TIA like symptoms, syncope, hypertension, hyperlipidemia, family history of diabetes, family history of stroke, current heavy smoker; There has been treatment or conservative therapy.; worsening syncopal episodes, CC3 angina, shortness of breath, dyspnea on exertion, TIA like symptoms; nuclear stress test which resulted abnormal; worsening syncope episodes; medical therapy, medication management	1
Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	21

Cardiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	For the past two days, a constant what is described as vertigo and some intermittent nausea and vomiting. Similar episode lasting two days about a month ago. Patient has had similar symptoms dating back to 2012; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo	1
Cardiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Cardiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
Cardiology	Approval	71250 CT CHEST, THORAX		1

Cardiology	Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Cardiology	Approval	71250 CT CHEST, THORAX	"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	2
Cardiology	Approval	71250 CT CHEST, THORAX	"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1
Cardiology	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2
Cardiology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiology	Approval	71250 CT CHEST, THORAX	; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiology	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

Cardiology	Approval	71250 CT CHEST, THORAX	6 month follow up on aortic root dilatation on echo, History of ST elevation myocardial infarction (STEMI), left ventricular systolic dysfunction, essential hypertension, dyslipidemia; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	3
Cardiology	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	1
Cardiology	Approval	71250 CT CHEST, THORAX	assess ascending aorta, abnormal findings on diagnostic imaging of heart and coronary circulation, atrial fibrillation / atrial flutter, history of hypertension, anemia and resting tachycardia; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	chest ct being ordered due to status post repair of the thoracic .; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	EVALUATION OF TAA; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

Cardiology	Approval	71250 CT CHEST, THORAX	Patient comes in today for a follow up of testing. 09/16/2016 Echo showed LVEF 60-65%, Mild mitral valve prolapse with trace MR, otherwise unremarkable. Stress test was normal as well. Holter monitor showed rare PVC'; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	Patient presents with chest pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	pt is having shortness of breathe, chest pain and mummer; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	Surgery is scheduled within the next 30 days.; A Chest/Thorax CT is being ordered.; The patient is having an operation on the chest or lungs.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST		3
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a cardiac surgical procedure.; quadricuspid aortic valve. Would recommend further diagnostic evaluation with cardiac CTA or cardiac MR, if clinically indicated, to confirm this and to evaluate for other cardiac associations; Yes, the examination is for noninvasive coronary arterial mapping.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a cardiac surgical procedure.; This procedure is being performed for cardiac evaluation before possible cardiac surgery of a patient with known cad; No, the examination is not for noninvasive coronary arterial mapping.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for evaluation after cardiac angioplasty, stent or bypass graft.; Mr. Higby is here for followup. He's back in afib/atypical atrial flutter on today's EKG. Wasn't aware he was out of rhythm. Has been feeling left sided chest pressure for the past few weeks, intermittent. Wife reports he fell a few weeks ago, was intoxicated	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.;	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; patient has coronary artery calcification and strong family history	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; ; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; stress echo equivocal due to poor exercise tolerance and hypertensive response to exercise bp up to 206/73 recommending cta of the coronary arteries; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms)?; <Additional Clinical Information>	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.; Pt has AFIB and has been on long term high risk medication and is having unhearled syncope	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.; Pt with cardiomyopathy chest pain and dyspnea on exertion abnormal stress echo.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.; Seizure disorder; Chronic kidney disease, unspecified; Rhabdomyolysis: Chronic unknown etiology; Hematuria; Myalgia: Muscle pain; Essential (primary) hypertension; Syncope and collapse: Loss of bowel and bladder; Fatigue; Shortness of breath: SOB/DOE;	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.;	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; <Additional Clinical Information>	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Mixed perfusion defect in the anteroapical segments suggesting intermediate risk proximal LAD disease. Preserved ejection fraction with normal wall motion and contractility. Poor exercise capacity due to arthritis with Lexiscan chemical stress added on to	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Nuclear stress test was abnormal, as well as EKG and holter monitor	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Technically sub-optimal study secondary to normalization artifact.  Mild intensity reversible perfusion defect of distal anterior segment and LV  apex suggesting small sized mild ischemia in the distal LAD territory.	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING		1

Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Previous PTA attempted without success due to inability to cross right SFA and worsening of symptoms; This study is being ordered for Vascular Disease.; 2014; There has been treatment or conservative therapy.; Worsening claudication symptoms, previous failed peripheral arteriogram; Previous Peripheral Arteriogram, treatment of Cholesterol, previous peripheral by-pass surgery	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	squeezing chest discomfort, left arm numbness, tingling with her fingers, SOB, and nausea. Nitro x 1 relieved symptoms. She states there is no common denominator to her CP. She has increased fatigue, waking up tired with increased SOB just walking to the ; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; squeezing chest discomfort, left arm numbness, tingling with her fingers, SOB, and nausea. Nitro x 1 relieved symptoms. She states there is no common denominator to her CP. She has increased fatigue, waking up tired with increased SOB just walking to the ; medication and prior stenting	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	61
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		21

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p># Angina (I20.9); # Hypertension (I10); # Diabetes mellitus (E11.9); # Hyperlipidemia (E78.5); # Palpitations (R00.2); # Obesity (E66.9); The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.;</p> <p>The member has known or suspected coronary artery disease.; The BMI is 20 to 29</p>	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is not presenting new symptoms of chest pain or significant EKG changes.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; It is not known if the patient had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; It is not known if patient had a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered as a pre-operative evaluation.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is not prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>1 angina: She has a very strong family history of coronary artery disease. One of her sisters died from sudden death at the age of 35. Her other 2 sisters have coronary disease as well. Her mother had coronary disease later in life. She has some vague sym; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>1. Chest Pain &#x0D; 2. Dyspnea &#x0D; 3. Palpitations &#x0D; Ms. Whiteside is a 62 year old female here for follow up. He has no prior history of coronary artery disease. Echo 10/14/14 revealed EF 60-65%. She presents today with complains of chest pain she describe; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>1. Chest Pain &#x0D; 2. Hypertension &#x0D; Ms. Watkins is a 37 year old female here for new patient evaluation for hypertension and chest pain. She has history of preeclampsia in 2012 and was on BP meds then but stopped meds 1 year later. She had a venous in 201; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>1. hypertension &#x0D; 2. arrhythmia &#x0D; Mr. Mitchell is a 65 year old African American male here for a New Patient evaluation for arrhythmia with no known cardiac history. He reports a history of hypertension. He reports he went to pcp office for a cold and h; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	38-year-old white male who over the last few weeks has been experiencing recurring episodes of mid precordial tightness, a cramping sensation, associated with dyspnea, lasting 3-4 minutes, nonradiating, spontaneous resolution, happening in a random fashion; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	45-year-old male with a history of pulmonary hypertension, hepatitis C, history of methamphetamine abuse, hypertension presented to the Sparks Hospital after cardiac arrest. Patient took 0.5 mg of IV methamphetamine and also had significant amount of alcohol; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	57 yo female here for new pt appt referred for DOE. PMH of htn, hyperlipidemia, URI, glaucoma. Pt presents today with SOB at times, racing of heart, edema in legs and feet, occasional edema in legs and feet, occasional dizziness. The patient complains; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	59-year-old male former smoker and ethanol abuser with medical history remarkable for gastroesophageal reflux disease. He presents to the office with complaints of recurrent chest pain for one week. The pain is substernal in location and began while at rest; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	63 yo female here for a new pt appt for afib and htn. PMH of afib, htn, hypercholesterolemia. Pt presents today with SOB on exertion. ; Cardioline stress test to rule out myocardial ischemia in a patient with strong coronary artery disease risk factors.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 39-year-old lady, very much overweight at 342 pounds BMI 57; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 44-year-old gentleman with a history of untreated high blood pressure presented to the Cardiology Clinic with a two month history of chest pain and dyspnea on exertion which is exertional that happens at very low level activities, no resting symptom, no; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 50-year-old lady with a history of coronary artery disease, percutaneous trans luminal coronary angioplasty stent to the left anterior descending artery, hypertension, and hyperlipidemia returned to clinic with recurrent chest pain associated with near ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal EKG ; has thyroid and renal disease; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal EKG Right Bundle Branch Block; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal EKG, abnormal calcium score; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	a-fib, cardiomyopathy, heart function between 25% and 35%, checking for possible blockage; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Angina over the last several weeks. Incomplete Right Bundle Branch Block on EKG.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	angina pectoris, arteriosclerosis of extremity with rest pain, shortness of breath, dyspnea on exertion, lower extremity edema, systolic CHF chronic, left heart failure, CAD s/p stent, abnormal echo.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Angina, Dizziness, Unable to exercise due to recent knee and ankle surgery.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>angina, dyspnea on exertion, hyperlipidemia, hypertension, coronary artery disease.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>angina, unable to walk on a treadmill due to swelling and pain in limbs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Angina; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Arteriosclerosis of native coronary artery w/ other form of angina pectoris: Angina CC II; Peripheral vascular disease, unspecified: PAD; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; Varicose veins of leg w/ edema; Vari; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Arteriosclerosis of native coronary artery w/o angina pectoris; Chronic diastolic (congestive) heart failure; Essential (primary) hypertension: Accelerated; Obesity; Shortness of breath: SOB/DOE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Arteriosclerosis of native coronary artery w/o angina pectoris; Essential (primary) hypertension; Other cardiomyopathies; Mixed hyperlipidemia; Other chest pain; Shortness of breath; Impaired glucose tolerance; Weakness: Weakness/fatigue; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Assessment & Plan: # ATRIAL FIBRILLATION (I48.91); # DIABETES MELLITUS WITHOUT MENTION OF COMPLICATION TYPE II OR UNSPECIFIED TYPE NOT STATED AS UNCONTROLLED (E11.9); # HYPERTENSION BENIGN ESSENTIAL (I10); # OBESITY UNSPECIFIED (E66.9); # MITRAL INS; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>atypical chest pain, family history of cardiovascular disease. The history is provided by the patient. No language interpreter was used. # Mr. Qualls is 39 yr old male with family hx of CAD is here to establish care. Has noted to have recurrent sharp ch; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	atypical chest pain, shortness of breath on exertion, heart palpitations. Chest Pain (Angina) This is a new problem. The current episode started more than 1 week ago. The problem occurs every several days. The problem has not changed since onset.Associat; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Bilateral carotid stenosis, presurgical eval for CAD, htn, CVA; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD, HTN, Cardiomyopathy; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD, HTN, Dizziness, Hyperlipidemia, Dyspnea on Exertion.; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD, HTN, Hyperlipidemia, Abdominal aortic aneurysm; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD, HTN; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD, Hyperlipidemia, Abn-EKG, needing test done for DOT; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CANCER; FAST/IRREG HEARTBEAT; HEART ATTACK; HYPERLIPIDEMIA MIXED (E78.2); CONGESTIVE HEART FAILURE UNSPECIFIED (I50.9); This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is not presenting new symptoms of chest pain or significant EKG changes.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cardiac clearance for ICD 10 generator exchange.; This study is being ordered as a pre-operative evaluation.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is not prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cardiac evaluation of tachycardia, hypertension, and hyperlipidemia. He has history of diabetes mellitus type 2 . complains of dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cardio lite stress test, (the patient has history of silent ischemia and numerous risk factors for restenosis).; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cardiomyopathy, syncope, dyspnea, palpitations, atrial fibrillation.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	central hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest discomfort, other chest pain, palpitations, essential hypertension, obstructive sleep apnea, dyspnea on exertion, near syncope. Shayne Grantham, a 43 y.o. male presents with a Chief Complaint of Establish Care (states MD told him he had fluid on his; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain PVD abnormal EKG; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain  Heart Attack (Mother) Shortness of breath (R06.00): with exertion Morbid obesity (E66.01): Hypertension (I10);; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN PALPITATIONS; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, abnormal EKG, hypertension, diabetes, patient unable to walk on a treadmill due to leg pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, abnormal EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, dyspnea, lower extremity edema, fatigue, positive family history; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, hypertension.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, SHORTNESS OF BREATH, ABNORMAL EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, SSS, CARDIOMYOPATHY, HTN, MVR, DIABETES, FORMER SMOKER, FAMILY HX OF CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain: Atypical. She does have significant risk factors. EKG shows nonspecific changes likely related to hypertension and LVH. She reports sharp chest pains with exertion across her chest and into her back with increased SOB and vision changes. Sh; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pains dyspnea. shortness of breath; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest soreness, left precordial i.e. chest pain. , lasts 5-10 minutes, not associated exercise, associated dyspnea.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest tightness, chest pain, palpitations, essential hypertension, dizziness, dyspnea on exertion. Patient with a history of HTN, family history of CAD, here for evaluation of palpitation symptoms, associated with LOC. This was two years ago, more recent!; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Chest tightness, shortness of breath, chest pain, hard to breath , relieved with rest . Family HISTORY OF EARLY onset CAD. Lower extremity discomfort and cold feet. Had an EKG. Sinus rhythm with premature atrial complexes PAC incomplete right bundle bra; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Chief Complaint: Chest pain. &#x0D; &#x0D; 1. Chest pain/SOB/Angina pectoris equivalent . &#x0D; &#x0D; 2. Hypertension . &#x0D; &#x0D; 3. Obesity . &#x0D; &#x0D; 4. Strong family history of CAD .&#x0D; &#x0D; History of Present Illness: &#x0D; Patient is a 32 year old Caucasian Female. &#x0D; &#x0D; Complaints today ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Chronic diastolic (congestive) heart failure; Essential (primary) hypertension; Syncope and collapse: Continued; Varicose veins of leg w/ pain; Varicose veins of leg w/ edema; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>cigarette smoker, chest pain, SOB, dizziness; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Complains of elevated of elevated blood pressure and chest pain.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complains of SOB on exertion, dizziness, edema to both feet bilaterally, claudication, and low energy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Continues to c/o of episodes of chest pain with associated SOB, palpitations, and Fatigue The pain is a throbbing pain left sternal area and radiates up under her arm pit... she also has associated dizziness and feels like she is going to pass out... when; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Coronary atherosclerosis (I25.10): s/p PCI of the LAD; Chest Pain; DM; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; chest pain 10/24/16; It is not known if there has been any treatment or conservative therapy.; chest pain	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cp, dyspnea on exertion, left ventricular hypertrophy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP, Dyspnea, Palpitation, obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP, HTN; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP, SOB, Angina, Abn-EKG, FM HX; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ct calcification score over 600; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Diabetic pt having complaints of nonexertional chest pain.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Diabetic pt having worsening shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dizziness, light headed, near syncope, cardiac murmur, obese, SOB, palpitations.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Dizziness, palpitations, short of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Dobutamine stress echo done on 10/13/2016 was non diagnostic.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dysphasia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Dyspnea, essential hypertension, palpitation.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dyspnea, HTN.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dyspnea, tachycardia, palpitations, near syncope.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	eccentric primary hypertension, and palpitation and dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - or Type FOUND SHE HAD MYCARDIAL BRIDGE TO LAD DURING A HEART CATH. PATIENT HAS HAD A WALKING TREADMILL, HOWEVER SHE COULD NOT GET HEART RATE UP; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Enter answer here - or Type In Un55 F with h/o hypothyroidism, gastritis is here for evaluation of palpitations and chest pain. About 2 weeks ago, when patient was at work, she started feeling palpitations along with dizziness and appeared pale. BP che; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Episode of syncope; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	episodes of chest pain/pressure that start in left chest and radiate to left arm and jaw. Event monitor reveals sinus brady and tachy with possible irregular rhythm. Patient also has a new seizure disorder.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Episodes of chest tightness, moderate intensity, usually brief. Started in July, occurs day and night, several episodes weekly. Associated orthopnea and PND. BP has been much higher, carvedilol recent increased.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Essential (primary) hypertension; Arteriosclerosis of native coronary artery w/ other form of angina pectoris; Family history of ischemic cardiac disease; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; Dizziness; Syncope an; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Essential (primary) hypertension; Chronic combined systolic (congestive) and diastolic (congestive) heart failure; Other cardiomyopathies; A fib: Paroxysmal; Shortness of breath: SOB/DOE; Palpitations; Other chest pain; Arteriosclerosis of native corona; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Essential (primary) hypertension; Chronic diastolic (congestive) heart failure; Mixed hyperlipidemia; Obstructive sleep apnea; Shortness of breath: SOB/DOE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Essential (primary) hypertension; Mixed hyperlipidemia; Other specified diabetes mellitus without complications; Lesion of plantar nerve of lower limb; Shortness of breath: SOB/DOE; Fatigue; Arteriosclerosis of native coronary artery w/ other form of ang; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	exercise nuclear to assess functional capacity. patient diabetes mellitus II, hypertension, abnormal EKG, obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	exertional chest pain chest pain at rest family history of heart disease mother had stent in her 40's. hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>F/u on CAD; patient with hx of kidney transplant; hx dvt and cva; mild swelling when he wakes up; has chronic renal deficiency; diabetic; hyperlipidemia; hyperthyroidism; BMi 37.2; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Family history of ischemic cardiac disease; Arteriosclerosis of native coronary artery w/ other form of angina pectoris; Essential primary hypertension; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; Personal history of nic; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	had echo done yesterday , hypertension, palpitations; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Had stent to LAD 2012, hypertension, hyperlipidemia, cannot walk to due gout and arthritis; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Has chest pains with exercise, mid precordial, last 2-3 minutes, no radiation, and no palpitations.....; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Has diabetes, hyperlipidemia, essential hypertension, palpitation, chest pain, edema.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	HAS ON GOING CHEST PAIN, SHORTNESS OF BREATH WITH EXERTION,ALSO HAS FATIGUE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He complains today of "tight" CP, SOB with exertion, and palpitations. He was admitted with Afib 10/17.. His echo on 10/17 showed EF 40%. He has history of alcohol abuse, HTN, Afib, and depression.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He had DD pacemaker implantation in 2007 and lost f/u. He has h/o HTN, on Lisinopril 20 mg po bid, now changed to Amlodipine 5 mg po bid for 1 week. BP still 133/83-160/103. Echo 9/2015 showed normal LVEF with mild TR and MR. No chest pain, SOB, DOE, orth; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He is here for a routine follow up visit. He denies any angina, shortness of breath, orthopnea, or PND. Has known CTO of RCA, moderate LAD disease. The patient clearly describes snoring, frequent nocturnal awakenings, some headaches, chronic fatigue and c; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He is referred by Dr. Daniel. No chest pain, SOB, orthopnea, PND, dizziness, syncope, palpitation. Mild SOB on exertion, associated with weakness, relieved by rest. He smokes cig 1ppd for 39 years. He has HTN, DM, HLD. FH(+), brother had CABG in his 50s.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He reports episode of lightheadedness earlier this week where he felt he was about to black out. He states he feels lightheaded "all the time" but it seems to be more constant over the past few weeks. He does report SOB as well.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He was not evaluated for CAD yet. He is finally willing to be evaluated for ICD placement; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	heart disease w/out heart failure; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Heart disease, abnormal echo; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hip pain could not walk on treadmill CP; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	History of Present Illness 49 YO with hx of DM is referred for evaluation of CP and abnormal ECG   Cardiovascular risk factors: hypertension.   The patient presents with complaints of gradual onset of intermittent episodes of moderate chest pain, de; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	History of Present Illness 59 YO with hx of DM, HTN, HLP, cancer survivor is referred for evaluation of CP  Patient has experienced chest pain  Cardiovascular risk factors: hypertension, diabetes, high LDL cholesterol and low HDL cholesterol.  The pa; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	HTN, palpitations, dyspnea.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	HTN.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hyperlipidemia, essential hypertension, shortness of breath.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hyperlipidemia, essential primary hypertension, dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hyperlipidemia, HTN, type 2 Diabetes.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hyperlipidemia. shortness of breath. hypertension; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hypertension family history coronary artery disease; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hypertension essential/ syncope / chest pain/ family history of ischemic heart disease; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	INITIAL VISIT FOR NEW ONSET CHEST PAIN, SOB. PATIENT HAS A FAMILY HISTORY OF CAD.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ischemic chest pain. Michael D Smoke is a 43 y.o. Caucasian male who presents for evaluation of chest pain Onset was 6 months ago, with waxing and waning course since that time. The patient admits to chest discomfort that is aching, dull, intermittent, w; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ischemic chest pain. Aaron Wayne Martin is a 42 y.o. Caucasian male who presents for evaluation of chest pain while preaching. Happens every sundays while standing and preaching. Rest of the days he is active but no pain. No other symptoms. Onset was 4 m; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Known CAD, Hypertension and chest pain.; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	known CAD; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	left ventricular systolic dysfunction, left sided chest pain, essential hypertension, dyslipidemia. Patient with a past history of hypertension, anxiety disorder, arthritis, LV systolic dysfunction, tobacco use, normal coronary angiogram in 2014, here f; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	left-sided chest wall pain, palpitations, shortness of breath. Patient with a past history of dyslipidemia, here for evaluation palpitation symptoms. Describes non-activity fluttering sensations in her chest, associated with nausea, typically occurs at th; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>midsternal chest pain that is frequent lasting various times, sob often, occasional flutters; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Mixed hyperlipidemia; Shortness of breath; Essential (primary) hypertension; Angina pectoris; Dizziness; Syncope and collapse; Peripheral vascular disease, unspecified; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; Family ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	morbid obesity, unable to walk on tm due to foot brace, hypertension, cp, smoker, family history of cad, diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr Perry is a 38 year old male referred by Dr Pillow for chest pain. He reports an episode fo sharp chest pain in the center of his chest that lasted about 30 seconds and went away. A few days later he had pressure in his left upper chest that lasted abou; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr Ward is a 25 yo male with a hx of HTN, OSA with CPAP and GERD who was referred by Dr Siddiqui for chest pain. He also reports DOE since Jan 2016, denies orthopnea/PND. He was admitted to SVI April 2016 for BLE edema, during admission he was told that h; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Boling is a 51 year old white male here for follow up for atrial fibrillation with DCCV 10/14/16. He has cardiomyopathy and chronic diastolic heart failure followed in CHF clinic with last echo 9/19/16 Ef 45-50%, mild MR. He has SSS and scheduled for ; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Moss comes in for initial a valuation. He recently had increased blood pressure. He also describes some chest pressure and had an abnormal EKG. He was sent here for evaluation. He has pressure in chest at times. Varying amounts of time. He has h/o pan; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Raney is a 64 year old, new patient, referred by primary care provider Dr. Motts to establish care with a cardiologist because he has been having some mild, dull chest pain for ~1-2 years that comes and goes with activity, relieved by rest. He describ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Ms Knuckles is a 59 year old female referred by Dr Hall for chest pain and an abnormal EKG. She had an episode of chest pain about 3 months ago that came on randomly and lasted several hours. She did not see anyone about it and just went to bed. She says ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Ms Scott is a 40 yo AAF with a hx of who was referred by Dr Siddiqui for chest pain, dyspnea and BLE edema . C/O chest pain described as substernal pressure/heaviness associated with dyspnea, lasting 20-30 min, occurring 3-4 times over the past couple mon; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Curtis is a very pleasant 44 year old lady (medical auditor) with history of longstanding HTN on BP med since teenager and palpitations, tachycardia, Paget-Shroetter syndrome (venous thoracic outlet syndrome) s/p 1st rib resection, and TAH/BSO with bl; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Franklin is a 40 year old white female here today for evaluation. She presented to the ER yesterday by EMS with complaints of dizziness and near syncope. EKG revealed prolonged QT interval. She presents today with complaints of palpitations, occasional; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Johnson is referred for cardiac evaluation. She has a past medical history of obesity. She reports left-sided chest pain radiating into her left arm described as sharp or dull ache occurring while at rest or with exertion and has been constant for t; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Stacy is here for annual follow up visit. She has known PDA s/p closure. She states that she has a "pocket of fluid" on her spine and she has leg pain. She was asked to follow up with cardiology for cardiac/PVD workup. She denies angina or dyspnea. Sh; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	N/A; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	N/A; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	NEW ONSET CHEST PAIN, SMOKER, FAMILY HX OF CAD/ANAL CANCER, LYMPHOMA; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>NEW ONSET CHEST PAIN, SOB FATIGUE, SYNCOPE, PVD, SMOKER, FAMILY HX OF CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>New patient leg pains last 2 months, both legs from hips, continuous pain, not related exercise, associated ankle edema, ...palpitations episodes 2 years, with emotion ,palpitations and associated syncope, no associated palpitations,atypical chest p; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient referred Jennifer Miller,APN, with severe hypertension, asymptomatic, no associated angina or dyspnea; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient with history fatigue one year, daily activities, and 18 months ago, spell extreme fatigue, slurred speech, left arm weakness, went to Wadley Texakarna, told after CT mild TIA....and had 3 other 3 similar episodes and seen neurology...has dyspn; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	no; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/15/2016; There has not been any treatment or conservative therapy.; Pt has chest pain shortness of breath. Fatigue.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	OBESE WITH ABNORMAL EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Obese; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Obesity, Murmur, HTN, Palpitation; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Obesity; strong family hx; abnormal EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Other chest pain; Mixed hyperlipidemia; Shortness of breath; Weakness; Essential (primary) hypertension; Chronic diastolic (congestive) heart failure; Chronic kidney disease, stage 3 (moderate); Factor V Leiden mutation; Long term (current) use of anticoa; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Other chest pain; Palpitations; Shortness of breath; Essential (primary) hypertension; Dizziness; Varicose veins of lower extremity with inflammation; Family history of ischemic heart disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, benign hypertension, morbid obesity with body mass index of 40.0-49.9, c/o episodes of weakness, heart fluttering, chest tightness - no previous cardiac work up. Felt some deep pain in chest and once associated with fluttering sensation.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, essential hypertension, family history of cardiovascular disease, tachycardia.; Chest Pain (Angina); This is a recurrent problem. The current episode started more than 1 week ago. The problem occurs daily. The problem has not changed since; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Palpitation, current smoker,; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient comes in today for a new patient establishment. He was referred by Dr. Garcia. He has been having chest pain to the left of his sternum he describes it as a deep tingling pain. The pain intensifies with positions and deep breathing. He states it is; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PATIENT COMPLAINS OF SOB & HAD ABNORMAL EKG IN OFFICE; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient continues to have chest pain and had an intermediate grade disease in left anterior descending artery up to 60% stenosis. We will get a Lexiscan Cardiolite stress test to assess for the physiological significance of this intermediate grade disease; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has angina, SOB, and dizziness. She underwent a regular treadmill stress test and it was found to be positive. There was an inferolateral ST depression which was upsloping during the exercise. This resolved during recovery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has chest pain, shortness of breath, dyspnea, family history of ischemic heart disease, palpitations.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has essential hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has hyperlipademia; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has hyperlipidemia palpitations. hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has hyperlipidemia and has dyspnea; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>patient has palpitations, dyspnea,; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>patient is having active chest pain and shortness of breath.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Patient is having Chest pressure and active chest pain.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient needing clearance for surgery; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient presented to ER with chest discomfort, SOB, & symptomatic palpitations and was found to be in a-fib and an episode of bradycardia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient presents as a new patient for chest pain. She states approx 1.5-2 weeks ago it started on a Thursday with substernal intermittent sharp chest pain, associated with nausea. She also reports increased SOB at rest and with activity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient presents today with complaints of chest pain he describes as heaviness and radiates into L arm and lasting 5 minutes.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient with seizure disorder reports substernal chest pain radiating to jaw & with sob. Physician reluctant to perform TMST due to history of severe seizures that have resulted in multiple fractures.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PMH includes CAD s/p PCI in 11/2015, DM type 2 with insulin pump, neuropathy, renal disease (He reports last kidney test showed 30% damage) HLD, HTN. He states his last cath in 11/2015 showed 60% blockage. Recommend MPS to assess for ischemia.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PMH includes HTN. He underwent left heart cath with LV angio, aortic root angio and coronary angios done vial RFA without apparent complication on 2/2016. LVEF= approx 40%. Resolute stents in RPLB and in distal segment of RPDA and also placed a Resolute ; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Preoperative evaluation; This study is being ordered as a pre-operative evaluation.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	presented to the Emergency room for chest pain and shortness of breath for 2 days; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Presents to the clinic today with complaints of chest tightness with exertion, dyspnea with exertion, palpitations, dizziness with dyspnea, no energy and snoring.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pressure like retrosternal left-sided chest pain that last for 15 to 20 minutes associated with some diaphoresis and shortness of breath. The pain resolved after resting. There was no radiation. electrocardiogram done which showed some nonspecific T wav; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PREVIOUS cocaine and methamphetamine user; Complains of chest pain and heavy pressure; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt came into ER with Palpitations. Had an abnormal ekg.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt cannot walk a treadmill; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt can't have stress echo due to diastolic htn; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT COMES TO OFFICE WITH CHEST PAINS AND SHORTNESS OF BREATH WITH KNOWN CHF; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt denies prior cardiac problems, was being evaluated for knee surgery and had abnormal EKG. Hx of dizziness and palpitations, no syncope, dyspnea on exertion with dizziness, EKG shows left branch block.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is not presenting new symptoms of chest pain or significant EKG changes.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt had an abnormal treadmill test; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has angina with h/o diabetes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has essential HTN, hyperlipidemia, and angina pectoralis; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has essential hypertension, dyspnea, ventricular tachycardia, and congestive heart failure.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has hyperlipidemia, essential hypertension, SOB; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has hyperlipidemia, essential hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has hypertension family hist CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has hypertension, sharp chest pain radiates to arm, shortness of breath; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has syncope with chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has uncontrolled diabetes and needs a myoview to follow up on known cad s/p stent. pt is asymptomatic; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT HAVING CHEST PAINS, WITH SHORNESS OF BREATH AND PALPITATIONS.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for check up. c/o knots under left arm which he thinks is shingles. Pt states that cough is getting bad which he thinks is from lisinopril. Also states that he has been having SOB with the slightest bit of exertion that has progressively gotten worse; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for f/u event monitor results. States is having dyspnea, palpitations, some edema. States she went to pulmonologist for dyspnea. She was told it was reflux and started on Nexium. States it is not helping. Failed sotalol and Tikosyn. Recent event; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for follow up after starting amlodipine. States that bp has been running in average 120s - 130s over 70s with hr 75-78. Pt has been taking medication. Pt states that he feels like his bp is only due to white coat syndrome as he has checked bp over; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for followup of palpitations and tachycardia. She was admitted to the Fordyce hospital with chest pain, shortness of breath, tachycardia, and felt bad. Her enzymes were negative. She was tachycardic. She was asked to followup here in the office.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here today for follow up. She has a known history of hypertension, dyslipidemia, diabetes. LDL 148. HGB A1C 6.6. Today, pt stated that she has been having left sided chest pain with and without exertion. Radiates to left axilla area. Associated symptom ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; angina of effort, essential hypertension, dyslipidemia. Pt here today for follow up. She has a known history of hypertension, dyslipidemia, diabetes. LDL 148. HGB A1C 6.6. Today, pt stated that she has been having left sided chest pain with and without exe	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt is experiencing tightness up the neck, syncope episodes with chest pain; It is not known if the patient is diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT IS NEEDING BACK SURGERY, PT HAVING SHORTNESS OF BREATH AND HAD ABNORMAL EKG, SUSPECTED CAD POSSIBLY; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt is obsess, very heavy smoker, tachycardia on EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT KNOW PREFORAL ARTIRIAL DISEASE, ABNORMAL EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology

Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Pt presents today with 3 episodes of chest pain, 1st one was 3 mo ago midsternal radiating to left arm and hand with numbness in arm and fingers, pain lasts just a few seconds and is described as sharp and heavy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Cardiology

Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt tried to do walking myoview and was unable to complete test. this myoview will be done pharm; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt unable to walk on treadmill due to broken pelvis. Cp, family history of CAD, smoker; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt w/known CAD. needing surgical clearance. unable to ambulate treadmill due to needing hip replacement.; This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt was unable to achieve his heart rate with the stress echo to determine if there was any ischemia; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt. cannot walk on treadmill due to ligamentous injury. Chest Pain and chronic fatigue; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt. had a stent placed recently.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	R/O CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reason for Appointment  1. Chest Pain    History of Present Illness  HPI:  Patient is referred to us by Christopher Jackson APRN. She saw him last week for intermittent chest pain that has been going on for 3 weeks now. Chest pain is local; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reason for Appointment  1. Oral infection    History of Present Illness  HPI:  Rachel is self referred after her oral surgeon suggested she see a cardiologist to make sure her oral infection has not traveled to her heart. She has had 3 rou; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reason for visit: chest pain, dyspnea and left arm numbness.  History of Present Illness 39 y/o male smoker with no significant PMH who presents for evaluation of CP symptoms. Was seen recently in the ER where he had negative cardiac enzymes and negat; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Recent chest pains of a few weeks in duration, intermittent, but none the past week. She describes it as a mild dull left sided pain, worsened with turning the head or dropping her left arm. No associated symptoms. CP variable intensity and duration.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	recent LAD stent and pacemaker placement; having cp & sob; abnormal EKG; a-fib; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ruling out CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	see clinicals attached; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She does have 60% stenosis in the diagonal branch. She reports today having intermittent episodes of chest pain. No clear cut relation with exertion that lasts for a few minutes.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She has SOB and can't do the regular stress test. She attempted but only lasted 3 minutes, chest pain radiating to arms, she has SOB; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She is self-referred. She c/o severe mid chest tightness at night, unable to move, no radiation, relieved on its own. She c/o mild left arm pain with minor exertion, associated with confusion, relieved on its own. She has h/o blood clot in legs before whe; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath; Essential (primary) hypertension; Varicose veins of bilateral lower extremity with other complication; Abnormal echo; Unspecified asthma with (acute) exacerbation; Esophageal reflux; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	SOB, CP, Palpitation; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	squeezing chest discomfort, left arm numbness, tingling with her fingers, SOB, and nausea. Nitro x 1 relieved symptoms. She states there is no common denominator to her CP. She has increased fatigue, waking up tired with increased SOB just walking to the ; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; squeezing chest discomfort, left arm numbness, tingling with her fingers, SOB, and nausea. Nitro x 1 relieved symptoms. She states there is no common denominator to her CP. She has increased fatigue, waking up tired with increased SOB just walking to the ; medication and prior stenting	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>SUBJECTIVE: Today I had the pleasure of seeing Georgia. A 63-year-old female with a chronically abnormal EKG, hypertension, hypertensive heart disease, and she had an episode of precordial chest discomfort front to back, radiating down both arms to her ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Suspected CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Suspected CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	suspected CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	syncope, HTN, palpitations.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.	13
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	40
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	12

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has diabetes.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	35
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The post stress parasternal short axis view is off axis, but appears to exhibit relative anterior hypokinesis. This is note evident in any other view  and is, in the setting of good exercise tolerance, an equivocal finding. Rec  alternative testing.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.	5

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	165
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	25

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient has congestive heart failure.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	17
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	6
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This 49 year old male presents for Cad s/p acute anterior mi, ptca, stent lad 2014 and Hyperlipidemia.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This 56 year old male new patient presents for Chest Pain, Dyspnea, Edema, dizziness and irregular heart beats.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This is a 43 year-old lady with a history of hypertension, active smoking and family history of premature coronary artery disease. The patient has fairly typical symptoms. At this time we are going to continue the aspirin and nitroglycerin p.r.n. Echocard; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater</p>	7
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater</p>	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected cardiac septal defect.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	8
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.</p>	3
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.</p>	1
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	tightness in chest and arm numbness lasting 2-3 min happens about once a wk, and ongoing for about 3 mo. Pt is sob often, and dizzy often; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Unknown; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	UNKNOWN; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	UNKNOWN; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent stress echocardiogram.; The results of the previous nuclear cardiology study were normal.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	6
------------	----------	---	--	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ventricular Premature depolarization, Angina, Palpitation, family history of heart disease.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
------------	----------	---	---	---

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Will order MPI to evaluate for ischemia given questionable chest heaviness and general fatigue.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	worsening shortness of breath and pt is diabetic; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Yearly follow-up for patient.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are documented clinical findings consistent with hypertension.;	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; It is not known if there are EKG findings consistent with cardiomyopathy or myocarditis.; It is not known if there are stress echocardiogram findings consistent with cardiomyopathy or myocarditis.; It is not known if there are abnormal lab findings consistent with cardiomyopathy or myocarditis.; < Enter answer here - or Type In Unknown If No Info Given. >	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy.;	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2016; There has not been any treatment or conservative therapy.; Chest Pains, Shortness of Breath/Angina Pectoris Equivalent, Dizziness	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; a month ago it started- 12/1/2016; There has been treatment or conservative therapy.; shortness of breath, precordial pain, Lower leg DVT (deep venous thromboembolism), chronic, right The patient admits to chest discomfort that is intermittent, with radiation to chest, rated as a scale of 6/10 in intensity that is sharp in nature. Associ; patient is on coumadin for DVT/PE: hypercoagulable/blood clotting disorders Father died at age of 46 years of MI Brother died at 47, had CABG  Factor V leiden with left leg DVT in 1990s	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; none; It is not known if there has been any treatment or conservative therapy.; none	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	Pt here today for follow up. She has a known history of hypertension, dyslipidemia, diabetes. LDL 148. HGB A1C 6.6. Today, pt stated that she has been having left sided chest pain with and without exertion. Radiates to left axilla area. Associated symptom ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; angina of effort, essential hypertension, dyslipidemia. Pt here today for follow up. She has a known history of hypertension, dyslipidemia, diabetes. LDL 148. HGB A1C 6.6. Today, pt stated that she has been having left sided chest pain with and without exe	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	9
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
------------	----------	--	--	---

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	3
------------	----------	--	---	---

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	5

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has abnormal heart sounds	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; This is for the initial evaluation of a pericardial disease.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; It is unknown if there been a change in clinical status since the last echocardiogram.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are NOT clinical symptoms supporting a suspicion of structural heart disease.; This is a request for follow up of a known murmur.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	7

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	7
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; It is unknown what type of cardiac valve conditions apply to this patient.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual re-evaluation of artificial heart valves.; It has been at least 12 months since the last echocardiogram was performed.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 12 - 23 months or more since the last echocardiogram.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	8

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of artificial heart valves.	3
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	49
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	9

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	12
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.	6
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	26
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).	8
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; It is unknown if there is a change in the patient's cardiac symptoms.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	38
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient's cardiac symptoms.; It has NOT been at least 24 months since the last echocardiogram was performed.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	13
Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	New patient with chest pains last 3 days, mid precordial, continuous, worse food, at times radiated right arm, associated dyspnea..has recent hypertension. Abnormality on Echo...Possible mixoma...; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac device or completed NON diagnostic TTE.	1

Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is beibg requested for evalutaion of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.	3
Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested after a completed NON diagnostic transthoracic echocardiogram.	1
Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of suspected acute aortic pathology such as aneurysm or dissection.	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --+M-MODE COMPLETE REST&STRS	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;;	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --+M-MODE COMPLETE REST&STRS	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; none; It is not known if there has been any treatment or conservative therapy.; none	1

Cardiology	Approval	93350 ECHO TTHRC R-T 2D --+M-MODE COMPLETE REST&STRS	Patient has risk factors for CAD progression. Smoker, hypertension, and dyslipidemia.; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --+M-MODE COMPLETE REST&STRS	Patient with known CAD s/p PTCA/stent for follow up stress after PTCA; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --+M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	4
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --+M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.	2

Cardiology	Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	3
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	9
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	45
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; To evaluate the heart prior to non-cardiac surgery.; It is not known if the member has known or suspected coronary artery disease.	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D --M-MODE COMPLETE REST&STRS	trying to rule out CAD. The EKG came back poor R-wave progression; want to do eval.; This study is being ordered for Vascular Disease.; 10/24/2016; There has not been any treatment or conservative therapy.; chest pain, shortness of breath while lying flat also while w/ or w/o activity, palpitations, & hypertension	1

Cardiology	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Cardiology	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	patient symptomatic with vertigo and intermittent nausea and vomiting the last two days, unable to work. Similar episode about a month ago, lasting two days; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Vertigo; It is unknown why an MRI is not being considered	1
Cardiology	Disapproval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; END OF 2015/ BEGINING OF 2016; It is not known if there has been any treatment or conservative therapy.; NUMBNESS AND DISCOMFORT IN ARMS	1
Cardiology	Disapproval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	Essential (primary) hypertension: White coat Occlusion and stenosis of unspecified carotid artery Arteriosclerosis of native coronary artery w/o angina pectoris Other cardiomyopathies Peripheral vascular disease, unspecified: PAD; This study is being ordered for Vascular Disease.; 10/28/16; It is not known if there has been any treatment or conservative therapy.; Essential (primary) hypertension: White coat Occlusion and stenosis of unspecified carotid artery Arteriosclerosis of native coronary artery w/o angina pectoris Other cardiomyopathies Peripheral vascular disease, unspecified: PAD	1

Cardiology	Disapproval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	Occlusion and stenosis of unspecified carotid artery; Peripheral vascular disease, unspecified: PAD; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; Abnormal result of cardiovascular function study, unspecified: Abnormal M; This study is being ordered for a neurological disorder.; 08/26/2016; There has not been any treatment or conservative therapy.; Occlusion and stenosis of unspecified carotid artery; Peripheral vascular disease, unspecified: PAD; Arteriosclerosis of native arteries of extremity w/ intermittent claudication; Abnormal result of cardiovascular function study, unspecified: Abnormal M	1
Cardiology	Disapproval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Cardiology	Disapproval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;	1
Cardiology	Disapproval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;	1

Cardiology	Disapproval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Essential (primary) hypertension: White coat Occlusion and stenosis of unspecified carotid artery Arteriosclerosis of native coronary artery w/o angina pectoris Other cardiomyopathies Peripheral vascular disease, unspecified: PAD; This study is being ordered for Vascular Disease.; 10/28/16; It is not known if there has been any treatment or conservative therapy.; Essential (primary) hypertension: White coat Occlusion and stenosis of unspecified carotid artery Arteriosclerosis of native coronary artery w/o angina pectoris Other cardiomyopathies Peripheral vascular disease, unspecified: PAD	1
Cardiology	Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Cardiology	Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.;	1
Cardiology	Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the Neck.	2

Cardiology	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing fatigue or malaise.	1
Cardiology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; END OF 2015/ BEGINING OF 2016; It is not known if there has been any treatment or conservative therapy.; NUMBNESS AND DISCOMFORT IN ARMS	1
Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Known thoracic aortic aneurysm.; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	<p>Patient comes in today for a follow up of testing. 09/16/2016 Echo showed LVEF 60-65%, Mild mitral valve prolapse with trace MR, otherwise unremarkable. Stress test was normal as well. Holter monitor showed rare PVC's rare PAC's otherwise unremarkable. La; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.</p>	1
Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	<p>Type 2 Diabetes Mellitus complicated by diabetic retinopathy and peripheral neuropathy; This study is being ordered for Vascular Disease.; 01/01/2014; There has been treatment or conservative therapy.; Type 2 Diabetes Mellitus complicated by diabetic retinopathy and peripheral neuropathy; Full medical therapy with medication. Type 2 diabetes mellitus with diabetic nephropathy, with long-term current use of insulin</p>	1
Cardiology	Disapproval	71550 MRI CHEST	Radiology Services Denied Not Medically Necessary	<p>This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.</p>	1

Cardiology	Disapproval	71555 MRA, MRI ANGIOGRAPHY CHEST[NOT MYOCARDIUM] WITH/WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; shortness of breath. palpations. cyncope. family history of hypertropic cardial myopathy, and sudden cardiac death.	1
Cardiology	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	R/O UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/12/2016; There has been treatment or conservative therapy.; PAIN; STRETCHING EXCERSISE AND SHOE INSERTS	2
Cardiology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; It is not known if there is evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.	1

Cardiology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; patient c/o of intermittent right lower quadrant pain.	1
Cardiology	Disapproval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/27/2016; There has not been any treatment or conservative therapy.; chest pain shortness of breath	1
Cardiology	Disapproval	75557 Cardiac MRI Morph & structure w/o contrast	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; shortness of breath. palpations. syncope. family history of hypertropic cardiac myopathy, and sudden cardiac death.	1
Cardiology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	; This is a request for a CT scan for evaluation of coronary calcification.	1
Cardiology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	Patient is experiencing chest pain.; This is a request for a CT scan for evaluation of coronary calcification.	1
Cardiology	Disapproval	75572 CT Heart	Radiology Services Denied Not Medically Necessary	Is this a request for one of the following? Coronary Artery CT Angiography	1
Cardiology	Disapproval	75572 CT Heart	Radiology Services Denied Not Medically Necessary	This is a request for a Heart CT.	1

Cardiology	Disapproval	75573 CT Heart Congenital Study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; 03/21/2016; It is not known if there has been any treatment or conservative therapy.; Congestive heart failure  hypertension, fatigue, short of breath.	1
------------	-------------	---------------------------------	--	---	---

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
------------	-------------	---	--	---	---

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	pt has had a Bruce protocol stress test & came back abnormal.; This is a request for CTA Coronary Arteries.; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
------------	-------------	---	--	---	---

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; <Additional Clinical Information>; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; shortness of breath.; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; chest pain and sob	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.;	1

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; Patient has a history of MI with stent placement. Patient states that he feels just like he did prior to MI. Patient currently smokes and has a history of CAD in a first degree relative.; Patients complaint is chest pain and shortness of breath.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; patient still has chest discomfort twice a month, midsternal, for the past 2 years	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; Pt here for followup of chest pain. He has been having chest pain over the last three months. He describes a pressure on his chest occurring more at rest than with activity. The pain occurs over the left side with radiation up into his shoulder.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms)?;	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.;	1

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary Radiology Services Denied Not	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; obtain a coronary CT angiogram to try and identify that the left internal mammary artery is patent.	1
Cardiology	Disapproval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Medically Necessary Radiology Services Denied Not	Yes, this is a request for CT Angiography of the abdominal arteries.	8
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Medically Necessary		1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	#1 angina: She's been expressing some symptoms of chest discomfort over the past few months. The symptoms seem to be getting more frequent. It can occur at rest or with activity. She describes a fullness or tightness in the center of her chest. Sometimes ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/01/2016; There has not been any treatment or conservative therapy.; shortness of breath	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2006; There has not been any treatment or conservative therapy.; PVD, angina pectoris, obesity	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/27/2016; There has not been any treatment or conservative therapy.; chest pain shortness of breath	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
------------	-------------	---	---	--	---

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Chiropractic Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	no info given; This study is being ordered for a neurological disorder.; 9/22/2016; There has been treatment or conservative therapy.; neck and right shoulder pain shooting down to hand, hands are numb and tingling; Muscle stem and heat, spinal decompression, ultrasound, laser, rolling table	1
Chiropractic Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Suspect disc bulge at C5/6; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weak index finger/thumb adduction bilaterally; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Chiropractic Medicine	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 1/28/2016; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; pt over 5 months-	1
Chiropractic Medicine	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	3
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	none given; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	None.; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	none; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Severe low back pain, R/O disc problem; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown faxing in clinicals; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Chiropractic Medicine	Disapproval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	Radiology Services Denied Not Medically Necessary	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.	1
Chiropractic Medicine	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	no info given; This study is being ordered for a neurological disorder.; 9/22/2016; There has been treatment or conservative therapy.; neck and right shoulder pain shooting down to hand, hands are numb and tingling; Muscle stem and heat, spinal decompression, ultrasound, laser, rolling table	1

Chiropractic Medicine	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has not had recent plain films of the shoulder.; Soft tissue injury can not see on xray	1
Chiropractic Medicine	Disapproval	73700 CT LEG OR LOWER EXTREMITY	Radiology Services Denied Not Medically Necessary	R/O Fracture; This study is being ordered for trauma or injury.; 10/31/2016; There has been treatment or conservative therapy.; Radiating pain. Lower extremity weakness. Difficulty with daily living, walking and standing.; Physical Therapy 2/wk, 3wks.	1
Colon & Rectal Surgery	Approval	71250 CT CHEST, THORAX		This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	3
Colon & Rectal Surgery	Approval	72196 MRI PELVIS		This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	1
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST		post op evaluation , rectal seal repair ,; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	2
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; It is not known if the requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation; n/a	1
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases	1
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases	1
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	3

Colon & Rectal Surgery	Approval	74181 MRI ABDOMEN		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";	1
Colon & Rectal Surgery	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Colon & Rectal Surgery	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; TENDERNESS ON EXAM	1
Dermatology	Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Dermatology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST		This study is being ordered for a known or suspected tumor.; This is a request for a Sinus CT.	1
Dermatology	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		02.2 ML melalona on left forehead. Had removed. Was seen yesterday and was complaining of cough and shortness of breath; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

Dermatology	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.	1
Doctors and Rehabilitation	Approval	70547 Mr angiography neck w/o dye	The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.	1
Doctors and Rehabilitation	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	He is having some odd numbness in his upper extremities.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; It is not known if there are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
Doctors and Rehabilitation	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	1

Doctors and Rehabilitation	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
Doctors and Rehabilitation	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	1
Doctors and Rehabilitation	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Doctors and Rehabilitation	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	3

Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	10
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; radiating pain; injections, narcotic and inset treatment, past pt none recently	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.;	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 2015; There has been treatment or conservative therapy.; neck, back and right shoulder pain; pain medication, NSAIDs	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, physical therapy	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	2

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, muscle relaxers	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, pain patch, ibuprofen	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs, epidural injections, physical therapy	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs, physical therapy	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/2012; There has been treatment or conservative therapy.; numbness...weakness....headache....pain...spams.....; Physical therapy ...medication... injections.... surgery	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;;	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	PATIENT HAS POST POLIO SYNDROME; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/2016; There has been treatment or conservative therapy.; UPPER AND LOWER EXTREMITY WEAKNESS; DIFFICULTY HOLDING, GRIPPING, AND STANDING; PT, MEDICATION	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	3
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; Yes, there is evidence of recent development of unilateral muscle wasting.	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	19
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	4
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; Cervicalgia, Tenderness limited ROM degenerative change disc height loss arthropathy; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	3
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	13

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	6
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Mr. Neely presents for evaluation of progressive neck pain, headaches and low back pain after a slip and fall at the rehab facility where he is currently residing after a fall and pelvic fracture in August.; It is not known if the patient have new or changing neurological signs or symptoms.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; recent injury; No, the patient does not have new or changing neurological signs or symptoms.	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; radiating pain; injections, narcotic and inset treatment, past pt none recently	1

Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/9/2014; There has been treatment or conservative therapy.; radiating lower back and thoracic pain; injections, narcotic and insets pain treatment, chiropractic care	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; It is not known if there has been any treatment or conservative therapy.;	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; NSAIDs, muscle relaxer, ibuprofen	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs, epidural injections, physical therapy	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs, physical therapy	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	1

Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	3
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	2
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.	1

Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; -Pt here for follow up chronic Cervical pain that radiates down both of his upper extremities and lower back; pain as well that radiates down both of his legs. Relates has developed thoracic pain also. Relates he has just; started a new job, and now has n; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; radiating pain; injections, narcotic and inset treatment, past pt none recently	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/9/2014; There has been treatment or conservative therapy.; radiating lower back and thoracic pain; injections, narcotic and insets pain treatment, chiropractic care	1

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/10/2016; There has been treatment or conservative therapy.; The Pt has chronic pain in low back and right shoulder., Damage to rotator cuff; the Pt has had PT, medication therapy	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; It is not known if there has been any treatment or conservative therapy.;	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 2015; There has been treatment or conservative therapy.; neck, back and right shoulder pain; pain medication, NSAIDs	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; NSAIDs, muscle relaxer, ibuprofen	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, physical therapy	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	2

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, muscle relaxers	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, pain patch, ibuprofen	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs, epidural injections, physical therapy	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs, physical therapy	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/2012; There has been treatment or conservative therapy.; numbness...weakness....headache....pain...spams.....; Physical therapy ...medication... injections.... surgery	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;;	2

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	NONE GIVEN; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient had physical therapy and medication treatment for the past 3 weeks and he is having weakness, numbness, tingling in his lower extremities; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PATIENT HAS POST POLIO SYNDROME; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/2016; There has been treatment or conservative therapy.; UPPER AND LOWER EXTREMITY WEAKNESS; DIFFICULTY HOLDING, GRIPPING, AND STANDING; PT, MEDICATION	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	90

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	3
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	54
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Doctors and Rehabilitation	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	1
Doctors and Rehabilitation	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The study is being ordered for joint pain or suspicion of joint or bone infection.; The study is being ordered for bilateral hip avascular necrosis.	1
Doctors and Rehabilitation	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.	1

Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/10/2016; There has been treatment or conservative therapy.; The Pt has chronic pain in low back and right shoulder., Damage to rotator cuff; the Pt has had PT, medication therapy	1
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	1
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	1

Doctors and Rehabilitation	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/14/2016; There has been treatment or conservative therapy.; pain, legs giving away, popping,; < Describe treatment / conservative therapy here - or Type In Unknown If No Info Given >;	2
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury,; ; There has been treatment or conservative therapy,; ;	2

Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	2
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Limited range of motion	2
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1

Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).	1
Doctors and Rehabilitation	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1

Doctors and Rehabilitation	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1
-------------------------------	----------	--	---	---

Doctors and Rehabilitation	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
-------------------------------	----------	--	--	---

Doctors and Rehabilitation	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.	1
-------------------------------	----------	--	---	---

Doctors and Rehabilitation	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	4
Doctors and Rehabilitation	Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.	1
Doctors and Rehabilitation	Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication	1
Doctors and Rehabilitation	Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting lower extremity weakness.	1
Doctors and Rehabilitation	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication	1
Doctors and Rehabilitation	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	1

Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 years ago; There has been treatment or conservative therapy.; pain; physical therapy, injections, home exercise, nsaid	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; numbness; There has been treatment or conservative therapy.; numbness,weakness; home therapy and medications	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 10+ years; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, muscle relaxers	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 2009; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, muscle relaxer, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 2012; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 5 years; There has been treatment or conservative therapy.; neck and back pain; physical therapy, pain medication, NSAIDs	1

Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; ibuprofen	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; ibuprofen, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, chiropractor, epidural injections	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, muscle relaxer	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, pain medication	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxer, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs	1

Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, physical therapy	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, muscle relaxer, pain medication	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and right shoulder pain; RIT. facet joint injections	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	DIFFICULTY SLEEPING, WALKING STANDING, NECK PAIN; This study is being ordered for trauma or injury.; 8-25-16; There has been treatment or conservative therapy.; NUMBNESS, WEAKNESS, DECREASED RANGE OF MOTION, PAIN; MEDICATION, PHYSICAL THERAPY	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Midline bilateral paramidline lower cervical and bilateral posterior brachium The patient has been experiencing this pain for more that a year. He reports onset of pain sudden onset and when met with motor accident . The patient describes his pain as cons; This study is being ordered for trauma or injury.; Unknown; There has been treatment or conservative therapy.; neck pain, shoulder pain, back pain, joint pain, joint stiffness, joint swelling and posture abnormalities. Reports limitation of joint movement.; physical therapy. Patient prescribed gabapentin and Mobic.	1

Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	2
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1

Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; <Enter Additional Clinical Information>	1
Doctors and Rehabilitation	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; Yes, the patient is experiencing or presenting new symptoms of Bowel or bladder dysfunction.	1
Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";	1

Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; History of MVA 10/13 chronic pain at T8-9, she had some relief with Lyrica but not much	1
Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 years ago; There has been treatment or conservative therapy.; pain; physical therapy, injections, home exercise, nsaid	1
Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 2012; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs	1
Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; chiropractor, advil	1

Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	HISTORY OF SHOULDER DISLOCATION, SHOULDER PAIN, HUMURUS HIGH RIDING ARTHROSIS, DECREASED JOINT SPACE; THORACIC FACT ARTHROSIS, DISLOCATION TO T10-T12; R/O DISC HERNIATION; TEAR OF LEFT SHOULDER; This study is being ordered for trauma or injury.; 11/7/16; There has been treatment or conservative therapy.; EXTREME SHOULDER PAIN; PAIN MEDICATION, INFLAMMATORY MEDICATION, COMPRESSES TO SHOULDER	1
Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	1
Doctors and Rehabilitation	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	It is not known if there are documented findings of immune system suppression.; This is a request for a thoracic spine MRI.; It is not known if the patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; <Enter Additional Clinical Information>	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, physical therapy	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; physical therapy, muscle relaxer, pain medication	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	DIFFICULTY SLEEPING, WALKING STANDING, NECK PAIN; This study is being ordered for trauma or injury.; 8-25-16; There has been treatment or conservative therapy.; NUMBNESS, WEAKNESS, DECREASED RANGE OF MOTION, PAIN; MEDICATION, PHYSICAL THERAPY	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	None; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Unknown	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	None; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has weakness down both legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Patient rates the severity of his main complaint as 10 on a scale of 1 to 10. He Experiences the complaint 80 percent of the time. He Currently experiences low back pain. The complaint is mostly noticed in the AM and PM and it lasts for about 24/7. Reli; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/10/2012; There has been treatment or conservative therapy.; BACK PAIN, KNEE PAIN, THROBBING, CONSTANT PAIN; Professional caregivers seen in the past include Pain Medicine Physician, Family physician and Physical Therapist. The following tests have been done in the past: X-rays and MRI scan . He has tried antidepressant,anti-inflammatory meds, hydrocodone and m	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	4
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1
Doctors and Rehabilitation	Disapproval	72192 CT PELVIS WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Pt had trauma in the pelvis area; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
Doctors and Rehabilitation	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 2015; There has been treatment or conservative therapy.; neck, back and right shoulder pain; pain medication, NSAIDs	1
Doctors and Rehabilitation	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and right shoulder pain; RIT. facet joint injections	1
Doctors and Rehabilitation	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	HISTORY OF SHOULDER DISLOCATION, SHOULDER PAIN, HUMURUS HIGH RIDING ARTHROSIS, DECREASED JOINT SPACE  THORACIC FACT ARTHROSIS, DISLOCATION TO T10-T12 R/O DISC HERNIATION  TEAR OF LEFT SHOULDER; This study is being ordered for trauma or injury.; 11/7/16; There has been treatment or conservative therapy.; EXTREME SHOULDER PAIN; PAIN MEDICATION, INFLAMMATORY MEDICATION, COMPRESSES TO SHOULDER	1

Doctors and Rehabilitation	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.	1
Doctors and Rehabilitation	Disapproval	73700 CT LEG OR LOWER EXTREMITY	Radiology Services Denied Not Medically Necessary	EXTREME PAIN IN LEFT KNEE, HURT WHILE WALKING, PATIENT HAS HAD PT WITH NO RESOLUTION.; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.	1

Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	Patient rates the severity of his main complaint as 10 on a scale of 1 to 10. He Experiences the complaint 80 percent of the time. He Currently experiences low back pain. The complaint is mostly noticed in the AM and PM and it lasts for about 24/7. Reli; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/10/2012; There has been treatment or conservative therapy.; BACK PAIN, KNEE PAIN, THROBBING, CONSTANT PAIN; Professional caregivers seen in the past include Pain Medicine Physician, Family physician and Physical Therapist. The following tests have been done in the past: X-rays and MRI scan . He has tried antidepressant, anti-inflammatory meds, hydrocodone and m	1
Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1

Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Emergency Medicine	Approval	70450 CT BRAIN, HEAD		head trauma; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Emergency Medicine	Approval	70450 CT BRAIN, HEAD		Patient has been passing out consistently and family history of strokes; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; There is another reason why an MRI is not being considered; To rule out or confirm diagnosis	1
Emergency Medicine	Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

Emergency Medicine	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.	2
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	1
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).	1
Emergency Medicine	Approval	71250 CT CHEST, THORAX		1

Emergency Medicine	Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Emergency Medicine	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2
Emergency Medicine	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	2
Emergency Medicine	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	1
Emergency Medicine	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	ABNORMAL XRAY, SUSPECTED T12 FRACTURE, MID BACK PAIN AFTER FALL YESTERDAY; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.	1
Emergency Medicine	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	1
Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1

Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	4
Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Emergency Medicine	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pt has low back pain that radiates down both legs; It is not known if there has been any treatment or conservative therapy.; pt was seen in ER and had normal ct's	1
Emergency Medicine	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pt has low back pain that radiates down both legs; It is not known if there has been any treatment or conservative therapy.; pt was seen in ER and had normal ct's	1

Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PT did have a CTA - findings mild stenosis - calcification of the Achilles tendon. multi level lumbar generative change. PT did have physical therapy on 12/16/16 to increase gait skills and decrease pain. PT is a diabetic.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	5
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	3
Emergency Medicine	Approval	72192 CT PELVIS WITHOUT CONTRAST	none; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; The patient has had 3 or fewer pelvis CTs.; This study is not being ordered for initial staging.; The patient is not presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.	1

Emergency Medicine	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 9/26/16; There has been treatment or conservative therapy.; continue pain and difficulty walking; ice package heat and rest, progressive ambulation	1
Emergency Medicine	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1
Emergency Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; The pain is described as chronic; The member has not failed a 4 week course of conservative management in the past 3 months.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.	1
Emergency Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	1
Emergency Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.	1

Emergency Medicine	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1
Emergency Medicine	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.	1
Emergency Medicine	Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient states he has pain for 3 weeks; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	1

Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Limited range of motion	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1

Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."	1
Emergency Medicine	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 9/26/16; There has been treatment or conservative therapy.; continue pain and difficulty walking; ice package heat and rest, progressive ambulation	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Constipation for month and a half. Sharp achy tenderness, upper abdomin. Bloody diarrhea stools. Dark urine.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	hx of UTI's; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for bilirubin.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.	1

Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	N/A; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Reduced urine output, right sided suprapubic tenderness, right lower back pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Emergency Medicine Approval 74176 CT ABD & PELVIS W/O
CONTRAST

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; left lower quad tenderness, changing in bowel habits and pain worsen and not radiating left upper quad and clear urine and decrease appetite, sweat at night, pain while laying down,

1

Emergency Medicine Approval 74176 CT ABD & PELVIS W/O
CONTRAST

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

1

Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	2
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	9
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone	1

Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are physical findings or lab results indicating an intra-abdominal bleed.; Trauma	1
Emergency Medicine	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Emergency Medicine	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	1

Emergency Medicine	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	headache and unequal pupils; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Abnormalities of the eye; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	1
Emergency Medicine	Disapproval	70544 Mr angiography head w/o dye	Radiology Services Denied Not Medically Necessary	SPEECK PROBLEMS, PAIN FROM HEAD TO LEG; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9-11-16; There has been treatment or conservative therapy.; HEADACHES, LIGHT HEADED, DISORIENTED, NUMBNESS; MEDICATION	1
Emergency Medicine	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	SPEECK PROBLEMS, PAIN FROM HEAD TO LEG; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9-11-16; There has been treatment or conservative therapy.; HEADACHES, LIGHT HEADED, DISORIENTED, NUMBNESS; MEDICATION	1
Emergency Medicine	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	2
Emergency Medicine	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	Patient states he has neck pain; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1

Emergency Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Emergency Medicine	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; patient has had radiating back pain for one and a half months	1
Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1

Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	patient has low back pain and hip pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	see clinicals from recent ER visit; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Emergency Medicine	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Emergency Medicine	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a requests for a hip MRI.; The hip pain is not due to a recent injury, old injury, Chronic Hip Pain or a Mass.; The request is for hip pain.	1

Emergency Medicine	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	Patient is vomiting and abdominal pain, diarrhea and nausea; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CHEST PAIN, SHORTNESS OF BREATH, TINGLING IN THE LEFT ARM, EKG SHOWED NON SPECIFIC ST & T WAVE ABNORMALITY, MINIMAL VOLTAGE CRITERIA FOR LVH; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	HYPERTENSION, FATHER WITH MI, CHEST PAIN THAT RADIATES TO RIGHT AXELA; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	pt had chest pain that was relieved by nitro. Pt has H/O HTN and smoking.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	unknown; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Endocrinology	Approval	70450 CT BRAIN, HEAD	Cannot do MRI do to metal plate in skull.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
Endocrinology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	1
Endocrinology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.	1
Endocrinology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Neck Mass; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.	1
Endocrinology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.	2
Endocrinology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	3
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		1

Endocrinology Approval 70551 MRI HEAD, BRAIN, BRAINSTEM
WITHOUT CONTRAST

< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Gastroenterology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

Gastroenterology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.	1
Gastroenterology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	2
Gastroenterology	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	4
Gastroenterology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 11/2/2016; There has not been any treatment or conservative therapy.; Pain, temp, chills	1

Gastroenterology	Approval	71250 CT CHEST, THORAX	gastric cancer, mass in the abdomen, ruling out METS; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	IMMUNOSUPPRESSION DUE TO LIVER TRANSPLANT DONE IN 2013, ABNORMAL WEIGHT LOSS, POOR APPETITE; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/24/11; There has been treatment or conservative therapy.; ABNORMAL WEIGHT LOSS DIARRHEA; STATUS POST LIVER TRANSPLANT	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	Patient had a EGD w/BX that showed cancer. CT's are being ordered to check for metastatic disease.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Gastroenterology	Approval	71250 CT CHEST, THORAX	pt with dysphagia was found to have mass at the esophago/gastric junction during EGD that most likely represents a carcimona. Need CT of the chest and abd to evaluate metastasis or invasion; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	r/o infection; This study is being ordered for Inflammatory/ Infectious Disease.; 9/7/2016; There has been treatment or conservative therapy.; pain; testing	1
Gastroenterology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	1
Gastroenterology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.	1
Gastroenterology	Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.	1

Gastroenterology	Approval	72192 CT PELVIS WITHOUT CONTRAST	none; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.	1
Gastroenterology	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Gastroenterology	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Inflammatory/ Infectious Disease.; 8/11/2016; There has been treatment or conservative therapy.; abdominal pain and cramping, diarrhea; CT Scan.	1
Gastroenterology	Approval	72196 MRI PELVIS	Her abdominal pain can be explained by adhesion given her history of surgical procedures vs constipation secondary to pelvic floor muscle dyssynergia given her multiple abdominal and pelvic surgeries vs IBS. Will further investigate with anal manometry an; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1

Gastroenterology	Approval	72196 MRI PELVIS	She had a CT abdomen with contrast in Jan 2016 for RLQ pain which showed mild mucosal edema of distal small bowel.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; MR enterography given mucosal edema of small bowel seen in past CT scans; There has been treatment or conservative therapy.; Nausea and vomiting; Currently, she takes Linzess 290 mcg daily, Colace 1-2 tabs/day, Miralax 2-3 packs/day, drinks 3-4 lit fluid per day, eats fiber. She stopped using Bisacodyl which helped her abdominal cramps.; She underwent biofeedback by physical therapist which helped	1
Gastroenterology	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST		3
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	2
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	2 LESIONS ON LEFT LOBE OF LIVER CONSISTANT WITH HEMANGIOMA.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Follow up on cyst of liver, abnormal CT.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Follow up on kidney replacement and previous hepatic lesion.; This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	He is here to discuss possibly having a small bowel tumor in the family. He had a heart attack and his sister started talking to him and informed him of this tumor that runs in the family.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	<p>Pigtail Cath. and previous CT on 10/7/2016 and may need to be repositioned or removed. Abnormal CT; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis</p>	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	<p>PT has abdominal pain radiating while sitting or laying ..; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis</p>	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	<p>Pt has history of hep c /elevated protein; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study is ordered for something other than staging of a known tumor (not) prostate, known prostate CA with PSA> 10, abdominal mass, Retroperitoneal mass or new symptoms including hematuria with known CA or tumor.</p>	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt has pancreatic pseudo cyst, F/O to see if there has been any change.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	pt with dysphagia was found to have mass at the esophago/gastric junction during EGD that most likely represents a carcimona. Need CT of the chest and abd to evaluate metastasis or invasion; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.	3
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for initial staging of a known tumor other than prostate.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for new symptoms including hematuria, presenting with known cancer or tumor.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.	3
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	11
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Ulcerative Colitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Diverticulitis.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Crohn's disease.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	10
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.; The hematuria is newly diagnosed.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	upper gastric rebound tenderness; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	1
Gastroenterology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the abdomen.	3

Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; ct showed spots on liver and md wants to ensure they are benign	1
------------------	----------	-------------------	---	---

Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; elevated phosthapase 127, white blood count under 3000	1
Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; had elevated LFT's , patient might be rejecting transplant	1
Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Patient abnormal US and CT scan on 9/12/16 and 9/13/16. It was found that patient had a pancreatic cyst. This is a follow up.	1
Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Patient had a CT Scan and has Liver Lesion and they suggest MRI of Liver.	1

Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Patient had a Ct Scan which showed Liver Lesions and MRI is requested to further Review the Lesions	1
Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Pt is a 51 yo M with h/o UC and enteropathic arthritis presenting to the clinic for evaluation of the ileal stricture. He was diagnosed with UC over 15 years ago and his primary gastroenterologist is Dr. Ronald White. He reports that he achieved remission	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	It is not known if this patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; It is not known whether this patient has undergone an attempted but incomplete conventional colonoscopy.; It is not known if this patient has a known obstructing colorectal cancer.; The member had colon screening studies completed prior to this request.	1

Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	Patient had incomplete colonoscopy today due to excessive looping.; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	Scope advanced into sigmoid colon but very redundant and unable to easily advance further today therefore exam terminated. There were a few diverticula noted. Multiple cold forceps biopsies were performed for ulcerative colitis surveillance in the rectum.; It is not known if this patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74263 CT Colonography, screening	This is a request for CT Colonoscopy for screening purposes only.	3
Gastroenterology	Approval	75557 Cardiac MRI Morph & structure w/o contrast	This is a request for a heart or cardiac MRI	1
Gastroenterology	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Head/Neck Cancer.; The patient has Thyroid cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Gastroenterology	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.	1

Gastroenterology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.	1
Gastroenterology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	1
Gastroenterology	Approval	S8037 mrcp		1
Gastroenterology	Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will not be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; "The patient is not an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed."; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; The patient has acute pancreatitis.; The patient has not had an abdominal ultrasound.	1

Gastroenterology	Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/28/2016; There has not been any treatment or conservative therapy.; pain nausea vomitting	1
Gastroenterology	Approval	S8037 mrcp	; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	3
Gastroenterology	Approval	S8037 mrcp	Abdominal pain, Acute pancreatitis, von Willebrand disorder, has IBS-C, undergone prior egd/upper eus along with colonoscopy. 11/14 colon 3 DP. 1/15 EG/EUS - nl pancreas. Had been on amitiza 8 mcg po qd and vsl # 3, Went to ER about 3 weeks ago with sudde; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	abnormal lft's epigastric pain that radiates pain is palitated by the spine egb and gastric emptying can were both negative; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	dilatation; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

Gastroenterology	Approval	S8037 mrcp	Dilated bile duct shown on recent ultrasound.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dilated bile duct shown on recent ultrasound.; It is not known if there has been any treatment or conservative therapy.; Dilated bile duct shown on recent ultrasound.	1
Gastroenterology	Approval	S8037 mrcp	Epigastric pain; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	MRCP recommended after vascular angio runoff. MRCP rule out neoplasm of the pancreas; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Patient has had her gallbladder removed but she is still having the gallbladder disease type symptoms. Dr. Baber is ordering a MRCP to check for possible bile duct stones.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Patient with history of pancreatitis and had CT scan that recommended MRI.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Pt seen in the office for consult on 11/3/16 needs MRCP for f/u on dilated common bile duct seen on CT done a Baptist Health medical center. Pt also has epigastric pain and elevated Liver Function tests of AST 90, ALT 89, Total Bilirubin of 3.6 and Direc; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

Gastroenterology	Approval	S8037 mrcp		surveillance of a mass found a yr ago in the liver; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.	2
Gastroenterology	Approval	S8037 mrcp		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has undergone unsuccessful ERCP and requires further evaluation.	2
Gastroenterology	Approval	S8037 mrcp		This patient was hospitalized in early October for Left upper quadrant abdominal pain and was found to have acute pancreatitis. Dr. Nutt has ordered a MRCP to follow up on this and further evaluate to see if ERCP would be warranted.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp		unknown; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Gastroenterology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pain all over back and down both legs for past 3 weeks, times unable to walk or stand , long history of back pain, torn disc in 2007; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Gastroenterology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1

Gastroenterology	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	R/O pancreatic cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; It is unknown if this study is being ordered for staging of a known tumor (not) prostate, known prostate CA with PSA> 10, abdominal mass, retroperitoneal mass or new symptoms including hematuria with known CA or tumor.	1
Gastroenterology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Gastroenterology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Hep C affecting her liver; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Patient with RLQ abdominal pain. Had abnormal CT scan of GI Tract. Had colonoscopy performed on 9/7/16 that showed the colon was somewhat "fixed" inthe pelvis area. Requesting CT scan to look at the muscosa of the area of concern in the strictured termina; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Status post liver transplant patient with history of hepatocellular carcinoma. Imaging to for surveillence.; This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.	1
Gastroenterology	Disapproval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for CT Angiography of the Abdomen and Pelvis.	1

Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1

General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	UNKNOWN; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.	1
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; About 09/28/16; There has been treatment or conservative therapy.; Head symptoms; patient complaining of lump below her chin, between anterior angle of mandible, said it is tender to touch and movement.; Patient was referred to a General Surgeon for evaluation of lymph nodes.	1
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Unknown; This study is being ordered for trauma or injury.; 12/9/2016; There has been treatment or conservative therapy.; Unknown; Previous imaging	1
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; several years; There has been treatment or conservative therapy.; headaches, facial numbness and tingling, difficulty w/speech and neck pain; medications	1

General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	follow up to abnormal cta 5 yrs ago ,; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2011; There has not been any treatment or conservative therapy.; don't know	1
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	MR angiogram head without contrast showed a possible anterior communicating artery aneurysm versus left paraclinoid artery aneurysm. Differential diagnosis would include a hemorrhage in pituitary adenoma. Correlation with brain MRI using sella protocol a; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the brain.	8
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; several years; There has been treatment or conservative therapy.; headaches, facial numbness and tingling, difficulty w/speech and neck pain; medications	1
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the Neck.	10
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metatstasis	2

General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue	3
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; one week from monday; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; Brain MRI performed results normal.	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	neuropathy of upper extremities bilaterally since Feb 2016, no relief with NSAIDs and other measures, cervical xray yesterday showed multilevel DDD involving C5-C6 and C6-C7; "This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	Patient has family his of vascular tumor with mother and maternal uncle.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/31/2016; There has been treatment or conservative therapy.; Headaches, neck mass, and neck pain.; Chiropractic care, massage therapy, and exercises.	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	swollen neck; "This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation	1

General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	There is a suspicion of an infection or abscess.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.	2
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	This is a request for a sinus MRI.; This study is not being ordered in conjunction with a head or brain CT or MRI.; "There is not evidence of tumor from a physical exam, plain sinus film, or previous CT or MRI study."; This patient has been treated with medications for at least four weeks with no improvement.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	< Enter answer here - or Type In Unknown If No Info Given. >; There is NOT a family history of a brain aneurysm in the parent, brother, sister or child of the patient.; This is a request for a Brain and Neck MRA combination.; There has NOT been a recent (less than 2 week) neck or carotid artery ultrasound.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/24/2016; There has not been any treatment or conservative therapy.; dizziness, near sinkable episode, visual disturbance, numbness and tingling	1

General/Family Practice	Approval	70544 Mr angiography head w/o dye	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/19/2016; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	headaches last 10 min after lifting weights; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6 Months; There has been treatment or conservative therapy.; Headaches, blurred vision.; Medication	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	Previous stroke 1/16. Admitted to hospital with another possible stroke this past weekend; This study is being ordered for Vascular Disease.; 1/2016; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

General/Family Practice	Approval	70544 Mr angiography head w/o dye	Pt has been having severe headaches for 3 weeks along with Vertigo, gait instability, nausea, the headaches are waking him up while he is sleeping.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 weeks ago; It is not known if there has been any treatment or conservative therapy.; Severe headache with Vertigo, gait instability, nausea, the headaches are waking pt up from his sleep.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is an immediate family history of aneurysm.; This is a request for a Brain MRA.	4
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Brain MRA.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	2
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	4

General/Family Practice	Approval	70544 Mr angiography head w/o dye	This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	unknown; This study is being ordered for trauma or injury.; 11/26/16; There has not been any treatment or conservative therapy.; Pt has headaches, dizziness, numbness on the left side of the face, right side body weakness	1
General/Family Practice	Approval	70547 Mr angiography neck w/o dye	< Enter answer here - or Type In Unknown If No Info Given. >; There is NOT a family history of a brain aneurysm in the parent, brother, sister or child of the patient.; This is a request for a Brain and Neck MRA combination.; There has NOT been a recent (less than 2 week) neck or carotid artery ultrasound.	1
General/Family Practice	Approval	70547 Mr angiography neck w/o dye	Previous stroke 1/16. Admitted to hospital with another possible stroke this past weekend; This study is being ordered for Vascular Disease.; 1/2016; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
General/Family Practice	Approval	70547 Mr angiography neck w/o dye	The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.	1

General/Family Practice	Approval	70547 Mr angiography neck w/o dye	This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."	1

Ct of head was unremarkable; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Positive for ataxia and memory loss.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	possible pituitary microedema, focus sella turcica; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM
WITHOUT CONTRAST

Possible seizures; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

1

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM
WITHOUT CONTRAST

Post meningioma resection; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pounding and throbbing; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if the headache is described as a "thunderclap" or the worst headache of the patient's life.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Previous stroke 1/16. Admitted to hospital with another possible stroke this past weekend; This study is being ordered for Vascular Disease.; 1/2016; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PROGRESSIVELY WORSENING OF HEADACHE.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt complains of dizziness and memory loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt fell and hit there head.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PT FELL OFF HOUSE 9 YEARS AGO AND PT NOW HAS DAILY HEADACHES THAT ARE WORSENING; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	<p>PT HAD A CT 2008 WHICH SHOWED A DERMOID CYST OF THE BRAIN. HAVING SOME NUMBNESS IN HER RIGHT HAND WITH BURNING ASSOCIATED WITH SOME WEAKNESS. NEEDS MRI TO R/O ANY EXPANDING CYSTS. THE BURNING IN HER HAND HAS BEEN INTENSE; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.</p>	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	<p>Pt had an abnormal CT; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.</p>	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has a pineal cyst that needs to have re-evaluation; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has been having severe headaches at the top of his scalp 3 or 4 times per week for around 6 months. He has tried OTC tylenol and ibuprofen with no results.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has been having severe headaches for 3 weeks along with Vertigo, gait instability, nausea, the headaches are waking him up while he is sleeping.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 weeks ago; It is not known if there has been any treatment or conservative therapy.; Severe headache with Vertigo, gait instability, nausea, the headaches are waking pt up from his sleep.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has had memory loss over the last year. It was worsened in the last 3-4 months. She has forgotten things that she does daily such as playing an instrument.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt having memory loss, nausea; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt having severe headaches on the Rt temple; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; It is unknown if the patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PT IS HAVING HYPESTHESIA AND HYPOESTHESIA SYMPTOMS.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; It is not known if there are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt is having left sided facial numbness,begins in neck 1 week ago, pain sharp and burning, radiates to the head. numbness to left anterior chest left jaw, neck and ear. Numbness is present. She has multiple stroke factors.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt presenting with new headaches/ headaches are daily with no vision changes but is worse with certain positions; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PT SEEN PHYCHIRATRIST; This study is being ordered for trauma or injury.; 8/20/2016; There has been treatment or conservative therapy.; CHEST PAIN, DAILY HEADACHE, FATIGUE, POOR CONCENTRATION, DECREASED LEVEL OF CONSCIOUSNESS; HEAD CT-NEG, MEDICATIONS WITH NO RELIEF.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt. is having blurred vision, headaches. Pt. has shooting pain down her back.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt. reports memory difficulties. pt. continues to have headaches.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	r/o chairi malformation needs mri to confirm, pt has no symptoms; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	R/O shingles; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	R/O TIA or stroke, patient has confusion; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Right leg numbness, she has 20 min "episodes", right facial drop, hasn't seen any dr in over 10 yrs, but has a seizure history.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The results of the previous brain MRI are unknown.	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Server Fatigue; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	She is having flares of symptoms-with increasing numbness-drooping of lower lip, unable to open eye and pain-s/s seem to be worse when she does not sleep-She is able to close her eye but is bothered by light during hr of sleep-she continues to use lubrica; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Still having odd headaches. She had none in September, but they have resumed this month. They are usually sharp pains, fleeting, different parts of her head; occasionally a dull generalized headache will last a few hours. No aura, photophobia, nausea.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Sudden memory loss, short term; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.	3

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	5
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	43
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	173
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.	13

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	89
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).	4
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	17
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	24

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.	7
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	5
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	6

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	11

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does have a Brain CT showing abscess, brain infection, meningitis or encephalitis.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	11
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.	2

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	23
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	43
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	4
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	3
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	16
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	2

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Cough, un-resolving pneumonia, former long time smoker. screening for lung cancer.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	CT in 2014 showed mass, f/u; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	ct scan done 4/2016 and it was recommended she get a f/u for lung nodules.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Density in lung base; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Diagnoses: Chronic obstructive pulmonary disease. Cancer R lung; past medical/surgical history; Surgical; ** Lung surgery; ** Lung lobectomy; ** Partial lung lobectomy; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	F/U lung nodule Abn CT; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	F/U lung nodules; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	follow up Chest CT, mass increasing in size; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Follow up exam from 8/19/16, hx of Left Empyema and mild aortic dilation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	follow up on a chest ct hat was abnormal; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Follow-up to CT completed last year which showed nodules; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	FOUND PERICARDIAL CYST ON CT CORONARY CALCIUM SCORE ON 9/13/16. RADIOLOGIST RECOMMENDED A FOLLOW UP IN 3-6 MONTHS.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Had a chest ct that showed increased soft tissue density in the superior mediastinal and another chest ct is being requested; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Has Unexplained weight loss. Increase Shortness of breath. Intractable diarrhea for months; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	he is needing it for on going chest pain and the the mass that was found on his lung.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pt has a lung mass and on going chest pain; There has not been any treatment or conservative therapy.; he primary symptoms are chest pain and neck pain.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	inflammation in chest right lower area// 2cm nodule left lower area; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
-------------------------	----------	------------------------	--	---

General/Family Practice	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; patient has copd, chest pain, cough, SOB, bronchitis; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
-------------------------	----------	------------------------	--	---

General/Family Practice	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Right pleural effusion, Right pleuritic chest pain pot antibiotics, history of smoking; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Lab work and X ray reveal further study required; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	labs showing elevation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/02/2016; There has not been any treatment or conservative therapy.; Mediastinal seen on chest x-ray elevated CRP, sedrate, whiteblood cells	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Lung Nodules; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Mr. Spencer presents with a diagnosis of lung nodule. Prior work-up has included a CT scan (chest CT (results: bilateral pulmonary nodules which are probably benign but a six month followup noncontrast chest CT is recommended)). DUE IN NOVEMBER 2016 f; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	MRI had a left adrenal cyst on previous MRI. Needs CT in follow up. MRI showed a mediastinal cyst also. CT is also recommended.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/01/2016; There has been treatment or conservative therapy.; Joint pain, extreme tiredness, and weight gain; Rheumatology and previous MRI that showed the left adrenal mass	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Multiple nodules of lung;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	N/A; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2

General/Family Practice	Approval	71250 CT CHEST, THORAX	n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Abdominal pain a few weeks ago, Coughing last week.; There has been treatment or conservative therapy.; Coughing up blood, decreased breathe sounds in right and left lower field, abdomen is distended(swollen), tenderness in the right and left upper quadrant.; Surgery, medications, gastritis, and endoscopy.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Nodule is noted in left upper lobe, one in the left lung, not seen on lateral view.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	none; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	none; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/04/2016; There has been treatment or conservative therapy.; R/O mass swelling; Lab work ultrasound	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PAIENT HAS KNOWN PULMONARY MASS AND WAS TOLD TO FOLLOW UP IN 6 MONTHS TO SEE IF IT HAS CHANGED; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient had a CT chest to evaluate 6 mm RUL lung nodule. This patient has a CT chest in August 2016 that showed the nodule. This would be the follow up Chest CT.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient had Chest 2 View done on 08/22/16 and a small lung nodule seen at the lung base on CT is too small to visualize with plain films and followup with non contrast Chest CT would be most helpful.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	patient had previous CT which showed nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PATIENT HAD XRAY THAT SHOWED A DEFORMITY OF THE STERNUM PATIENT HAS BEEN HAVING PALPITATIONS NEED TO RULE OUT IF THIS IS THE CAUSE; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient has a 4 month history of intractable back, abdominal and rib pain. she has a history of hodgkins lymphoma.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has a lung mass - checking for metastasis to brain due to patient is having disequilibrium -; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has abnormal bone scan that showed possible metastasis.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has colon cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient has concern about on going cough, is a current smoker. Medication has not helped the cough.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient has had mri and xrays, provider ordered ct for further evaluation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient I having swelling of the supraclavicular region over the last year. CXR shows borderline cardiomegaly and mediastinal enlargement. Fullness in the supraclavicular regions bilaterally, left greater than the right. Patient has a history of renal cel; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient is a smoker.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PATIENT PRESENTST TO CLINIC FOR FOLLOW UP ON LUL NODULE. PATIENT WAS SEEN IN JULY AND HAD A CHEST X-RAY THAT SHOWED A NODULE AND HAD A CT CHEST. THE REPORT FROM THE CT RECOMMENDED FOLLOW UP IN 6 MONTHS.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient previously had an mri and xrays. provider ordered ct for further evaluation.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient was found to have a lung nodule on his last CT scan, he is needing a 6 month follow up scan.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient was recently diagnosed with bronchitis. He is having issues with dysnea and normal PFT's.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	patient was to have a repeat ct due to a abnormality on ct in sept 2016 per radiologist; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient with chronic cough and dyspnea.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient with continuing cough requiring CT chest as recommended by chest x-ray.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Persistent pulmonary contusion with posttraumatic pneumatoceles in the right lower chest.; There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Pleural effusion; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pneumonia that wont go away; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; It is unknown if the patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pneumonia; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	post thoracotomy pain, possible malunion after surgery; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Previous abd ct showed nodule, needing recommended f/u exam; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Prior CT Neck was ABN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt had a chest xray and abdominal CT. These tests found the pt to have fluid on his left lung; he is needing a chest CT to further access.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt had aortic aneurysm in 2000, this is a f/u; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt had CT abdomen and pelvis noted a 7mm nodule that needs follow-up, non smoker HX of renal cell carcinoma, left status post nephrectomy; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PT HAD CT CHEST ON 6/7/16 THAT SHOWED MULTIPLE NONCALCIFIED NODULES IN BOTH LUNGS. RADIOLOGIST RECOMMENDED FOLLOW UP IN SIX MONTHS.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PT HAD CT CORONARY CALCIUM SCORE ON 1/6/16 THAT SHOWED A LUNG NODULE.DID CT CHEST ON 4/19/16 AND IT SHOWED 7MM LUNG NODULE. RADIOLOGIST RECOMMENDED RE-CHECK AFTER 6 MONTHS.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	pt had CT in 01/2016 rad rec 6 month follow up; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has an enlarged left axillary lymph node.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has asthma; j45.909; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has had cough x 1 year, he came in for Chest Xray and it show scattered densities; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has known large ascending aortic aneurysm measuring 4.6 cm x 4.5 cm that requires monitoring for changes/worsening; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has known pulmonary nodule. This is her 6 month follow up for evaluation of stability; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has non-Hodgkins lymphoma, stage 1; now having abnormal weight loss; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has reported cough, chronic and unresolving for several months. She has been treated medically and has had normal chest xrays twice in the last year. This pt has a personal history of malignant breast cancer and requires further evaluation to rule ou; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pt having chest pain and shortness of breath since 8-30-2016. echo showed normal.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt is having chest discomfort, and increased dyspnea on exertion. She had abnormal CT Chest in 3-2016. needing to repeat that CT to see if any changes.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	pt needs ct for cystic fibrosis and exerbation of bronchitis; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PT SEEN PHYCHIRATRIST; This study is being ordered for trauma or injury.; 8/20/2016; There has been treatment or conservative therapy.; CHEST PAIN, DAILY HEADACHE, FATIGUE, POOR CONCENTRATION, DECREASED LEVEL OF CONSCIOUSNESS; HEAD CT-NEG, MEDICATIONS WITH NO RELIEF.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt with recent weight loss, chronic cough and shortness of breath; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	PULMONARY FIBROSIS AND COPD HISTORY. PATIENT HAS INCREASE SHORTNESS OF BREATH; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; It is unknown if there is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Px is a tobacco user-Z72.0.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; It is unknown if the patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Radiologist recommended a 6 month follow up CT of Chest for a pulmonary nodule.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	REFERENCE:  8/10/2016  FINDINGS: Frontal and lateral radiographs of the chest were obtained. Cardiac silhouette is stable in size. Left lower lobe calcified granuloma is noted. There is improved aeration of both the right and left lungs, with possi; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	repeat CT Scan of lung due to 7mm nodule in right lower lung; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Right supraclavicular lymphadenopathy. Unknown renal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	right upper lobe nodule. acute bronchitis. right rib tenderness. fall injury 11/8/16 , right sided pain.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Sarcoma. Work up for cancer diagnosis; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	see scanned info; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/10/2016; There has been treatment or conservative therapy.; Headache with jaw pain (non dental); Chest Pain with negative cardiac cath; Chest Pain- Nitroglycerin, cardiac cath r/o cardiac nature; Headaches - OTC medications	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Shortness of breath, cough, failed antibiotic treatment x 3 weeks.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Significate coughing with yellow to brown sputum occasionally with blood. Cavitory Lung Disease and Lung Nodules, Rt Thoracoscopy, minithoracotomy, adhesiolysis Biopsy RUL and RLL; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Stable pulmonary nodule, routine follow up to make sure that it doesn't enlarge or turn; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Surgery is scheduled within the next 30 days.; A Chest/Thorax CT is being ordered.; The patient is having an operation on the chest or lungs.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	TESTS ORDERED ON BEHALF OF SPECIALIST DUE TO RECENT ABDNORMAL LABS; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The doctor ordered a ct of chest/thorax without dye; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The last chest CT was performed more than 6 months ago.; There is no radiologic evidence of non-resolving pneumonia.; The patient is NOT presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.	6

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; It is not known if there is physical or radiologic evidence of a chest wall abnormality.; x-ray showed closed rib fracture, Pain,; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
-------------------------	----------	------------------------	--	---

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; Patient had a child land on his chest about a month ago. he felt it pop and has pain ever since. X-ray is not showing any abnormality but due to continued pain would like to get CT to evaluate chest.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
-------------------------	----------	------------------------	--	---

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; Procedure: Chest radiograph Indication: Sternal/Rib pain, history of motor vehicle accident, pain in middle of chest Comparison: None Findings: Single frontal view of the chest was performed on one cassette. The cardiac silhouette is normal. Lungs are; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
-------------------------	----------	------------------------	--	---

General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; PT HAD RECENT TRAUMA TO RIBS, CXR DONE AND RADIOLOGIST NOTED THAT QUESTIONABLE NODULE VERSUS OSTEOPHYTE IN R UPPER LOBE SEEN BEST ON LAT VIEW RECOMMEND CT CHEST; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.</p>	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; The patient is presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	2
General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; The patient is presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; < Enter answer here - or Type In Unknown If No Info Given. >; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

2

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; atelectasis; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; COPD and shortness of breath symptoms , history of tobacco abuse , possible cancer; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Linear densities and small non calcified lung nodule in left lung base; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; patient is a known smoker who presents with productive cough and fever. xray performed shows pleural effusion requiring further evaluation with CT.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pneumonia of right upper lobe due to infectious organism; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt has been having symptoms of chest pain with numbness that radiates to the left arm to the left neck which stated 5 days ago with pain worse with deep breathing. Pt has a history of prior chest discomfort similar to the symptoms stated above. Cardiac ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of mediastinal widening.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	17
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	2
General/Family Practice	Approval	71250 CT CHEST, THORAX	This is a follow up due to 2 masses found on previous CT of Chest 6 months ago. Patient has history of pulmonary nodules.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	This is a follow-up to a previous Chest CT that showed a pulmonary nodule.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	This is follow up to document stability of known right lower lobe nodules, last Chest xray 4/2016; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	this is for 3 month follow up as recommended by radiologist due to abnormal findings on last CT chest; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	This patient has a history of thyroid and colon cancer.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Ultra sound indicates needs further eval for liver mass and reoccurring Pulmonary embolism with symptoms of shortness of breath; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	unknown; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	4

General/Family Practice	Approval	71250 CT CHEST, THORAX	UNKNOWN; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	UPLOADED; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	X ray was taken on 05/17/2016 and found nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Evaluate bronchitis; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Suspected mass or nodule; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	45

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; It is not known if there is evidence of tumor or metastasis on bone scan or x-ray.; Suspected Tumor with or without Metastasis;<Enter Additional Clinical Information>	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; It is not known if there is evidence of tumor or metastasis on bone scan or x-ray.; Suspected Tumor with or without Metastasis; numbness in left arm and leg, head pressure, decreased mobility on right side	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	87
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; Yes, the patient is demonstrating unilateral muscle wasting.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>This is a request for cervical spine MRI; None of the above; Patient has recently been having new and recurring headaches. She has CT Head and MRI Head which showed chiari malformation with MRI Cervical Spine for further evaluation.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.</p>	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>This is a request for cervical spine MRI; None of the above; Patient presented with a Chiari I malformation, also syrinx noted on brain MRI that needs to be evaluated with cervical MRI; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.</p>	1
-------------------------	----------	--	--	---

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.</p>	4
-------------------------	----------	--	--	---

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.	5
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	5
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	46
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	15
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; <Enter Additional Clinical Information>	2

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	3
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; N/A	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; PATIENT IS HAVING SEVERE NECK PAIN	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Pt has been having PT for 4 weeks with no improvement, Pt is having numbness	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Pt. had an abnormal nerve conduction study. Nerve conduction study revealed isolated ulnar N compromise@ wrist or left elbow. Brachial plexus arcon loss procession	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.;	2
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; <Enter Additional Clinical Information>	2
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; FURTHER EVALUATION,POSSIBLE NECK FRACTURE  Duration of Symptoms: Start: 10/01/2016   Physical Exam Findings: unable to move neck and head is tilted-severe DDD  Preliminary Procedures X-rays  Already Completed: Procedure Date: 12/16/2016;	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis	3
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There is no evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis; Patient has brisk reflexes on exam, decline in fine motor skills. Wanting to rule out compressive lesion.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; Patient has had a long history of chronic back pain with a previous history of a hemangioma the thoracic spine. She's had some odd paresthesias and strange sensations for which we originally ordered an MRI of her brain cervix thoracic and lumbar spine to ; No, there are no documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; No, there is not a laboratory or x-ray evidence of an infected disc, septic arthritis or "discitis".; No, there is no laboratory or x-ray evidence of a paraspinal abscess.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.; yes, there is a documented evidence of extremity weakness on physical examination.	3

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; <Enter Additional Clinical Information>; It is not known if the patient have new or changing neurological signs or symptoms.	1
-------------------------	----------	---	---	---

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Patient comes in today approximately one-month post motor vehicle accident. She still having neck and upper back pain. Having headaches a started posterior occipital area radiating anteriorly. This pain seems to be getting worse. It's a New with flushing ; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
-------------------------	----------	---	--	---

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Patient pertinent for blastomycosis &#xOD; Patient to be evaluated for head trauma, NOS. The location of discomfort is posterior. The pain is characterized as moderate in intensity and constant. The precipitating event seems to have been a fall. ER visit y; No, the patient does not have new or changing neurological signs or symptoms.	1
-------------------------	----------	---	--	---

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; unknown; No, the patient does not have new or changing neurological signs or symptoms.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	11
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	To evaluate chronic headaches not improving. Chronic neck pain and tremors are not improving as well.; This study is being ordered for Inflammatory/ Infectious Disease.; 1/6/2016; There has been treatment or conservative therapy.; Headache, neck pain, low back pain, and sacroiliitis.; Medication for 1 year	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient has upper extremity weakness and pain radiates down causing numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; unknown; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Unknown; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Extremity weakness, paresthesia; Physical therapy, medication treatment	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; low back pain stiffness sciatica; otc nsaid- prescription nsaid physical therapy	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	URGE INCONTINENCE, PARESTHESIAS, SUSPECT NEUROLOGICAL LESION.PATIENT HAS NEW ONSET STUMBLING.; This study is being ordered for a neurological disorder.; 09/19/2016; There has not been any treatment or conservative therapy.; URINARY INCONTINENCE; DYSESTHESIAS; PARESTHESIAS; RADICULOPATHY OF RIGHT ARM AND BOTH LEGS; NOTED WEAKNESS OF BILATERAL HIP FLEXERS, BILATERAL KNEE FLEXERS, AND DORSI FLEX ANKLES	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	xray shows degenerative disc disease , anti-inflammatories, muscle relaxants not resolving pain; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST		3
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Abnormal findings on diagnostic imaging of other parts of musculoskeletal system	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Compression fracture	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; pain radiating to Pt rib cage	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; T7 compression fracture deformity	1

-------------------------	----------	--	--	---

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Patient already had a MRI no contrast 10/7/16. Showed bilateral iliac lesions. Pre and Post G Gad is needed.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Patient is a surgical candidate. She has failed home Physical Therapy, ESIs, neurotomy, and oral medication treatment.; This study is being ordered for a neurological disorder.; 09/2008.; There has been treatment or conservative therapy.; Numbness and tingling of both legs and buttocks. Burning sensation in both legs and feet. Right mid back pain, on the left, worsens with bending. Lower back pain radiates to the legs. Back pain is chronic duration. Thoracic and lumbar spine exhibited mode; Completed prescribed home exercises for the last 3 months-with no improvement, epidural steroid injections-with no improvement, neurotomy-with no improvement, and prescribed oral medications-with minimal benefit.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Positive Lhermitte's sign.; This study is being ordered for a neurological disorder.; about a year ago; There has been treatment or conservative therapy.; buttock pain, back pain, lower extremity pain, numbness, parasthesias.; physical therapy and chiropractic manipulation	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	see attached notes; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	See Primary Symptoms.; This study is being ordered for trauma or injury.; 11/18/2016; There has been treatment or conservative therapy.; Patient is having back/neck pain. Had an accident on 11/18/2016. She was diagnosed with a Compression Fx of T10. Had an abnormal contrast of the thoracic spine on 11/21/2016. Shows Approximately 20 degrees levoscoliosis of the thoracic spine from T3 thru; Patient takes Gabapentin and has tried cyclobenzapr. NSAIDS	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; "The patient is not being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.; The patient is experiencing or presenting symptoms of abnormal gait.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	3

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; fax; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; MVA with compression fx 15yrs ago. Patient did pain management and physical therapy at time of injury with benefit. patient states pain has started again and is not relieved by medications.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; radiates to the right upper extremity and right lower extremity, a plain xray that was done on 9/26/16 did show that Pt has leftward sciatic curve and degenerative changes, pain selection is extension is painful; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	4
-------------------------	----------	--	---	---

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	2
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	6

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	5
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; <Enter Additional Clinical Information>	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.;	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; Xray in office to show Wedge compression Fx of Twelfth Thoracic Vertebra	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	26
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to pre-operative evaluation.;	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The caller indicated that there is not x-ray or laboratory evidence of: Osteomyelitis, Meningitis, Septic Arthritis or discitis, or a paraspinal abscess."; The study is being ordered due to known or suspected infection or abscess.; Upper back pain noted. Her symptoms are unchanged since last visit. The discomfort is most prominent in the upper thoracic spine. This radiates to the Radiates in center of back. She characterizes it as intermittent, moderate in intensity, sharp, and	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; This is not a continuation or recurrence of symptoms related to a previous surgery or fracture.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; Patient was involved in a motor vehicle accident. X-Rays in office is abnormal showing Possibly acute mild anterior-superior compression fracture of T10. Radiologist suggest an MRI.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; It is not known if there is evidence or tumor or metastasis on bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.;	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.	2

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is no evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; Crepitus, Tenderness, Effusion: mass noted in the lower right thoracic area just lateral to thoracic spine	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Thoracic spine: severe spasms and pain to thoracic spine and especially on right side and extending to right flank has extreme tenderness, some dec sensation along his back there, not able to twist at all; Has severe mid to low back pain so will send; This is a request for a thoracic spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; year and a half; There has been treatment or conservative therapy.; pain and numbness going down left leg; PT	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; may or june 2016; There has been treatment or conservative therapy.; severe pain hasn't gotten better, limping, hip pain radiating to neck. No hobbies. Hx of kidney and renal problems. Bolts nuts and screws in left ankle.; pain meds and ice	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Unknown; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; Extremity weakness, paresthesia; Physical therapy, medication treatment	1

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	abdominal pain, diarrhea vomiting, foul smelling urine.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.	1
-------------------------	----------	----------------------------------	--	---

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Acute abd pain low left abd; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.	1
-------------------------	----------	----------------------------------	---	---

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	having some pelvic pains again and was told needed a repeat CT scan for enlarged nodes in pelvis a few months ago, will get repeat scan.   getting pelvic pain back and insurance would not approve his repeat CT to check his lymphadenopathy out again he o; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	hernia confirmed; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	iliac vein compression syndrome; This study is being ordered due to known or suspected vascular disease.; It is not known if the ordering physician is a surgeon or PCP who is ordering on behalf of a surgeon who has seen the patient.; There is plain film, ultrasound or Doppler evidence of a vascular abnormality.; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	MRI shows mass in pelvic area; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	none; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
-------------------------	----------	----------------------------------	--	---

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	On palpation against the prostate, this is quite tender and uncomfortable, possible abcess, patient has a fever; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.	1
-------------------------	----------	----------------------------------	--	---

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	PALPABLE MASS IN LEFT GROIN, UNILATERAL INGUINAL HERNIA; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
-------------------------	----------	----------------------------------	---	---

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient has been having right hip pain, right side lumbago pain, and rectal discomfort. Patient has been having some abdominal pain and feels like there is something "there" when he goes to have a bowel movement.; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
-------------------------	----------	----------------------------------	---	---

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient has colon cancer.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient has had CT of abdomen that showed excessive fluid that looks to be extending into pelvis. Radiologist recommends view of pelvis to better diagnose patient symptoms.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Patient presents with 2 x 3 cm firm, intramuscular mass, superolateral aspect on right glute. Skin is discolored, brownish in that area. It has been present for several months. No known injury.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	<p>Patient with leukocytosis, coccyx pain and abnormal coccyx x-ray. CT to rule out infectious cyst or disease process.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "There are no physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.</p>	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	<p>persistent groin pain ,possible hernia. urinary freq and nocturia; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.</p>	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	<p>pt came in for pain around femur area, xray shows mass or cystic lesion on the sacrum, need CT for further evaluation; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.</p>	1

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Pt has had pelvic pressure and pain for 2wks with a mass developing in left groin area that is painful. Left leg with 1+ pitting edema; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Pt is in severe pain in her pelvic area from a fall; This study is being ordered due to organ enlargement.; There is no ultrasound or plain film evidence of a pelvic organ enlargement.; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	pt. has mass right lower back and complains of pain that radiates down right leg and pain.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Right groin pain and mass, and hx of inguinal hernia repair.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	The patient has had a Pelvic US complete with abnormal results stating an enlarged uterus and possible uterine fibroid.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	The symptoms are reported as being moderate. The symptoms occur daily. The location is left hip. While receiving PT for lower back pain. Physical therapist notice "his left hip was popping out of place". PT gave patient an exercise to pop hip back into ; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	This patient is needing additional imaging because the X-Rays were unremarkable. Also, so we can form a more successful treatment plan for this patient, other than medication and at home treatment. Patient very well may be needing to be referred to an o; This study is being ordered for trauma or injury.; 11-30-16; There has been treatment or conservative therapy.; Lower back pain, Leg pain, numbness in leg, pelvic pain.; At Home Exercise, Pain medication.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	unknown; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.	1

General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	unknown; This study is being ordered due to known or suspected infection.; It is not known if the ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient.; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "There are no physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	Urinary bladder sling complications.; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.	1
General/Family Practice	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2002; There has not been any treatment or conservative therapy.; Pelvic pain abdominal pain bilateral groin pain	1

General/Family Practice	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/4/16; There has been treatment or conservative therapy.; abnormal finding on ct; physical therapy and medicine	1
General/Family Practice	Approval	72196 MRI PELVIS	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
General/Family Practice	Approval	72196 MRI PELVIS	Continues to have hip pain-her gabapentin was increased and diclofenac added-she did receive good pain relief on right but her left hip is still very troublesome- it causes her pain at HS-it awakens her at night and she is not able to lay on her left sid; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 MRI PELVIS	Description Coccyx pain (M53.3). very tender coccyx but normal exam. No masses felt. Regular xray was ok but she is terrified of cancer of that area. She had an abnormal cologuard test and is set up for a colonoscopy later this month. GET MRI.  P; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1

General/Family Practice	Approval	72196 MRI PELVIS	Findings; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	72196 MRI PELVIS	has a hernia; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; over a year; There has been treatment or conservative therapy.; feelins like she has been kicked by a horse; surgery	1
General/Family Practice	Approval	72196 MRI PELVIS	MD preformed ct of abdomen pelvis w contrast, requested for an MRI to be preformed as soon as possible; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; greater than 1 month; There has not been any treatment or conservative therapy.; generalized weakness, decreased appetite/oral intake, decreased urination	1
General/Family Practice	Approval	72196 MRI PELVIS	mri lumbar spine doesn't go far enough to see sacrom; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 MRI PELVIS	MRI PELVIS WITH AND WITHOUT CONTRAST TO ASSESS BUTTOCK PAIN; SUSPICION OF ANKYLOSING SYNDYLITIS; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1

General/Family Practice	Approval	72196 MRI PELVIS	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/07/2016; There has not been any treatment or conservative therapy.; Numbness of neck, legs, back, and head. Hip and joint pain.	1
General/Family Practice	Approval	72196 MRI PELVIS	Patient already had a MRI no contrast 10/7/16. Showed bilateral iliac lesions. Pre and Post G Gad is needed.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	72196 MRI PELVIS	Patient had abnormal ct .; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72196 MRI PELVIS	Patient with complaints of severe LT hip pain, pain with ambulation increasing over couple of weeks; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1

General/Family Practice	Approval	72196 MRI PELVIS	Patient with recent abnormal Abdomen/Pelvic Ct showing multiple hypodense kidney lesions. Radiologist recommended MRI Abd/Pelvis to more fully characterize lesions and determine if cystic neoplasm.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	72196 MRI PELVIS	Preliminary Procedures X-rays; MRI - Pelvis w/o dye  Already Completed: Procedure Date: 09/08/2016; Abnormal acute fracture line or destructive process is seen. Moderate arthritic changes particularly involving L5-S1.  MRI w; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 MRI PELVIS	Short of having an invasive procedure, several treatments and diagnositc tools have been used to determine the origin of the pain in this patient with no complete resolution of pain.; This study is being ordered for Inflammatory/ Infectious Disease.; Patient first seen for this complaint back in January 30, 2015. Continues to have complaint of occasional pain . Patient had UltraSound and CTab/Pelvis in 2015 .; There has been treatment or conservative therapy.; Persistant left lower quadrant abdominal pain.; Patient has had pain medications, change in Birth Control methods, Imaging, Carafate and prevacid medications and antibiotics.	1

General/Family Practice	Approval	72196 MRI PELVIS	The radiologist recommended this procedure based off of the results of the lumbar MRI. Patient continues to have and radiculopathy despite conservative measures; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	7
General/Family Practice	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.	2
General/Family Practice	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	6
General/Family Practice	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	11
General/Family Practice	Approval	72196 MRI PELVIS	ultrasound shows free fluid in the pelvic and colon area, further study is needed for diagnosis.; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in something other than the bladder, uterus or ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	1
General/Family Practice	Approval	72196 MRI PELVIS	UNKNOWN; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in something other than the bladder, uterus or ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	1
General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/04/2016; There has been treatment or conservative therapy.; PAIN , SEVERE SWELLING; STERIODS , XRAY, CT FOR SWELLEN	3

General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	Rule out cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.; This is a request for an Arm CT Non Joint	1
General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	14
General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.	1
General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.	4

General/Family Practice	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	3
General/Family Practice	Approval	73206 CT ANGIOGRAPHY UPPER EXTREMITY	Yes, this is a request for CT Angiography of the upper extremity.	1
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	none; This study is being ordered for trauma or injury.; 09/18/2016; There has not been any treatment or conservative therapy.; pain in upper arm	1
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	pain in shoulder and arm; This study is being ordered for a neurological disorder.; Atrophy of muscle; numbness and tingling; There has been treatment or conservative therapy.; weakness ,numbness and tingling; Physical therapy and medication	1
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	RADIOLOGIST RECOMMENDS DUE TO SOFT TISSUE SWELLING OVERLYING THE PIP JOINT THE ETIOLOGY UNCLEAR NO EVIDENCE OF A FOREIGN BODY OR UNDERLYING FX SEEN; This study is being ordered for Inflammatory/ Infectious Disease.; UNKNOWN, PT STATES COMING AND GOING FOR 6MONTHS; There has been treatment or conservative therapy.; JOINT SWELLING, PAIN TO 3RD DIGIT L HAND CYCSTIC LESIONS HARD TO TOUCH, AND PER XRAY SOFT TISSUE SWELLING OVERLYING THE PIP JOINT; LABS DRAWN, XR DONE RADIOLOGIST RECOMMENDS MRI W AND WO	1

General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	Rule out cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	Shoulder shows abnormalities; This study is being ordered for trauma or injury.; 04/29/2016; There has been treatment or conservative therapy.; Right Arm and Right shoulder Pain with numbness; Xrays  Prescriptions	1
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.	3
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	9
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.	2

General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.	5
General/Family Practice	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	7
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY		5
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/29/2016; There has been treatment or conservative therapy.; Cervical pain that radiates to shoulder, numbness and tingling of feet; Chiropractic therapy, home exercises	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 07/17/2016; There has been treatment or conservative therapy.; Pain; 5 weeks of Physical Therapy	2

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10/3/2016; There has been treatment or conservative therapy.; WRIST PAIN , LARGE AMOUNT OF SWELLING WEAKNESS, SHOULDER PAIN , DECREASE RANGE OF MOTION , UNABLE TO LIFT; XRAY NEGATIVE , MEDICATION , PT	2
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 10-4-16; There has not been any treatment or conservative therapy.; pain in left hip and shoulder, limited range of motion	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; Several years ago PT was in a motor cycle accident.; There has been treatment or conservative therapy.; Neck pain going to the PT left shoulder and left home. Pain is bad. PT can't lay on left side long. Low back going to the hip. Worst with walking.; Home Exercises , medications, PT & OT.	1

General/Family Practice Approval 73221 MRI JOINT OF UPPER
EXTREMITY

abnormal (+empty can test right shoulder with pain and 4/5 weakness). Joints, Bones, and Muscles: limited ROM (right shoulder to internal rotation) and tenderness (right shoulder subacromial area; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; exercises for rotator cuff injury completed, no relief; The patient received oral analgesics.

1

General/Family Practice Approval 73221 MRI JOINT OF UPPER
EXTREMITY

Chronic pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/2016; There has been treatment or conservative therapy.; Chronic pain in knee. Chronic pain in shoulder with radiation. Pt has right sided sciatica.; Medications, heat and rest.

1

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	Medication therapy has not solved problem. X rays were inconclusive.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Chronic pain centralized in neck and Left shoulder.; Steroid, Muscle Relaxer, Narcotic Analgesic	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	none; This study is being ordered for trauma or injury.; 09/18/2016; There has not been any treatment or conservative therapy.; pain in upper arm	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	ON GOING PAIN FOR OVER 3 WEEKS. PAIN WITH ABDUCTION, FULL ROM WITH DISCOMFORT, POSITIVE DROP TEST, POSITIVE EMPTY CAN TEST. SUSPICION OF ROTATOR CUFF INJURY.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	Patient having persistent LT shoulder pain with movement and arm pain. No relief with NSAIDS. Increasing pain noted over 2 weeks.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	pt has a rotator cuff tear on previous mri.still in pain; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	Pt injured left shoulder and is now experiencing left shoulder pain, decreased ROM. MRI is being ordered to evaluate the injury.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	Severe right hand numbness. Can't pick up anything with right hand; This study is being ordered for trauma or injury.; 12/18/2016; There has been treatment or conservative therapy.; Shoulder and cervical pain. had a fall; At home exercises. Applied heat, muscle relaxers	1

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.	2
-------------------------	----------	------------------------------------	---	---

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.	1
-------------------------	----------	------------------------------------	---	---

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	UNKNOWN; This study is being ordered for trauma or injury.; 11-15-16; There has been treatment or conservative therapy.; joint tenderness, joint swelling and decreased ROM. joint crepitus Straight arm raise + b/l h/o right shouldr repair within 18 months; clicking sound with ROM b/l ; recent football injury and excessive tackling all safety gear in use ; no bruising or red; PHYSICAL THERAPY	2
-------------------------	----------	------------------------------------	---	---

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	X-ray of the right shoulder is unremarkable. Patient is now having loss of range of motion especially on abduction and internal rotation. I suspect he may have rotator cuff involvement.; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY		2
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	has multiple rounded calcifications mid tibial diaphysis, probably related to soft tissue calcifications, need CT of leg for further evaluation.; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	5
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.	4

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	3
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.	4
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.	3
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.	6
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	2

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This patient is needing additional imaging because the X-Rays were unremarkable. Also, so we can form a more successful treatment plan for this patient, other than medication and at home treatment. Patient very well may be needing to be referred to an o; This study is being ordered for trauma or injury.; 11-30-16; There has been treatment or conservative therapy.; Lower back pain, Leg pain, numbness in leg, pelvic pain.; At Home Exercise, Pain medication.	1
General/Family Practice	Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	4
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		7
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	<p>&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.</p>	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	<p>&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; Suspected Aseptic Necrosis; Yes, the patient had recent plain films or bone scan of the knee.; Yes, the plain films/scans are normal.; No, the ordering physician is not an orthopedist or a pediatrician.</p>	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	<p>&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; It is not known if the The home treatment included exercise, prescription medication and follow-up office visits.; It is not known what type of medication the patient received.</p>	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2weeks; There has been treatment or conservative therapy.; pain, severe swelling, cellulitis; antibiotics	2

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; It is not known if patient had a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; PATIENT HAS AN MASS OR LUMP ON THE RIGHT KNEE.; Suspicious Mass or Suspected Tumor/ Metastasis	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; It is not known if the ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The plain films were normal.; There are documented physical or laboratory findings of a joint infection.; ; Known or Suspected Joint Infection	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Post-operative Evaluation	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	26
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an oncologist or orthopedist.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; Known Tumor	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability	11
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion	14

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking	6
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	23
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	4
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	18
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	10

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	11
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	8
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	50

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	28
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking	17
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	41
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are no documented physical or laboratory findings of a joint infection.; There are documented physical or plain film findings of delayed or failed healing.; Post-operative Evaluation	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Instability	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Limited range of motion	3

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Locking	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Swelling greater than 3 days	7
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	15
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	4

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	7
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	22
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; This study is being ordered prior to arthroscopic surgery.; The ordering physician is an orthopedist.; Pre-operative Evaluation; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; Lypic lesions of the femur; Suspicious Mass or Suspected Tumor/ Metastasis	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; N/A; Suspicious Mass or Suspected Tumor/ Metastasis	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	6
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	5
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; There is no supsected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	4

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	3

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; This study is not being ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The plain films were not normal.; abnormal plain film abnormal synovial fluid specimen obtained corticosteroid injection with no improvement; Known or Suspected Joint Infection	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The plain films were not normal.; pt had a venous doppler done on left lower extremity on 10/28/2016. It read "no evidence of DVT seen in left lower extremity. There is some free fluid/possible bursitis adjacent to the knee."; Known or Suspected Joint Infection	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	5
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; The patient received oral analgesics.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; There is a suspicion of fracture not adequately determined by x-ray.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is not a suspected meniscus, tendon, or ligament injury.; There is a suspicion of fracture not adequately determined by x-ray.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; The patient received oral analgesics.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Non-acute Chronic Pain; No, there is no known trauma involving the knee.; Locking; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days; Swelling greater than 3 days	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; Yes, the patient had a recent ultrasound of the knee.; It is not known if patient had recent plain films of the knee.; The patient has not had a recent bone scan.; right knee mass within the popliteal fossa x 10 years but increasing in size per ultrasound recommend MRI; Suspicious Mass or Suspected Tumor/ Metastasis; No, the ultrasound of the knee was not normal.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."	8
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	3

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	11
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	20

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.	18
-------------------------	----------	--	---	----

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
-------------------------	----------	--	---	---

General/Family Practice	Approval	74181 MRI ABDOMEN	Short of having an invasive procedure, several treatments and diagnostic tools have been used to determine the origin of the pain in this patient with no complete resolution of pain.; This study is being ordered for Inflammatory/ Infectious Disease.; Patient first seen for this complaint back in January 30, 2015. Continues to have complaint of occasional pain . Patient had UltraSound and CTAb/Pelvis in 2015 .; There has been treatment or conservative therapy.; Persistent left lower quadrant abdominal pain.; Patient has had pain medications, change in Birth Control methods, Imging, Carafate and prevacid medications and antibiotics.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; The patient has not had an IVP.;	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; patient has had a abdominal ct and abdominal ultrasound that showed a lesion on the liver and the ultrasound suggested 6 month f/u with mri with contrast per the radiologist	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; abdominal pain, US demonstrates liver nodule	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; < Enter answer here - or Type In Unknown If No Info Given. >	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; PT HAD AN ABNORMAL LIVER ULTRASOUND.RADIOLOGIST SUGGESTED MRI OF ABD. REPEATED ELEVATED LIVER ENZYMES. NEGATIVE HEPATIC PANEL.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; A recent ultrasound showed a questionable mass on the right kidney and also cortical thinning. We will go ahead and get a MRI of her kidneys and if need be will refer her to nephrologist.she has stage 3 kidney dz.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Abnormal CT	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; For nodules within the liver parenchyma likely representing benign hemangiomas though not fully characterized at the present time. The lesions visualized on patient's noncontrast CT scan of 31 October 2016; represents 2 of the echogenic nodules visual	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; MRI picked up spot on kidney	1
-------------------------	----------	-------------------	---	---

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had an ultrasound done which revealed a possible liver lesion up to 3.9 cm. It was recommended by radiologist to have a follow up MRI abdomen with and without contrast.	1
-------------------------	----------	-------------------	---	---

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Previous abnormal imaging requires further study.	1
-------------------------	----------	-------------------	--	---

General/Family Practice	Approval	74181 MRI ABDOMEN	<p>This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Previously mentioned hepatic lesions seen on ultrasound is not visualized on today's CT of the abdomen. Etiology of this is not clear; findings were very subtle on ultrasound. Further evaluation is needed; MRI may be helpful to try and identify hepatic l</p>	1
General/Family Practice	Approval	74181 MRI ABDOMEN	<p>This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; recent CT showed 7mm liver lesion, radiologist requesting MRI</p>	1
General/Family Practice	Approval	74181 MRI ABDOMEN	<p>This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; several liver lesions</p>	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; spoke with pt about report will setup mri of the liver to see these and other abnormalities, she verbalized understanding, may need surgery referral pending imaging for functioning adenoma,	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Ultrasound	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study."; < Enter answer here - or Type In Unknown If No Info Given. >	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient was seen in ER last night and had a CT scan that demonstrated an adrenal mass that needed further evaluation.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; patient had an abdominal ultrasound on 11/29/16, showed possible hepatic mass that needs further evaluation.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; < Enter answer here - or Type In Unknown If No Info Given. >	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; byle duct obstruction	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Due to abnormal CT chest which shows adrenal gland lesion.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; patient had chest ct which showed 4mm lesion in right hepatic lobe radiologist requesting liver MRI	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; pt has cyst	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; pt is having a lot of stomach pain. pt has elevated amylase. pt has nausea. pain is worse after eating.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/30/2016; There has been treatment or conservative therapy.; Pt is having pain in the abdomen and pelvis area; Pt had a CT and showed a mass on her liver	1
General/Family Practice	Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	This is a request for a MR Angiogram of the abdomen.	1
General/Family Practice	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	9
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; It is not know if there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; It is not known if this patient have axillary node adenocarcinoma.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	abnormal mammogram that has a suspicious mass found so needing additional views, trying to rule out breast cancer; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Abnormal mammogram; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Family history of breast cancer: -mother diagnosed at age 59; -paternal aunt diagnosed at age 58; -female cousin diagnosed at age 38; Lifetime risk is 35.6% using the Tyrer-Cusik model.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	LUMP IN BREAST AND PRIOR RADIATION DUE TO HODGKINS; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Newly diagnosed ductal carcinoma in-situ of the right breast. Requested for evaluation of extent of disease prior to treatment.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.	1

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	<p>Patient's deceased mother was diagnosed with breast cancer at age 35. Her lifetime risk for getting breast cancer is 20.1%. The probability of her having BrCa 1 gene is 0.77%, and BrCa2 gene is 0.97%. Thank you, Julie; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; It is not know if there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).</p>	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	<p>PT DIAGNOSED WITH RT BREAST IDC 12152016; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.</p>	1

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	THERE IS A PERSISTENT AREA OF ARCHITECTURAL DISTORTION AND ASYMMETRIC BREAST TISSUE NEAR 7 O'CLOCK OF THE BREAST 6.5 CM DEEP TO NIPPLE. MALIGNANCY CAN NOT BE EXCLUDED.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.	2
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	2
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for a suspected implant rupture.; Yes,this study is being ordered to evaluate a suspected silicone implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.	2

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.	3
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Tyer-Cuzick Score is 22%; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	while she does not have 2 first degree relatives, she does have a mother who was diagnosed at age 42(premenopausal)which increases her risk significantly and a paternal grandmother diagnosed at age 50.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77078 CT bone mineral density study, 1 or more sites; axial skeleton	This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.	1
General/Family Practice	Approval	77084 Magnetic resonance imaging, bone marrow blood supply		1
General/Family Practice	Approval	77084 Magnetic resonance imaging, bone marrow blood supply	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an MRI Bone Marrow.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are no new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	2

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain radiating down left arm and up left side of neck, chest heaviness occurring with activity; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST X-RAY RESULTS UNREMARKABLE, BMP NORMAL, TRIPONAN NEGATIVE, D-DIMMER NEGATIVE; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>CP - at time of CP she was at work, and once resting on couch, Left sided, radiates up jaw and face. Movement makes pain worse. ; Has been to the ED with chest pain a couple times.; ; Baseline EKG: Normal sinus rhythm without acute changes. Early ; re; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Had Stress test but is still having episodes; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>History of hypertension, SD depression on multiple leads on the EKG, cervical cancer, shortness of breath due to COPD, hyperlipidemia. Chest pain and discomfort.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	labor abnormal ekg normal chest xray normal; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Member had 2 abnormal EKG; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	palpitations, abnormal st wave; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Patient has been having occ chest pain for 1 week. having left jaw pain and left arm pain, with heaviness in chest.; patient had echocardiogram complete with results of 1. Trace Tricuspid valve regurgitation & 2. Left ventricular diastolic dysfunction gr; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.</p>	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>pt has abnormal EKG, need MPI to eval. cardiology could not do stress echo b/c of abnormal EKG.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.</p>	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	4

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	3
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; It is not known if the patient had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	7
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	4

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	2

General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	2
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a diagnostic/lab test.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1

General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on something other than a diagnostic test, imaging study or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; 1 PET Scans has already been performed on this patient for this cancer.	1

General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	eval for possible metastatic disease. pt found to have adenocarcinoma . ----- ----- DIAGNOSIS: Right lung mass CT guided biopsy:  Well-differentiated adenocarcinoma with lepidic and mucinous feat; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1

General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was NOT identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1

General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	5
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	he is needing it for on going chest pain and the the mass that was found on his lung.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pt has a lung mass and on going chest pain; There has not been any treatment or conservative therapy.; he primary symptoms are chest pain and neck pain.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	3

General/Family Practice Approval 93307 TTHRC R-T IMG 2D +-M-MODE
REC COMPL

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure

1

General/Family Practice Approval 93307 TTHRC R-T IMG 2D +-M-MODE
REC COMPL

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.

1

General/Family Practice Approval 93307 TTHRC R-T IMG 2D +-M-MODE
REC COMPL

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.

1

General/Family Practice Approval 93307 TTHRC R-T IMG 2D +-M-MODE
REC COMPL

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt has a recent onset (past three weeks) of visual disturbance and headache. She has visual field deficits and is seeing bright spots and "stars" in her vision. She then gets a headache behind her left eye generally. This is keeping her from being able to; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt has also has pain, pressure, and cough. Pt has had a stress echo; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/18/2016; There has been treatment or conservative therapy.; dizziness and headaches; Pt was given medication	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	pt has been having chronic/irretractable headaches for approximately 3 1/2 months that have not been relieved with pain medication.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt has been through therapy and tried medications, she has no relief and needing this study to be done; This study is being ordered for Inflammatory/ Infectious Disease.; august 30, 2016; There has been treatment or conservative therapy.; Pt is having abdominal pain on the right side and having headaches with amnesia; physical therapy for 6 wks	1

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt has chronic and severe headaches that none of the migraine medication appear to be helping. The headaches are beginning to affect his work activities.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt has had hiccups for 6 to 7 years. Patient said he has spoke with other md's who would not take him serious, he has hiccups when he is sleeping.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	PT HAS HISTORY OF HEADACHE FOR 2 MONTHS (WORSENING), PAIN IS ON LEFT SIDE; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt has reoccurring elevated blood pressures, severe headaches since the concussion occurred.; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt is getting severe worsening occipital headaches. She has blurred vision. Relief with Tylenol but always comes back. associated symptoms are nausea, vomiting, photophobia, phonophobia, aura, numbness, tingling, weakness, vertigo, and sometimes confusion; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	PT IS HAVING RAPID MEMORY LOSS. PT HAS STRONG FAMILY HISTORY OF DEMENTIA/ALZHEIMER'S DISEASE.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; It is unknown why an MRI is not being considered	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt reports that he is having episodes where he completely loses his memory, he leaves home and when he returns he doesn't know where he has been or any details of what has gone on in the days he has been gone. Pt reports that last time he left he was gone; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Severe Claustrophobia is the reason an MRI is not being considered	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt suffers with constant headaches chronic.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	pt was hit with a bat and is now having headaches and dizziness.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	pt with a syncopal episode with loss of consciousness and fall.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Severe Claustrophobia is the reason an MRI is not being considered	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt. came into the clinic stating that she fainted at work on 12/08/2016 and was sent to the ER.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Syncope/Fainting; It is unknown why an MRI is not being considered	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt. has a history of guillian barre syndrome and headaches. Pt. wife states that he has had behavioral changes recently.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	pt. has headache upon waking and going to bed at night. Pt. has been on medication but hasn't been effective.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt. stated that 2 days ago she passed out and fell while at home. She started "shaking" again. Pt. does have a history of seizures. She has been experiencing fatigue, confusion and disorientation for 1 week with tingling to the right side of her lip.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	R/O aneurysm, strong family history of aneurysm; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	ringing in ears, blurred vision, vertigo; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Syncope/Fainting; It is unknown why an MRI is not being considered	1

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	severe headaches. complains of being dizzy and very fatigue. very unsteady on his feet.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	States he can usually tell when he is going to have a seizure, reports he experiences an electrical shock type feeling in his head.; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	The Pt has mastoid bone tenderness, ringing in ear, pressure, headache,; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	5

General/Family Practice	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Unexplained syncope. Normal blood work up and normal EKG. States "head felt funny" before passing out.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
